Usenet Newsgroup Archive: rec.radio.amateur.policy

2012

These Usenet messages were preserved as a plain-text archive. This PDF was generated by Digital Library of Amateur Radio & Communications from the source text file in 2026.

Date span: 2012-01-01 through 2012-12-31

Source text: rec.radio.amateur.policy.txt

Source item: https://archive.org/details/usenet-rec

Messages included in this PDF: 4,328

Message records with no readable body available in the source text: 7

Messages are presented chronologically by archived date.

Binary or encoded payloads are not printed as blocks of encoded text; a placeholder appears where such material was detected. The original source text is unchanged.

yes its something like that

19. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2012-01-01 07:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1325401201@panix.com>
Source record: 249067
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Just about as funny as your face, or is it your asshole? It is hard to
tell because they both look the same.

I think that was the last movie in which Donald Sutherland was really
good.

lunch was great i had blow flies and rat pancreas topping rank inside
tenderised earwax balls smelling inside moldering kookaburra breast
under microwaved gnats and yak puddings preserve with disintegrating
mongoose eye unwholesome aside rotting elk belly with apple extract,
dished up in a splashing saucepan overflowing with home-killed specks of
string bean and heart in stale fresh blood, a side of olives and a
pitcher of whale milk so with teh punce gotcha i wonder if you have
anyting cognat to say shit for brains.

ISLAM: THE PERFECT RELIGION AND BEST WAY OF LIFE FOR ALL

By Dr. Norlain Dindang Mababaya

It is a must that we strive to know Islam. Allâh's Messenger (sallallâhu 'alayhi wasallam, meaning: May the peace and blessings of Allah be upon him) to the whole mankind encourages us to acquire knowledge of Islam in order to comprehend it. He says in the following authentic Ahâdith:
Abu Hurairah (radhiallâhu anhu, meaning: May Allah be pleased with him) narrated that... the Prophet (sallallâhu 'alayhi wasallam) said, "Those who were the best in the pre-lslamic period of ignorance will be the best in Islam provided they comprehend the religious knowledge." (Bukhâri 4/572 and Muslim)
'Abdur Rahmân ibn Abi Bakrah (radhiallâhu anhu) narrated on the authority of his father that the Prophet (sallallâhu 'alayhi wasallam) said, "If Allâh wants to do good to a person, he makes him comprehend the religion; and of course knowledge is attained by learning." (Bukhâri 1/67)
Mu'awiyah ibn Abi Sufyân narrated that Allâh's Messenger said, "Goodness is a (natural) habit while the evil is a stubbornness. To whomsoever Allâh wills to show goodness, He favors him with the understanding in the Religion." (Ibn Mâjah, 1/221)
When we study Islam or at least read the Qur'an and the authentic Ahâdith we learn that Islam is easy, complete and the perfect religion as well as way of life for the whole mankind. We read in the Qur'an and the Ahâdith the following unique features of Islam:
1. Islam is easy:
"But whoever believes and works righteousness he shall have a goodly reward and easy will be his task as We order it by Our command." (Qur'an 18:88)
Abu Hurairah (radhiallâhu anhu) narrated that the Prophet (sallallâhu 'alayhi wasallam) said, "Religion (Islam) is very easy and whoever overburdens himself in his religion will not be able to continue in that way. So you should not be extremists, but try to be near to perfection and receive the good tidings that you will be rewarded; and gain strength by offering the prayers in the mornings, afternoons and during the last hours of the nights." (Bukhâri 1/38)
Anas bin Malik (radhiallâhu anhu) narrated that the Prophet (sallallâhu 'alayhi wasallam) said, "Make things easy for the people, and do not make it difficult for them, and make them calm (with glad tidings) and do not repulse (them)." (Bukhâri,8/146)
2. Islam is complete:
"…He it is Who has sent unto you the Book, explained in detail. They know full well, to whom We have given the Book, that it has been sent

down from your Rabb in truth. Never be then of those who doubt.” (6:114)
“For We had certainly sent unto them a Book based on knowledge, which We explained in detail -- a guide and a mercy to all who believe.” (7:52)
“…(This is) a Book with verses basic or fundamental (of established meaning) -- further explained in detail -- from One Who is Wise and Well-Acquainted (with all things).” (11:1)
3. Islam is perfect:
“...This day have I perfected your religion for you, completed My favor upon you, and have chosen for you Islam as your religion.” (5:3)
As the perfect religion, Islam teaches mankind how to attain success in the most perfect way. The following are some of the Ahâdith that serve as enlightenment and guidance to those who desire for perfection:
Abu Hurairah (radhiallâhu anhu) narrated that the Prophet (sallallâhu ‘alayhi wasallam) said, "Goodness and comfort are for him who worships his Rabb in a perfect manner and serves his master sincerely.” (Bukhari 3/725)
Ibn Umar (radhiallâhu anhu) narrated that Allâh’s Messenger (sallallâhu ‘alayhi wasallam) said, "If a slave is honest and faithful to his master and worships his Rabb (Allâh) in a perfect manner, he will get a double reward.” (Bukhari 3/722)
Abu Hurairah (radhiallâhu anhu) narrated that the Prophet (sallallâhu ‘alayhi wasallam) said, "Whoever believes in Allâh and His Messenger, offers prayers perfectly and fasts (the month of) Ramadan then it is incumbent upon Allâh to admit him into Paradise, whether he emigrates for Allâh’s cause or stays in the land where he was born.” They (the companions of the Prophet (sallallâhu ‘alayhi wasallam) said, "O Allâh’s Messenger (sallallâhu ‘alayhi wasallam)! Should we not inform the people of that?" He said, "There are one-hundred degrees in Paradise which Allâh has prepared for those who carry on Jihad in His Cause. The distance between every two degrees is like the distance between the sky and the Earth. So if you ask Allâh for anything, ask Him for the Firdaus, for it is the last part of Paradise and the highest part of Paradise, and at its top there is the Throne of Beneficent, and from it gush forth the rivers of Paradise.” (Bukhari 9/519)
Abdullah ibn Hisham (radhiallâhu anhu) narrated: “We were with the Prophet (sallallâhu ‘alayhi wasallam) and he was holding the hand of 'Umar bin Al-Khattab. 'Umar said to Him, "O Allâh’s Messenger! You are dearer to me than everything except my own self.” The Prophet (sallallâhu ‘alayhi wasallam) said, "No, by Him in Whose Hand my soul is, (you will not have complete or perfect faith) till I am dearer to you than your own self.” Then 'Umar said to him, "However, now, by Allâh, you are dearer to me than my own self.” The Prophet (sallallâhu ‘alayhi wasallam) said, "Now, O 'Umar, you are a believer.” (Bukhari 8/628)
Abu Hurairah (radhiallâhu anhu) narrated that the Prophet

(sallallâhu ‘alayhi wasallam) said: “The most perfect believer in respect of faith is he who is best of them in manners.” (Abu Dawud 4665)
Abu Humamah (radhiallâhu anhu) narrated that the Prophet (sallallâhu ‘alayhi wasallam) said: “If anyone loves for Allâh’s sake, hates for Allâh’s sake, gives for Allâh’s sake and withholds for Allâh’s sake, he will have perfect faith.” (Abu Dawud 4664)
Abu Hurairah (radhiallâhu anhu) narrated that the Prophet (sallallâhu ‘alayhi wasallam) said: “Among the Muslims the most perfect, as regards his faith, is the one whose character is excellent, and the best among you are those who treat their wives well.” (Tirmidhi 278, 628, 3264 and Abu Dawud)
Aishah (Radhiallâhu anha) narrated that Allâh’s Messenger (sallallâhu ‘alayhi wasallam) said, "Among the believers who show most perfect faith are those who have the best disposition, and are kindest to their families.” (Tirmidhi 3263)
All the above Prophetic teachings in addition to the Qur’anic Ayât (Verses) earlier quoted clearly tell us that indeed, Islam is the perfect religion and hence the best way of life for all. Islam as a universal religion is Allah’s Blessing and Mercy for all of us. It is for us to enjoy it and be successful in the eternal world to come. The best way to attain success through Islam is to learn it according to its authentic Sources. That is, to acquire knowledge of Islam through the Qur’an and the Sunnah and the right deductions from these revealed Sources of Knowledge and Guidance.
Since Allah (Subhanahu wa ta’ala) is the One Who gives guidance, earnestly ask Him for authentic Islamic knowledge. We must seek His help and guidance to be able to apply such knowledge and share them to others – all for His Pleasure. May our Rabb (Cherisher and Sustainer) increase our knowledge of Islam and enjoy the best life of being true Muslims forever. Ameen

you really are a dumbass! Im simply showing waht great retention i get from this terrific free news server compare to your $6 a month peice of shit server.

this suprise me considering you cant even aford to pay your cable tv bill but you waste money on a text usenet server, duh

altopia is a ripoff and you are an idiot

You need to post to five different newsgroups (alt.fucknozzles,
alt.checkmate,alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy) to satisfy your peculiar emotional need
to piss someone off, persent? Classic illogical response.

Don't cry about not getting Altopia. Why don't you ask the librarian if
they'll consider adding it, or are the older kids waiting to get on the
computer to finish their homework assignments?

LOL! What a loozer...

I'm starting to notice a pattern here. Are you dyslexic and uneducated?

> why dont you ask your food stamp provider to pay altopia for you
> dipshit?

They're already paying for my hoes and weed. I don't want to push my
luck.

Who says I can't afford it? I just resent paying for a whole shitload of
worthless channels just to get the few I actually watch. As for a job, I
can barely keep up with all the business I get as it is. I get to work
at home in front of a big bay window with a million dollar view of
wilderness and lots of oak trees. When I need a break, I just get on
Usenet and slap a few tards like you around. While I'm busy doing that,
I get emails telling me when someone has sent money to my Paypal account.
It doesn't get much better than that. Unlike my cable bill, six bucks a
month gets me unlimited access to more tards than I even have time for,
which is why attention-starved little asswipes like you have to work so
hard to stay on my radar.

==> + BPL PROVIDER IBEC ANNOUNCES SHUTDOWN

IBEC -- one of the very few remaining operators of Access BPL
systems -- has announced that it is closing down. In an undated
announcement that appeared on the IBEC website, the company announced
that it has "no other option than to close our doors and cease
```

operations." IBEC claims that it cannot recover financially from the April 2011 tornadoes in Alabama that "ravished [sic] some of our major service areas." IBEC provided Internet service via broadband over power lines (BPL) to rural communities.

<http://www.arrl.org/images/view/News/IBEC_Letter_to_Customers.jpg>
"While we regret the loss of jobs brought about by IBEC's BPL business failure, in the long run the rural areas that IBEC was trying to serve will be better served by broadband technologies that are superior to BPL and do not pollute the radio spectrum," said ARRL Chief Executive Officer David Sumner, K1ZZ. "While initially IBEC was cooperative in addressing the ARRL's concerns about interference to licensed radio services -- including Amateur Radio -- the ARRL was dismayed to find that the systems as actually deployed fell short of meeting even the inadequate requirements of the FCC's rules. We hope that this latest in the long string of Access BPL failures will persuade the few remaining fans of BPL to turn their attention elsewhere." Read more here <http://www.arrl.org/news/bpl-provider-ibec-announces-shutdown>.

==> + ON THE AIR: ARRL ANNOUNCES DIAMOND DXCC CHALLENGE

2012 is the 75th anniversary of the ARRL's DXCC Award, the world's preeminent DXing award. To celebrate this important milestone, the ARRL has gone back to the beginning -- the 1937 DXCC List.The Diamond DXCC Challenge will test DXers ability to contact all the 231 entities on the original DXCC List.

We tried to find corresponding entities today that would represent the places listed in 1937, and we were mostly successful. There are a couple of places that were merged, like French and British New Hebrides, and the Papua and New Guinea Territories. In those places, for 2012 if you work a YJ or a P29 (on the main island of New Guinea) you will get credit for working two entities! Many other oddities are sprinkled throughout the list, too. Returning to the air in 2012 will be the Canal Zone (any HP operating within 8 kilometers of the Panama Canal), the Cities of Gdansk, Poland, as well as Ifni, Morocco and Balochistan.

For some entities that now consist of multiple countries, you may work any of today's entities to qualify for that single 1937 country. For example, French Equatorial Africa will be considered worked if you log a station in TL, TN, TR or TT in 2012. The Diamond DXCC country tables show the current entity names and prefixes that qualify for the 1937 countries. Read more here <http://www.arrl.org/news/arrl-diamond-dxcc-challenge>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 RE-ENTERS EARTH'S ATMOSPHERE, FALLS SILENT

According to AMSAT <http://www.amsat.org/amsat-new/index.php>, ARISSat-1 stopped transmitting <http://www.arissat1.org/v3/> on the morning of January 4. It is believed that the satellite re-entered the

Earth's atmosphere around 0700 UTC (+/- three hours) and was destroyed soon after. Telemetry reports showed that the temperature aboard ARISSat-1 had been rising as the atmospheric drag began to affect the satellite The predicted decay location is an open part of the South Atlantic, well west of Angola.

The last telemetry reports indicated that the internal temperature had topped 167 degrees Fahrenheit and was rising rapidly. Konstantin Vladimirovich, RN3ZF, sent a reception report of a pass at 0842 UTC and stated, "The telemetry was absent, voice messages were not legible, very silent and interrupted. Most likely, I saw the last minutes in the life of the satellite." The last full telemetry captured was received from ground stations as the satellite passed over Japan at 0602 UTC on January 4.

ARISSat-1 was deployed <http://www.arrl.org/news/arissat-1-finally-deployed-from-iss> from the International Space Station on August 3, 2011 during EVA-29 on by Cosmonaut/Flight Engineers Sergei Volkov, RU3DIS, and Alexander Samokutyaev. The satellite carried a student experiment from Kursk State University in Russia that measured atmospheric density. Students from around the world provided the voices for the FM voice announcements.

AMSAT President Barry Baines, WD4ASW, said that ARISSat-1 marked a new type of satellite that captured the attention of the national space agencies around the world. "With ARISSat-1, we have we have been able to design, launch, and operate a unique educational opportunity," he explained. "By designing an educational mission aligned with NASA's Science, Technology, Engineering and Mathematics goals, radio amateurs around the world have been able enjoy a new satellite in orbit."

ARISSat-1 achieved several "firsts" for Amateur Radio in space, including the first flight test of the AMSAT Software Defined Transponder, which included an FM voice downlink cycling between student messages, spoken telemetry and SSTV; a 16 kHz bandwidth linear transponder; a CW beacon carrying telemetry and call signs of radio amateurs (noting their significant contributions to Amateur Radio in space) and a robust, forward-error-corrected 1kbps BPSK digital downlink carrying satellite telemetry and Kursk experiment telemetry.

==> + HAM RADIO IN HOLLYWOOD: AMATEUR RADIO MAKES ITS DEBUT ON LAST MAN STANDING

If you watched the January 3 episode of Last Man Standing -- the ABC hit situation comedy starring Tim Allen as Mike Baxter, KA0XTT -- you were in for a treat. While this episode didn't feature Amateur Radio per se, it did show Mike's shack in the background. Viewers could see the DXCC, Worked All States, Worked All Continents and the Morse Code Proficiency Certificate -- all provided by the ARRL -- in the first scene. Later on in the show, Mike records his video blog. Sharp-eyed viewers spotted the 2011 ARRL Handbook underneath the mini-tripod, next

to issues of QST!

The episode airing on January 17 will introduce Mike Baxter as KA0XTT. According to Last Man Standing Producer John Amodeo, NN6JA, Mike will have a QSO on the show. "We had two Amateur Extra class staff members complete a QSO on 10 meters and we recorded it," Amodeo explained. " Unfortunately, we were set up on a stage that is basically a Faraday cage. The very QRP signal made it radio-to-radio. We varied the RIT [receiver incremental tuning] to give it a little extra SSB sound, but I don't think the signal made it much past the stage walls. The recording will be on the show. We thought our ham viewers would get a kick out of it. Non-hams will think it's just distorted." Read more here <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-amateur-radio-makes-its-debut-on-em-last-man-standing-em>.

==> ON THE AIR: ROUND UP THOSE DIGITAL QSOS IN THE 2012 ARRL RTTY ROUNDUP

We're in the heart of the 2011-2012 contest season and this weekend offers the first major event of 2012: The ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, participation in the digital modes has been growing at an amazing rate. "It's not difficult to get on the digital modes," he explained. "All it takes these days is a computer, a piece of free software and an interface to connect your computer to your rig. It's never been easier!"

Because of that ease, log submissions for the RTTY Roundup have increased about 33 percent since 2007, with 1539 logs received in 2011. "There are plenty of stations to work, including lots of DX," Kutzko said. "Many stations have achieved RTTY DXCC <http://www.arrl.org/dxcc> and RTTY WAS <http://www.arrl.org/was> in a weekend. You can work toward other awards as well, such as the ARRL Triple Play Award <http://www.arrl.org/triple-play>, earned for working all 50 states on CW, SSB and digital modes (including RTTY) and confirming all of those QSOs via Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>). Do you think you have what it takes to set a new record score for your ARRL Division or Section? Check the record scores <http://www.arrl.org/contest-records> for the RTTY Roundup and see if you can beat the best!

The 2012 ARRL RTTY Roundup runs from 1800 UTC Saturday, January 7 through 2359 UTC Sunday, January 8. Logs may be submitted electronically via e-mail <rttyru@arrl.org>. Paper logs should be sent to ARRL RTTY Roundup, 225 Main St, Newington, CT 06111. All logs must be postmarked no later than 2359 UTC Tuesday, February 7, 2012.

==> DIY: ARRL LAUNCHES NEW DIY CAMPAIGN

The ARRL Public Relations Department has released the Do-It-Yourself (DIY) suite of interrelated promotional materials aimed at exposing the

growing Do It Yourself/Maker community to Amateur Radio opportunities. The DIY movement is nothing new to Amateur Radio. For more than a century, hams have been working in basements and attics, taking things apart and putting them back together in new ways, just for the fun of it. Meanwhile, there has been a growing population of DIY hobbyists who do not know about the opportunities of Amateur Radio.

To reach this growing group, the ARRL Public Relations Department has created an entirely new set of campaign materials for ARRL Public Information Officers, groups and individual hams to use in reaching out to the DIY/Maker community. Bill Pasternak, WA6ITF, and Dave Bell, W6AQ, were recruited to create the new video. Recruiting volunteers throughout 2011, the duo shot more than 65 hours of high-definition video, and then edited it down to a mere 8 minutes. Titled The DIY Magic of Amateur Radio, it shows ham-makers projects from around the country. Read more here <http://www.arrl.org/news/arrl-launches-new-diy-campaign>.

==> + YAESU'S AMATEUR RADIO DIVISION BREAKS WITH MOTOROLA, CHANGES NAME TO YAESU MUSEN

After four years under the Motorola umbrella, Yaesu has split from that company. According to Vertex Standard President and Chief Executive Officer Jun Hasegawa, effective January1, 2012, Motorola will keep the Vertex Standard Land-Mobile Division, while the amateur, marine and air-band will be under the Yaesu Musen banner. The new company will be known as Yaesu USA in the US. Read more here <http://www.arrl.org/news/yaesu-s-amateur-radio-division-breaks-with-motorola-changes-name-to-yaesu-musen>.

==> + ON THE AIR: ARRL 10 METER CONTEST SETS RECORD

As of January 5, almost 5200 logs have been received for the ARRL 10 Meter Contest <http://www.arrl.org/10-meter>. Contest Manager Sean Kutzko, KX9X, is happy to have sunspots back: "This just goes to show what sunspots can do for activity. When the solar flux climbed to 190 in September, it was like the first warm day after a long winter; people came out to play -- and play they did, in unprecedented numbers! Activity during this contest season has been nothing short of tremendous, and it seems to have reached a zenith for the ARRL 10 Meter Contest. Old Timers and new licensees from all around the world got on the air and had one heck of a good time on 28 MHz the second weekend in December, shattering the participation record by more than 2300 logs. And we still have a week to go before the log submission deadline!"

==> + DXCC NEWS: 2011 SEES TREMENDOUS INCREASE IN DXCC APPLICATIONS

With the coming of more sunspots, comes more DX. And when more amateurs are working DX, that means the ARRL's Membership and Volunteer Programs Department -- especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear.

"In 2011, we saw an increase in the number of cards we received from ARRL members that were sent to foreign QSL bureaus, as well as the number of cards we sent out to the bureaus," said DXCC Manager Bill Moore, NC1L. "In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased."

As the number of QSL cards has increased, so have the number of DXCC applications. In 2010, the DXCC Desk processed 7134 applications for initial awards and endorsements; these 2010 applications included 853,462 QSOs. In 2011, the DXCC Desk processed 11,175 applications, containing 1,250,864 QSOs. "Comparing 2010 to 2011, this represents a 47 percent increase in the number of QSOs and a 57 percent increase in the number of applications," MVP Administrative Manager Sharon Taratula explained. "With all of the year's applications not yet fully processed, we've seen a substantial increase in the number of QSOs over 2010."

"Through December 31, 2011, the ARRL Outgoing QSL Bureau received 802,500 cards destined for foreign QSL bureaus from ARRL members in the US," Taratula said. "This represents an increase of 4 percent over the 2010 number of about 771,900 cards. In 2011, the ARRL shipped 799,675 cards -- or close to 5400 pounds of cards -- to foreign bureaus." Read more here <http://www.arrl.org/news/2011-sees-tremendous-increase-in-dxcc-applications>.

==> + ON THE AIR: ARRL REQUESTS FEEDBACK FOR 60 METER BAND PLAN

In November 2011, the FCC released a Report & Order detailing new rules for the 5 MHz (60 meters) Amateur Radio band. These rules have not yet been published in the Federal Register. In order to be official, the rules must be published in the Federal Register and will take effect 30 days after the publication date. The R&O brings with it a number of changes for 60 meter operators. Considering the expected increase in 60 meter activity when the R&O finally takes effect, the ARRL is asking for feedback to assist in crafting a proposed band plan. Read more here <http://www.arrl.org/news/arrl-requests-feedback-for-60-meter-band-plan>.

==> HAM RADIO IN HOLLYWOOD: AMATEUR RADIO A PLOT POINT IN MAJOR MOTION PICTURE

According to previews, the plot of the movie Journey 2: The Mysterious Island -- set to be released February 10 -- hinges on Amateur Radio. The movie's hero Sean Anderson (played by Josh Hutcherson) receives a coded distress signal that comes from a mysterious island where no island should exist. Sean decides to follow the signal with the unwilling assistance from his stepfather Hank (played by Dwayne "The Rock" Johnson).

Sean explains to Hank why he wants to hunt down the signal: "A few nights ago, a radio signal got sent out from these coordinates. It could be the mysterious island that Jules Verne wrote about." Hank replies: "You think you're gonna travel halfway around the world and

meet up with some lunatic who's messing around on a ham radio?" "That's not some lunatic," Sean says. "That's my grandfather." Read more here <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-amateur-radio-a-plot-point-in-major-motion-picture>.

==> HAM RADIO IN HOLLYWOOD: CAN I HAVE "AMATEUR RADIO" FOR $800, ALEX?

If you were watching the popular television game show Jeopardy! <http://www.jeopardy.com/> -- where contestants have to answer in the form of a question -- on December 15 <http://www.j-archive.com/showgame.php?game_id=3783>, you might have noticed there was a question featuring Amateur Radio. In the first round, returning champ Boomie Aglietti was playing the category "Pastimes" when he encountered this "answer" worth $800: "The FCC assigns call signs, like N8DNR, to use in this hobby." Aglietti answered correctly with "ham radio."

N8DNR is the call sign of Debbie Dorfman of West Bloomfield, Michigan. Debbie is the mother of Stephen Dorfman, N6DIW (SK) <http://www.vanityhq.com/bin/chistSO.php4?call=N6DIW&type=single>. Stephen was a writer for Jeopardy! from 1984 until he passed away in 2004 at age 48 due to complications from cancer. According to the New York Times <http://www.nytimes.com/2004/01/09/arts/television/09DORF.html>, Dorfman was Jeopardy!'s longest serving and most prolific writer, with more than 50,000 clues to his credit. As part of a team of writers, he won six Daytime Emmy Awards for special-class writing, given for shows that do not fit into traditional categories. On the Jeopardy! episode that aired January 3, 2008 <http://www.j-archive.com/showgame.php?game_id=2269>, another Dorfman call sign was featured -- this one of Stephen's father Neil -- also for $800, in the category "If You're...": "...using a call sign like K8RX, you're engaged in this hobby."

==> SOLAR UPDATE

Tad "We all live for the Sun <http://www.youtube.com/watch?v=Yus7IvioR_A>" Cook, K7RA, reports: We're continuing to see good conditions, although sunspot activity has declined a bit. The average daily sunspot numbers for December 29-January 4 declined nearly 20 points (when compared to the previous seven days) to 88.1; this is the lowest reported weekly sunspot number average since September 2011 <http://www.arrl.org/news/the-k7ra-solar-update-180>. The average daily solar flux was off 6.4 points to 143.1. Another problem seems to have cropped up with NOAA reporting of data that we use in this bulletin. Last month, the sunspot numbers had to be corrected. Now it appears that some of the geophysical data does not check out. Check the planetary A index for the last few weeks of December 2011 here <http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt> and check the same dates here <http://www.swpc.noaa.gov/ftpdir/indices/old_indices/2011_DGD.txt>.

They should match, but they don't (unless the problem has been corrected by the time you read this). But the numbers for all of 2011 match what we have reported in the bulletin, and I suspect it is the correct version. The near term outlook is for solar flux at 140 on January 5-6, 135 on January 7-8, 130 on January 9-11, 125 and 135 on January 12-13, and then back to 140 on January 14-21. The next short term peak is expected at 150 on January 24-26. The expected planetary A index for January 5-9 is 5, 8, 15, 10 and 8, then back down to 5 on January 10-27. That predicted A index of 15 on January 7 -- if accurate -- will be the highest since October 25, when it was 27, and 31 the day before. That activity was sparked by a coronal mass ejection that affected earth around 1800 UTC on October 24. Look for more information on the ARRL website on Friday, January 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Sunrays' I Live for the Sun <http://en.wikipedia.org/wiki/I_Live_for_the_Sun>.

==> ARRL CONGRATULATES: ASHRAF ABUELHAIJA AND KLAUS SOLBACH, DK3BA, WIN DECEMBER QST COVER PLAQUE AWARD

The winners of the QST Cover Plaque Award for December are Ashraf Abuelhaija and Klaus Solbach, DK3BA, for their article "An Inverted V Wire Yagi with Switchable Pattern Rotation for 14 MHz." Congratulations Ashraf and Klaus! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the January issue today.

==> DAYTON HAMVENTION: NOMINATION DEADLINE FOR DAYTON HAMVENTION AWARDS APPROACHING

It's not too late to nominate individuals and clubs for the 2012 Dayton Hamvention® awards. The deadline to make your nominations for the Amateur of the Year Award, Special Achievement Award, Technical Excellence Award, and the Amateur Radio Club of the Year Award is Sunday, January 15. The winners will be recognized at the 2012 Dayton Hamvention, May 18-20. Read more here <http://www.arrl.org/news/nomination-deadline-for-dayton-hamvention-awards-approaching>.

==> THIS WEEK IN RADIOSPORT

This week:

- January 6 -- NCCC Sprint Ladder
- January 7 -- PODXS 070 Club PSKFest; QRP ARCI Pet Rock Celebration
- January 7-8 -- ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>; CWops Mini-CWT Test; Original QRP Contest; EUCW 160 Meter Contest
- January 8 -- ARRL Kids Day <http://www.arrl.org/kids-day>; SKCC

Weekend Sprint; DARC 10 Meter Contest; Midwinter Contest
- January 11-12 -- CWops Mini-CWT Test

Next week:

- January 13 -- NCCC Sprint Ladder
- January 14-15 -- North American QSO Party (CW); WW PMC Contest;
Michigan QRP January CW Contest
- January 16 -- Run for the Bacon QRP Contest
- January 19 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8 -- ARRL New York/Long Island Section Convention
<http://www.arrl.org/hamfests/new-york-long-island-section-convention-ham-rad
io-university-2012>,
Bethpage, New York
- January 27-28 -- ARRL Mississippi State Convention
<http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfe
st-1>,
Jackson, Mississippi
- February 4 -- ARRL Virginia State Convention
<http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>,
Richmond, Virginia; ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-1>,
Ladson, South Carolina
- February 10-12 -- ARRL Northern Florida Section Convention
<http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-ham
cation-1>,
Orlando, Florida
- February 17-18 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-1>,
Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention
<http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie,
Arkansas
- February 25 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>,
South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention
<http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest
>,
Del Rey Oaks, California; ARRL South Texas Section Convention
<http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-

hamfest-2>,
Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention
<http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>,
Birmingham, Alabama
- March 9-10 -- ARRL Louisiana State Convention

Amateur Radio Newsline(tm) Report 1795 - January 6 2012

Amateur Radio Newsline report number 1795 with a release date of
January 6th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISSat One falls from orbit after bringing
the delight of ham radio to peoples world-wide; the last B-P-L system
in the USA to use the ham bands shuts down; the ARRL seeks input on a
new bandplan for 60 meters; Samoa and Tokelau cross the International
dateline and ham radio honors inventors Reginald Fessenden and Raymond
Heising, Find out the details are on Amateur Radio Newsline(tm) report
number 1795 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ARISSAT ONE MISSION COMES TO A CLOSE

The mission of ARISSat-1 has come to an end. Bill Pasternak, WA6ITF,
is in the newsroom with the details:

--

Reception reports indicate that ARISSat-1 fell from the sky on
Wednesday, January 4th. Its predicted impact point was in an open area
of the South Atlantic west of Angola.

The last full telemetry captured and uploaded to the ARISSatTLM web
site was at 6:02 UTC as the satellite passed over Japan. These reports
showed that the temperature aboard ARISSat One had been rising as
atmospheric drag began to affect the satellite. Final temperatures
received showed that the Internal Housekeeping Unit was at 167 degrees
Farenheight and was rising.

The last time ARISSat One was heard at the Amateur Radio Newsline
studio facility in California was on January 2nd at about 18:15 Pacific
Standard Time. During that transmission the satellite was at about 127
statute miles in altitude and several hundred miles West of Los
Angeles. Its signal sounded like this:

--

ARISSat-1 audio

--

Two days later, during the 8:42 UTC pass over Russia, RN3ZF sent in a reception report to the ARISSat-1 monitoring website. That posting stated telemetry was absent, voice messages were not legible and interrupted. It is pretty much assumed that RN3ZF most likely witnessed the last minutes in the life of satellite.

ARISSat-1 was deployed from the International Space Station on August 3, 2011 during a space walk by two Russian Cosmonauts. It marked the first ever test flight of an AMSAT designed Software Defined Transponder. One with the ability to transmit simultaneous FM voice on its downlink cycling between student messages, spoken telemetry and SSTV from cameras on the spaceframe. Students from around the world provided the voice announcements. The satellite also carried a student experiment from Kursk State University in Russia which measured atmospheric density.

ARISSat-1 was likely one of the most popular ham radio satellites ever placed on orbit and its one that is definitely going to be missed.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

ARISSat-1 was originally to be named Suitsat 2. The entire project was re-engineered after the Russian spacesuit that was to become Suitsat 2 was prematurely jettisoned from the International Space Station before it could be fitted with ham radio gear. (ANS, WA4SCA, ARNewsline(tm))

**

THE BPL FIGHT: IBEC CLOSES DOWN BPL OPERATIONS DUE TO FINANCIAL LOSSES

One of the very few remaining United States operators of a Broadband over Powerline Internet access system has announced that it is shutting down. A notice that appeared on the International Broadband Electric Communications web site said that due to its inability to overcome financial damage from the April 27th 2011 tornadoes that ravaged some of its service areas in Alabama, it regrets that it has no other option than to close its doors and cease operations.

International Broadband Electric Communications better known by the acronym IBEC went on to say the customer support would cease on January 16th and urged its customer base to seek alternative Internet access as soon as possible. It also stated that it sincerely cares about the Internet needs of rural America and detests watching the national carriers ignore the communications needs of so many hard working families across the nation.

IBEC was headquartered in Huntsville, Alabama. It provided Internet service using broadband over power line technology to rural communities in several states including Virginia, Pennsylvania, Indiana as well as Alabama. With is departure, the ARRL says that there is no other Broadband over Powerline system in the United States that uses the

amateur bands in their deployments. You can read the IBEC closure announcement on its website at www.ibec.net. (Various news reports)

**

RESTRUCTURING: ARRL SEEKING INPUT ON A 60 METER BANDPLAN

The ARRL is seeking input on a proposed new bandplan for the 5 MHz or 60 meter band.

As previously reported, last November the FCC released a Report and Order detailing new rules for the 5 MHz Amateur Radio band. This announcement brought with it a number of changes for 60 meter operators.

Changes include substituting a channel at 5 point 358 point 5 MHz for 5 point 368 MHz previously authorized. The effective radiated limit in the 60 meter band will be raised by 3 dB to 100 W Peak Envelope Power relative to a half-wave dipole. Also, three additional emission types are authorized. These are Data, RTTY and CW will be authorized as soon as an effective date for a rules change is announced.

The ARRL says that considering the expected increase in 60 meter activity when the FCC's Report and Order finally takes effect, the League is asking for feedback to assist in crafting a proposed band plan. If you're a 60-meter operator, e-mail your suggestions to hf-band-plan (at) arrl (dot) org. You can also participate in an online survey at tinyurl.com/60-meter-plan. (ARRL)

**

TIME TRAVEL: SAMOA AND TOKELAU JUMP INTERNATIONAL DATELINE

The tiny South Pacific nation of Samoa and its neighbor Tokelau have jumped forward in time crossing westward over the International Date Line. This, to align themselves with their other 21st century trading partners throughout the region.

At the stroke of midnight on December 29th time in Samoa and Tokelau leapt forward to December 31st which was New Year's Eve. For Samoa's 186,000 citizens, and the 1,500 in Tokelau, Friday December 30, 2011 simply ceased to exist.

Of coarse this does complicate the QSL'ing process for ham radio contacts made with either of these entities on the dates that were simply cast away. It will be interesting to see how the DXCC and pother awards operations handle this situation. (Media Network)

**

NCDXF CONTRIBUTES $15000 TO HK0NA OPERATION

The Northern California DX Foundation has made a $15,000 (dollar) contribution to the HK0NA Malpelo Island DXpedition which is scheduled take place from January 21st to February 5th or 6th.

According to team co-leader Bob Allphin, K4UEE, an advance team of four members departed on Christmas day with nearly 4 tons of gear to transport to the island. They will establish two camps and set up antennas and stations which should be ready when the main team arrives January 21st.

Allphin says that no expedition has ever operated from the top of the island before. Because of this western North America, Asia and Oceana have a much higher need for it.

For the past 40 years the Northern California DX Foundation has funded major DXpeditions to many of the worlds most wanted entities. Malpelo was rated as number 12 on the DX Magazine's Most Wanted List for 2011. More about this massive DX operation is on-line at HK0NA dot com.

The Northern California DX Foundation has also sent a $500 Christmas gift to the Radio Amateur Society of Thailand's HS0AC Club This to help rebuild and re-equip the HS0AC station that was destroyed by recent flooding.

We will have more DX related news later on in this weeks Amateur Radio Newsline report. (NCDXF, W0GJ)

RESCUE RADIO: FEMA PLANS MORE AND LONGER EAS TESTS

FEMA and the FCC plans to conduct more, longer, national EAS tests. This, according to Damon Penn who is the assistant administrator for National Continuity Programs at the Federal Emergency Management Agency. Amateur Radio Newsline's Cheryl Lasek, K9BIK, is here with the details:

--

According to news reports FEMA's Damon Penn recently told a congressional panel that after broadcasters report their E-A-S results to the FCC that his agency will be able to determine the extent of the successes and limitations of the November 9th 2011 national test. It will also let FEMA lay plans for future system testing.

Reports say that much of Penn's testimony centered on how to improve the Integrated Public Alert and Warning System known by the acronym IPAWS. This includes making it accessible to people with disabilities. To accomplish this, FEMA has partnered with organizations like National Public Radio to demonstrate that incorporating Common Alerting Protocol

enabled technologies to alert persons with access and functional needs. Penn says that National Public Radio is working on using Common Alerting Protocol compliant messages to deliver alerts through N-P-R's digital radio to prototype devices that activate a bed shaker, display an audio alert in text and output the text to a Braille printer.

Penn also noted that FEMA continues to expand and harden Primary Entry Point stations, going from 36 in 2009 to a current level of 63 with three more under construction. Primary Entry Point stations are those used by the government to originate a nationwide alert. Penn says that by the end of 2012, some 77 Primary Entry Point stations will cover more than 90% of the nation's population.

In his testimony Penn noted that new Primary Entry Point stations all use a standard configuration. This he says means savings in maintenance costs and ensuring ease of movement between these operations. New stations also have the ability to operate under extreme conditions and possess backup equipment and power.

For the Amateur Radio Newsline, I'm Newsline's Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Penn said that legacy Primary Entry Point stations will be retrofitted to meet the current Primary Entry Point station resiliency standards. (RW)

RADIO DAMAGE: FIRE TAKES PENNSYLVANIA AM STATION OFF THE AIR

A Carlisle, Pennsylvania radio station has been taken off the air due to a fire. WIOO AM Program Director Ray Thomas told W-H-T-M news that everything was fine when he left the building to get lunch at around 1 p.m. on Monday, January 2nd. When he returned sometime later he found the building was on fire.

Operations Manager Eric Swidler says station personnel need to determine how much of the facility's equipment is salvageable and time to locate new studio space. Right now, It's unclear when WIOO will be back on the air. An electrical malfunction has been blamed for the blaze. (RW)

**

ENFORCEMET: POPULAR FT. MYERS FLORIDA UNLICENSED STATION SHUT DOWN

Another crackdown on unlicensed radio operations in Florida. Jim Davis, W2JKD, reports:

--

A Lee County, Forida, man has been arrested for broadcasting gospel and public service announcements over 107.5 mHz without a license.

The station called itself Dunbar Community Radio, which catered to the Ft. Myers area. It was shut down on December 9th after its operator, Al Knighten, was arrested for illegally broadcasting shows and music.

Fort Myers Police helped with the FCC bust but Captain Dennis Eads admitted it was a difficult task. He told the local press that the station was providing a service, but the bottom line is that it's operation was illegal.

For his part, station owner Knighten says he doesn't have any regrets. In an interview with WBBH television news he was quoted as saying he believes it was worth it in letting people know we can create something in this community that we can be proud of.

Im Jim Davis, W2JKD.

--

What further action will be taken against Knighten by the FCC or the state of Florida is unknown as we go to air. (RBR.com, FCC)

PUBLIC SERVICE: OPERATORS NEEDED FOR CANADIAN SKI MARATHON

Volunteer operators are needed for the 2012 Canadian Ski Marathon will be held on February 11th and 12th. According to Harold Hamilton, VA3UNK, the event will be held in Western Quebec Province's Ottawa Valley running eastward between Buckingham and Lachute. VA3UNK notes that the marathon depends on ham radio volunteers to provide safety and logistical communication for the benefit of the skiers. If you would like to take part, please e-mail VA3UNK to radio1 (at) admin2 (dot) ca. More information on this event is on-line at www.radio-1.ca. (VA3UNK)

HAM RADIO ON THE WEB: ARVN RELEASES ARRL/TAPR DCC VIDEO

Gary Pearce, KN4AQ, of Amateur Radio Video News has released video of the entire 2011 ARRL and Tucson Amateur Packet Radio Digital Communications Conference on the World-Wide-Web. Amateur Radio Video News says that it is also trying a shareware approach to the funding of these videos. It is trusting that those who view them will in turn make a contribution to cover their production costs. You can screen these videos and get information on how to support this and future Amateur Radio Video News projects by taking your web browser to www.arvn.tv. (KN4AQ)

NAMES IN THE NEWS: YOUR HELP NEEDED TO KEEP W5KUB NETCASTS ON THE WEB

One of the true good-guys of ham radio says that he needs the financial support of those who watch his live video coverage of the Dayton Hamvention and other major ham radio events at W5KUB dot com to keep these Netcasts coming their way.

Tom Medlin, W5KUB, has been Netcasting the Dayton Hamvention and Huntsville Hamfest for the past 10 years. He says that covering such events is a major undertaking for him that requires several months of preparation for each one that is live streamed. And during the decade he has provide this service he has done so paying almost every penny himself.

Medlin lives in the Memphis, Tennessee area. According to W5KUB, it now costs him close to $1500 to live stream any of these shows to viewers worldwide. Using the Dayton Hamvention as an example, some of his expenses include over $500 in hotel charges; $200 or more in gasoline for his mobile unit and another $210 for his flea-market parking spaces.

But that's not all. As Tom points out, his video streaming service is not a part of the Hamvention he gets no subsidy from it. So he has to pay another $70 for tickets for himself and his crew plus about $400 for food and expendable items such as batteries and the like. And in the end it works out at about $1500 each time he provides the video streaming service.

According to a posting on his W5KUB.com website, expenses have climbed through the roof over the past few years. As such, he is asking those who view his Netcasts to please consider donating a little to help defray his expenses in providing this service. He says that his goal is to try to raise at least $1000 in donations this year to go towards the $1500 expense. If he can get that, he will continue to subsidize the difference.

Tom adds he never wanted to ask for donations but that may be what it takes if he is to continue broadcasting these events. More information on how to support this worthy cause is on-line at tmedlin.com/donate.html. (ARNewsline(tm) from W5KUB.com posting)

HAM HAPPENINGS: CONTEST UNIVERSITY 2012 - MAY 17 IN DAYTON OHIO

The 2012 Contest University will be held May 17th at the Crowne Plaza Hotel in Dayton, Ohio. This in concurrence with this years Dayton Hamvention.

This years scheduled instructors include such notables as N6TR, K3NA, K7NV, XE1KK, W5WZ and K2RD to name only a few. Also, several past professors will present papers as well.

Early bird registration is open through January 31st. More information is on liner at www.contestuniversity.com. (Contest University)

**

HAMVENTION 2012: AWARDS NOMINATIONS DEADLINE IS JANUARY 15

January 15th is the deadline to submit nominations for the Dayton Hamvention 2012 awards for Amateur of the Year, Special Achievement,

Technical Excellence and Club of the Year.

The Amateur of the Year Award goes to an individual who has made a long-term, outstanding commitment to the advancement of amateur radio. The Technical Excellence Award is for the person who has made an outstanding technical advancement in the field of amateur radio. The Special Achievement Award honors someone who has made an outstanding contribution to the advancement of amateur radio, usually someone who has spearheaded a significant project. The Club of the Year award goes to a club which has made a significant contribution to the advancement of amateur radio.

All amateur radio operators are eligible. The Hamvention Awards Committee makes the decision on all awards based in part upon the information it receives. Documentation that informs the Awards Committee of a nominee's accomplishments may include magazine articles, newsletters, newspaper clippings, and even videos. These materials become the property of Hamvention and will not be returned.

Additional details on these awards and a nomination form are available on the Dayton Hamvention Website located in cyberspace at www.hamvention.org/awards.php. Nominations also are accepted via US mail to Dayton Hamvention Awards, PO Box 964, Dayton, Ohio, 45401.

The winners will be recognized at the 2012 Hamvention, which runs May 18th to the 20th at the HARA Arena in the Dayton suburb of Trotwood, Ohio. Hamvention planners say that they hope to see you there. (Hamventionr)

RADIO FROM SPACE: SETI SEARCH BEGINS ANEW

Researchers have once again undertaken the search for intelligent life on other planets. After lying dormant for more than seven months, radio telescopes run by the SETI Institute have once again begun listening for radio signals from the many alien planet candidates discovered by NASA's Kepler space telescope. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

S-E-T-I or SETI is an acronym that stands for the Search for Extraterrestrial Intelligence. On Monday December 5th, Jill Tarter, who is the director of the Center for SETI Research at the SETI Institute announced that the group has begun re-observing the Kepler worlds using a ground-based radio telescope system.

SETI's Allen Telescope Array or A-T-A is a set of 42 dish type antennas located about 300 miles northeast of San Francisco, California. It began scanning the heavens for electromagnetic signals that could betray the presence of an intelligent alien civilization back in 2007. In January of 2011 the SETI team started training the Allen array on the 54 planet candidates Kepler had detected what is described by astronomers as the first habitable zone to date. Then it was shut down due to budgetary constraints.

Once funds became available, SETI researchers reactivated the Allen Telescope and have begun using Kepler's discoveries to guide its activities. The Kepler space telescope was placed on-orbit in March 2009. Its mission is to hunt for Earth-size planets in their parent stars' habitable zone. That would position such planets at just the right range of distances from their home star where liquid water and perhaps life as we know could exist.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburgh, Pennsylvania.

--

SETI and ham radio have had a long association with one another going back several decades. (Space.com)

**

HAM RADIO IN SPACE: AMSAT FRANCOPHONE FORMED TO REPLACE AMSAT-FRANCE

Amsat-Francophone is the name of a new organization that hopes to replace AMSAT-France which was dissolved in late 2011. Formed in late December, AMSAT-Francophone lists among its goals the development of amateur satellites, technology and systems useful for the construction and / or use of amateur satellites and participation in national and international non-commercial projects in space. The hams behind AMSAT-Francophone are said to be some of the people who originally created AMSAT-France 16 years ago. More in Google translated English is at tinyurl.com/AMSAT-Francophone. (Southgate)

**

HAM RADIO IN SPACE: AGEING FO-29 RECOVERED FROM SHUTDOWN

The Fuji Oscar 29 Command Team reports from Japan that they have recovered the satellite after it had experienced a shutdown. This, due to longer eclipse periods causing an under-voltage condition.

Ground station operators have placed FO-29 in a temporary, but stable configuration for further testing and recovery operations. They were to

test FO-29 while it is over Japan between December 23rd and the 25th. If no problems occur the Command Team will announce an operating schedule for the satellite for the early part of 2012. (JE9PEL)

**

HAM RADIO IN SPACE: NO 40 METER CONTACTS POSSIBLE WITH THE ISS

According to a note from the Amateur Radio on the International Space Station team, rumors that the ISS was having direct contacts on the 40 meter band are false. The reason that this is not possible is that there is no high frequency radio gear on board the orbiting outpost. What is likely being heard is space station audio being retransmitted by an amateur station on the ground. ARISS notes that WA3NAN which is the club station at the Goddard Spaceflight Center in Greenbelt, Maryland, is among those that retransmit shuttle audio. (ANS)

**

DX

In DX, word that the long planed Sable Island DXpedition has been postponed. According to AA4VK and WA4DAN, a recent winter storm with twenty foot swells pushed water onto the sand runway making it unusable. Al Wilson, the Officer in Charge of Sable Island made an assessment of the landing area and reported there was no possibility of a flight to the island at that time. Also, resumption of air operations to Sable would depend on how quickly the water would drain from the landing area and if any other storms affect the island. At that point, the DXpedition planners decided to postpone the operation. For the latest on when the operation might be rescheduled please check www.cy0dxpedition.com on the World Wide Web.

Keep an ear open for special event station 4G0LD to be active during 2012. This operation is to celebrate the 50th anniversary of the Philippine Amateur Radio League. QSL only via the Bureau.

Lastly, listen out for six operators to be active as TN2T from the Republic of the Congo between January 22nd and the 31st. Using three stations, the DXpedition will be active on 160 through 10 meters using CW, SSB and RTTY. QSL Manager is M0URX. More information is on-line at www.tn2t.be.

(Above from various DX news sources)

**

THAT FINAL ITEM: HONORING FESSENDEN AND HEISING NEAR 500 KC

And finally this week, in honor of inventors Reginald Fessenden and Raymond Heising, a special operation is taking place on 472.5 kHz. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of the details:

--

As early as 1900 Reginald Fessenden was experimenting with the direct transmission of human speech. A bit later, during WW1, Raymond Heising was developing a method of constant-current modulation that was one of the earliest forms of Amplitude Modulation.

Brian Justin, WA1ZMS/4 is part of the ARRL's Low Frequency WD2XSH Experimental License. With the cooperation of commercial coastal CW station WNE and the FCC's Office of Engineering Technology Justin has received a Special Temporary Authority with call sign WF9XIH. This to permit AM transmissions with a center carrier frequency of 472.5kHz until March 1st.

Reginald Fessenden is best remembered for his Christmas Eve 1906 transmission. It was comprised of him playing the violin, playing a recording and him reading a Bible verse. Justin began his operation the week of December 18th of 2011 with a special recreation of that 1906 Christmas Eve transmission:

--

Actual transmission audio.

--

According to Justin, WF9XIH is licensed for up to 20 watts Effective Radiated Power and he says that every effort is being made to run as close to that ERP as possible. The antenna is a 160 meter dipole that tends to be very lossy when fed by a 600 meter signal. This is the same antenna that he has been using for his WD2XSH/31 operation.

WF9XIH transmissions are being coordinated with W-N-E and any changes to the WNE schedule will alter the WF9XIH operating times. The current plan is to make at least one Heising modulated AM transmission most evenings at 02:00 UTC. Audio loops of speech and a series of stepped audio tones will be used most of the time. The stepped audio tones should make it easier for DX listeners to demodulate them in CW or SSB mode even when they are well beyond the range of the AM signal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

If you happen to copy a WF9XIH transmission, WA1ZMS requests that you log it at www (dot) 500kc (dot) com. Information about the ongoing WD2XSH/31 operation can be found at tinyurl.com/wd2xsh31 (WA1ZMS/4)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from

the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Jeez... one little backhand a couple months ago, and you're still all
butthurt about it. I'm sorry if I hurt your little feelers. When you
grow up you'll learn to deal with rejection and criticism a little
better. That's because you'll have had plenty of practice.

The difference between you and I is that I am at least capable of
holding an intelligent discussion. Idiots lie "%" and "Ed Labonte"
couldn't hold an intelligent discussion to save their lives, and
they've proved it over and over again.

So after you've finished sucking "Ed Labonte's" penis, and licked it
clean like a good little sheep, why don't you run along and graze with
the rest of your sheeple buddies and shut the fuck up.

Regards,

Uncle Steve

What does your non sequitur response have to do with
alt.slack,alt.usenet.kooks,comp.os.os2.advocacy,
rec.radio.amateur.policy, persent?

>At the stroke of midnight on December 29th time in Samoa and Tokelau
>leapt forward to December 31st which was New Year's Eve. For Samoa's
>186,000 citizens, and the 1,500 in Tokelau, Friday December 30, 2011
>simply ceased to exist.
>
>Of coarse this does complicate the QSL'ing process for ham radio
>contacts made with either of these entities on the dates that were
>simply cast away. It will be interesting to see how the DXCC and
>pother awards operations handle this situation. (Media Network)

Except, of course, that one either logged the contact in UTC, or can convert the time of the contact at each end to UTC, to confirm the contact was logged at the same time at each end.

While the *local* time may show a discontinuity/gap, UTC plugs on unchanged through the event. There was no time that didn't exist. Thus, there is no issue with contacts on dates cast away.

- - - -

Looked at a different way, December 30 didn't exist in those places. Thus, nobody there could have made a contact on that day, so (again) no problem could occur.

307. THE EXPANSION OF THE UNIVERSE IN THE QURAN !!!!!!!!!!!!!!

Newsgroup: rec.radio.amateur.policy
Date: 2012-01-10 04:50:25 UTC
From: BV <bv5bv5bv5@yahoo.com>
Message-ID: <2a68a378-4f58-46dc-a845-95faee6bc7f5@r5g2000yqc.googlegroups.com>
Source record: 249405

THE EXPANSION OF THE UNIVERSE IN THE QURAN

What you are about to read might sound unusual but it could be very enlightened

In 1929, in the California Mount Wilson observatory, an American astronomer by the name of Edwin Hubble made one of the greatest discoveries in the history of astronomy. While he observed the stars with a giant telescope, he found out that the light from them was shifted to the red end of the
spectrum and that this shift was more pronounced the further a star was from the earth.
This discovery had an electrifying effect in the world of science, because according to the recognized rules of physics, the spectra of light beams traveling towards the point of observation tend towards violet while the spectra of the light beams moving away from the point of observation tend towards red. During Hubble's observations, the light from stars was discovered to tend towards red. This meant that they were constantly moving away from us.

Long before, Hubble made another very important discovery: Stars and galaxies moved away not only from us, but also from one another. The only conclusion that could be derived from a universe where everything moves away from everything else is that the universe constantly 'expands'.

To better understand, the universe can be thought of as the surface of a balloon being blown up. Just as the points on the surface of a balloon move apart from each other as the balloon is inflated, so do the objects in space move apart from each other as the universe keeps expanding.

In fact, this had been theoretically discovered even earlier. Albert Einstein, who is considered the greatest scientist of the century, had concluded after the calculations he made in theoretical physics that the universe could not be static.
However, he had laid his discovery to rest simply not to conflict with the widely recognized static universe model of his time. Later on, Einstein was to identify his act as 'the greatest mistake of his career'. Subsequently, it became definite by Hubble's observations that the universe expands.

What importance, then, did the fact that the universe expands have on the existence of the universe? The expansion of the universe implied that if it could travel backwards in time, the universe would prove to have originated from a single point. The calculations showed that this

‘single point’ that harbored all the matter of the universe should have ‘zero volume’ and ‘infinite density’. The universe had come about by the explosion of this single point with zero volume. This great explosion that marked the beginning of the universe was named the ‘Big Bang’ and the theory started to be so called.

It has to be stated that ‘zero volume’ is a theoretical expression used for de******ive purposes. Science can define the concept of ‘nothingness’, which is beyond the limits of human comprehension, only by expressing it as a point with zero volume’. In truth, ‘a point with no volume’ means ‘nothingness’. The universe has come into being from nothingness. In other words, it was created.
The Big Bang theory showed that in the beginning all the objects in the universe were of one piece and then were parted. This fact, which was revealed by the Big Bang theory was stated in the Quran 14 centuries ago, when people had a very limited knowledge about the universe; Allaah says (what means): "Have those who disbelieved not considered that the heavens and the earth were a joined entity, and We separated them and made from water every living thing? Then will they not believe?" [Quran 21:30]

As stated in the verse, everything, even the ‘heavens and the earth’ that were not yet created, were created with a Big Bang out of a single point, and shaped the present universe by being parted from each other.

When we compare the statements in the verse with the Big Bang theory, we see that they fully agree with each other. However, the Big Bang was introduced as a scientific theory only in the 20th century.

The expansion of the universe is one of the most important pieces of evidence that the universe was created out of nothing. Although this fact was not discovered by science until the 20th century, Allaah has informed us of this reality in the Quran (revealed 1,400 years ago) saying (what means): " And the heaven We constructed with strength, and indeed, We are [its expander."[Quran 51: 47]

A 52-year-old Tapiola, Michigan man was arrested Monday for allegedly masturbating inside the Green Light Lounge.

A witness told police that the suspect was in the men's coat rack of the lounge and was leaning into a rack of clothes with his hands down his pants. At one point, according to a police report, the suspect turned toward a store camera and exposed himself through his boxers.

The suspect continued to walk around the lounge exposing himself and later began masturbating while leaning into the coat rack, police said.

When police arrived, the suspect reportedly ran out the back door, but was arrested just west of the lounge by sheriff's deputies.

I'll tell you what. It has to do with rumors that kb9rqz, socking up as
Matk Morgan, was posting that he's a perv who enjoys licking excrement off
other men's genitals.

==> + ARRL BOARD OF DIRECTORS GATHER THIS WEEKEND FOR 2012 ANNUAL
MEETING

ARRL policy is made by its Board of Directors. The 15 voting members
of the Board are the Directors who are elected by the ARRL members in
their respective divisions. The Board meets in January and July,
usually in the Hartford area. ARRL members also elect Vice Directors
who may attend the meetings. ARRL Directors and Vice Directors are
volunteers who work hard to represent the ARRL in their divisions, to
represent the members who elect them on policy issues and to conduct
the committee work that is so important to good decision-making.
```

The 2012 Annual Meeting begins on Friday, January 13 and is expected to run through Saturday afternoon. Usually, the Annual Meeting is held the third full weekend in January, but with the World Radiocommunication Conference (WRC-12) beginning January 23, the Board voted to hold its meeting early.

The two Standing Committees -- the Administration & Finance (A&F) Committee and the Programs & Services Committee -- will meet on Thursday, January 12. These two committees are made up of five Directors and a Vice Director, with the treasurer serving as an additional member of the A&F Committee. Read more here <http://www.arrl.org/news/2012-annual-meeting-of-the-arrl-board-of-directors-set-for-january-13-14-agenda-announced>.

==> + FCC NEWS: FCC DENIES ARRL PETITION ON VANITY, CLUB CALL SIGNS

On January 11, the FCC denied an ARRL Petition for Reconsideration concerning vanity and club call signs. Filed with the Commission in January 2011, the ARRL's Petition was in response to the FCC's Report and Order that detailed rules changes to the vanity call sign system and call signs for Amateur Radio clubs. These new rules went into effect on February 14, 2011.

The FCC noted that the ARRL supports its efforts to prevent club stations from obtaining an unfair share of desirable call signs, but expresses concern that the specific rule language adopted by the Commission "does not preclude the abuses that the Report and Order intended to preclude." In its Petition, the ARRL stated that if a club has multiple station trustees, each of these trustees could obtain a vanity call sign for the club, thereby allowing the club to obtain multiple vanity call signs. The ARRL also argued that a club could "'gam[e]' the club station vanity call sign system" by obtaining multiple FCC Registration Numbers (FRNs) and applying for a vanity call sign under each FRN. "We do not believe that the vanity call sign system is subject to the abuses identified by the ARRL," the FCC said, "or that it's suggested rule changes are necessary." Read more here <http://www.arrl.org/news/fcc-denies-arrl-petition-on-vanity-club-call-signs>
.

==> + ARRL MEETS 2011 FUNDRAISING GOALS

Thanks to the generosity of dedicated members and friends, the ARRL successfully met its 2011 fundraising goals. More than 6000 individuals and clubs supported the efforts of the ARRL this past year through gifts to the Diamond Club, the Spectrum Defense Fund, the Education & Technology Fund, the Historic Preservation Fund, the W1AW Endowment Fund and the ARRL Endowment Fund.

Many of the ARRL's programs and services would not be possible without the additional support of its members. The Development Office -- managed by Chief Development Officer Mary Hobart, K1MMH -- worked tirelessly throughout 2011 to make the membership aware of these needs. "I am proud to report that our members have enthusiastically and

generously responded to our appeals all year long," Hobart said. "Our overall goal for 2011 was $960,000. As of the end of the year, we had met -- and exceeded -- all expectations. To everyone who made this possible, thank you!" Read more here <http://www.arrl.org/news/arrl-meets-2011-fundraising-goals>.

==> + GET READY FOR THE FEBRUARY ISSUE OF QST

The February issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. This issue celebrates 50 years of the Amateur Satellite Service, marking the December 1961 launch of OSCAR 1, the first Amateur Radio satellite. Discover articles, projects and tips to improve your station, as well as information about operating activities that will keep you active on the air throughout 2012.

With energy costs skyrocketing, many people are looking to find ways to save on their electric bill. It's no secret that radios, amplifiers and all the peripherals in your shack can drive up the cost of your monthly usage. With this in mind, Mert Nellis, W0UFO, presents "Characterizing Solar Panels for Amateur Radio Applications." Solar panels use the Sun to produce electrical current to charge a battery, providing steady power for radios and small appliances. And moving your station off the grid may be easier than you think. In his article "Going Totally Green," Dave Gauger, W9CJS, explains that it is simple to make your station environmentally friendly. Gauger notes that he didn't set out to "go green" to save money on his electric bill, but did it for the fun and challenge, as well as to have the ability to provide substantial HF communications in the event of a major power outage.

This year marks the 75th anniversary of the ARRL's DXCC Award, the world's preeminent DXing award. To celebrate this milestone, the ARRL is presenting the Diamond DXCC Challenge. We are challenging DXers worldwide to work at least 100 of the 231 entities representing those on the original 1937 DXCC List. And when you're out there hunting that DX, why not swing your beam south for Antarctic Activity Week? Ruth Vano, KB0USC, tells the story of this annual event sponsored by the Worldwide Antarctic Program in her article "To the End of the Earth -- Antarctic Activity Week."

ARRL Contributing Editor Phil Salas, AD5X, takes a look at the Elecraft KPA500 HF/6 meter power amplifier in this month's Product Review. He says this "fully featured amplifier looks and works great on your desk or at your DX location. It's 160 to 6 meter 500 W capability, auto band switching and PIN diode switching integrate well with all transceivers." QST Product Review Editor Mark Wilson, K1RO, test drove four 25 A switch mode power supplies: the Jetstream JTPS30M, the Powerwerx SS-30DV, the QJE DX PS30SWII and the Ten-Tec model 941.

Of course, there are the usual columns you know and expect in the February QST: Happenings, Hints & Kinks, The Doctor Is In, How's DX,

Vintage Radio and more. Look for your February issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ON THE AIR: THE ARRL JANUARY VHF SWEEPSTAKES MEANS WINTER CONTESTING FUN FOR EVERYONE

VHF operators will be on the bands in force the weekend of January 21-23, as the ARRL January VHF Sweepstakes hits the airwaves. This contest gives the VHFer in all of us a chance to do some contesting during the winter months. "Don't let the cold weather in much of the US dissuade you from getting on the air," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "Many a portable or Rover operation has done just fine in January. While propagation enhancement can seem fleeting in January, there have been some monstrous openings during this contest in years past. Who knows? Perhaps the propagation gods will grant us a late holiday gift with an extended aurora or tropospheric event!" Read more here <http://www.arrl.org/news/the-arrl-january-vhf-sweepstakes-means-winter-contesting-fun-for-everyone>.

==> + FCC NEWS: FCC GRANTS SPECIAL TEMPORARY AUTHORITY FOR AMATEUR SPREAD SPECTRUM EXPERIMENTS

Phil Williams, KA1GMN, has been granted a Special Temporary Authority (STA) by the Federal Communications Commission to conduct Spread Spectrum experiments within 2.5 kHz signal bandwidths on 160 through 2 meters, at a maximum of 100 W effective radiated power. The six month authorization takes effect February 1 and expires on July 31. The FCC has assigned Williams the call sign WF9XJD for use during his experimental transmissions. Read more here <http://www.arrl.org/news/fcc-grants-special-temporary-authority-for-amateur-spread-spectrum-experiments>.

==> + FCC NEWS: RADIO AMATEURS NOT AFFECTED BY NARROWBANDING REQUIREMENTS

The FCC released a Public Notice <http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db0105/DA-12-12A1.pdf>
on January 6, reminding land mobile licensees, frequency coordinators and equipment manufacturers that they have less than one year to transition to narrowband operations in the 150-174 and 421-512 MHz bands. While the latter frequency range includes amateur service allocations, radio amateurs are not affected by the narrowbanding requirement. Land mobile operation is permitted in parts of the 421-430 MHz band in the areas around Detroit, Cleveland and Buffalo, and land mobile licensees in these areas are among those who will have to migrate to narrowband (12.5 kHz or narrower) technology by January 1, 2013. Amateur operation is not permitted along the Canadian border

(north of Line A as defined in the FCC Rules) in the band 420-430 MHz.

==> + ON THE AIR: ARRL REQUESTS FEEDBACK FOR 60 METER BAND PLAN

In November 2011, the FCC released a Report & Order detailing new rules for the 5 MHz (60 meters) Amateur Radio band <http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters>. As of January 12, these rules have not yet been published in the Federal Register. In order to be official, the rules must be published in the Federal Register and will take effect 30 days after the publication date. The R&O brings with it a number of changes for 60 meter operators. Considering the expected increase in 60 meter activity when the R&O finally takes effect, the ARRL is asking for feedback to assist in crafting a proposed band plan. Read more here <http://www.arrl.org/news/arrl-requests-feedback-for-60-meter-band-plan>.

==> SOLAR UPDATE

Tad "Searching for a way to January Sun <http://www.youtube.com/watch?v=ztzMII6T-U4>" Cook, K7RA, reports: The average daily sunspot numbers were up this week by a tiny bit, from 88.1 to 90.6, while the average daily solar flux was down slightly, from 136.2 to 134.9. The latest daily projection from NOAA/USAF shows the solar flux about 15 points lower than the average for the week, at 120 on January 12-15, 125 on January 16-19, and then a jump of 20 points to 145 on January 20-26. It should decline again, and then rise to a peak of 165 on February 17-21. The predicted planetary A index is 5 on January 12, 8 on January 13-14, 5 on January 15-17, 8 on January 18-19, and then back to 5 on January 20-27. Look for more information on the ARRL website on Friday, January 13. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Vanden Plas' January Sun <http://en.wikipedia.org/wiki/Christ_0>.

==> TECHNOLOGY NEWS: VIDEOS OF 2011 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE NOW AVAILABLE ONLINE

Amateur Radio Video News (ARVN <http://www.arvn.tv/>) has released high-definition videos of all the talks presented at the 2011 ARRL/TAPR Digital Communications Conference (DCC <http://www.tapr.org/dcc.html>), held September 16-18. The programs are now available online on the ARVN website <http://arvideonews.com/dcc2011/index.html>.

The DCC is a three-day conference on Amateur Radio digital technology. Among the video presentations are 18 seminars, the Saturday Banquet and the welcome introduction by TAPR Chairman Steve Bible, N7HPR. According to ARVN Producer Gary Pearce, KN4AQ, most of the talks are fairly technical, although there are four separate sessions that cover "Intro to" topics. "All of the talks -- except the 'Intro to' talks -- were shot in three-camera high-definition, with wireless mics

for 'close-up' audio of the presenter, as well as the question-and-answer period," he explained. "The 'Intro to' talks were shot with a single, standard-definition camera.

This year, Pearce decided to release the programs on the web <http://arvideonews.com/index.html> instead of the DVDs that have been produced in previous years (although the DVDs will be available later). "I wanted to make the programs available more quickly and easily to a worldwide audience," he said. "The web has become an easy, high-quality distribution medium."

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Do you have a call sign license plate on your vehicle?
- Do you still have some vacuum tubes in your parts box?
- Will the new privileges on the 60 meter band make you more inclined to operate there?
- Are you active on APRS (Automatic Position Reporting System)?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the April 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- January 13 -- NCCC Sprint Ladder
- January 14-15 -- North American QSO Party (CW); WW PMC Contest; Michigan QRP January CW Contest
- January 16 -- Run for the Bacon QRP Contest
- January 19 -- NAQCC Straight Key/Bug Sprint

Next week:

- January 20 -- NCCC Sprint Ladder
- January 21 -- Feld Hell Sprint; LZ Open Contest
- January 21-22 -- North American QSO Party (SSB); Hungarian DX Contest; YL-ISSB QSO Party (SSB)
- January 21-23 -- ARRL January VHF Sweepstakes <http://www.arrl.org/january-vhf-sweepstakes>
- January 25 -- SKCC Sprint
- January 25-26 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 27-28 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfest-1>, Jackson, Mississippi
- February 4 -- ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>, Richmond, Virginia; ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-1>, Ladson, South Carolina
- February 10-12 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>, Orlando, Florida
- February 17-18 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>, Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>, South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention <http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest>, Del Rey Oaks, California; ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-2>, Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>, Birmingham, Alabama
- March 9-10 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana-hamfest>, Rayne, Louisiana; ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-green-country-hamfest-1>, Claremore, Oklahoma
- March 10-11 -- ARRL Roanoke Division Convention <http://www.arrl.org/hamfests/roanoke-division-convention-charlotte-hamfest-tm>,

Concord, North Carolina
- March 17 -- ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest
>,
Lincoln, Nebraska; ARRL Southern Florida Section Convention
<http://www.arrl.org/hamfests/southern-florida-section-convention-2>,
Stuart, Florida; ARRL West Texas Section Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-57th-annual-st-pa
trick-s-day-hamfest>,
Midland, Texas
- March 23-24 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine

Amateur Radio Newsline(tm) Report 1796 - January 13 2012

Amateur Radio Newsline report number 1796 with a release date of January 13th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The Supreme Court hears an appeal dealing with broadcast indecency that could eventually impact ham radio and other services. Also, the FCC turns away an ARRL vanity call sign appeal dealing with club calls; Missouri exempts hams from a proposed cellphone while driving law and ham radio to celebrate the life of famed country music legend Johnny Cash. All this and more on Amateur Radio Newsline(tm) report number 1796 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC HEARS CHALLENGE TO FCC INDECENT LANGUAGE RULES

The United States Supreme Court heard arguments on Tuesday, January 10th about whether the FCC should still have a role in policing the nation's airwaves or whether its indecency regulations violate guarantees of free speech and due process. Whatever the justices decide could also impact on other, non-broadcast services as well. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has more:

--

The broadcast networks have argued successfully in lower courts that in a world where they exist side by side with cable channels, the Internet and satellite provided programming that it is beyond the FCC's jurisdiction and that singling them out is not only nonsensical but totally unconstitutional. And in a court brief, Washington attorney Carter G. Phillips, who represents several networks, told the court that broadcasting is neither uniquely pervasive nor uniquely accessible to children, yet broadcasters are still denied the same basic First Amendment freedoms as other media.

Phillips continued by stating that to the average American viewer, broadcasting is just one source among hundreds in a media-saturated environment. He noted that with a mere press of a button on the remote control one could switch from other to fully protected sources.

On the other side of this issue is the Obama administration which is defending the FCC's regulatory powers. It told the court that in what it calls a new media world that the FCC is still required to have

continued federal oversight of the public airwaves. This, to provide a haven for parents and children from the unregulated world of cable television and the Internet.

In his brief, U.S. Solicitor General Donald B. Verrilli Jr. wrote that generations of parents have relied on indecency regulation to safeguard broadcast television as a relatively safe medium for their children. He notes that the current regulations come from a 1978 Supreme Court's decision in the case of the FCC versus the Pacifica Foundation. There the court upheld the commission's decision that an afternoon radio broadcast of comedian George Carlin's 1973 monologue broadcast over New York City station WBAI about the so-called seven words that could not be said on television violated indecency standards. It was in that case where the Supreme Court found that the FCC was well within constitutional boundaries to police the radio and television airwaves during the times children would probably be listening, which was interpreted between 6 a.m. and 10 p.m.

As to the reason that this is an important case for ham radio and other personal radio services? Simply because traditionally enforcement of indecency violations in amateur radio, CB and the like has long been predicated on and tied to the standards used to guide commercial broadcasters. If the Supreme Court rules that the FCC cannot control indecent language in broadcasting it could be in effect saying that the government has no power on this issue in other services, including what's said on the ham radio bands.

For the Amateur Radio Newsline. I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

In recent years, the Supreme Court has regularly ruled in favor of free-speech claims. But during oral arguments none of the justices voiced any support for making a major change in the law barring broadcast indecency during safe haven hours. As we go to air it's not known when the Justices will render its decision in this case. (Various published reports)

**

RADIO LAW: FCC REJECTS ARRL PARTIAL APPEAL ON CLUB CALLSIGNS

The FCC has rejected a motion for partial reconsideration of revised rules enacted by the FCC. These to limit the number of vanity calls that any individual or club can hold.

In its petition the League stated that it supports the Commission's efforts to prevent club stations from obtaining an unfair share of desirable call signs. But it also expressed concern that the precise rule language adopted by the FCC did not preclude the abuses that the Report and Order intended to prohibit. Specifically, the ARRL believes that if a club has multiple station trustees, each of these trustees

could obtain a vanity call sign for the club. That in turn could allow the club to obtain multiple vanity call signs.

But in denying the ARRL appeal the FCC said that the Leagues petition does not provide any grounds for reconsidering the Commission's decision in the Report and Order. It said that the concerns expressed by ARRL about licensees attempting to evade the rules adopted in the Report and Order are already addressed by the Commission's licensing rules and processes. It notes that Section 97.5(b)(2) of its rules states, in part, that a club station license grant may be held only by the person who is the license or trustee designated by an officer of the club. In simpler terms, only one vanity call sign per club. (FCC)

**

RADIO LAW: FCC GREEN LIGHTS STA FOR TEXAS HAM TO RUN HF SPREAD SPECTRUM

The FCC has granted Philip J. Williams, KA1GMN, of Euless, Texas, a Special Temporary Authority or STA to conduct Spread Spectrum experiments on 160 through 2 meters.

The 6 month authorization takes effect February 1st and expires on July 31st. It limits Williams to a maximum 2.5 kHz of signal bandwidths at 100 watts effective radiated power. Williams was directed by the FCC to use the Experimental Station call letters WF9XJD during his investigational Spread Spectrum transmissions.

Previous experiments with Spread Spectrum technology have been conducted on the ham radio bands at 222 MHz and above where this mode of transmission is already legal. The Special Temporary Authority granted to Williams is the first permitting Spread Spectrum experimentation on the High Frequency and lower VHF bands. (FCC)

**

LOW FREQUENCY EXPERIMENT: OPERA ENCODED SIGNAL TRAVELS 2200 MILES

Opera has made a big debuet on the ham radio bands. Using the new Opera data mode, Gary Taylor, G4WGT, in Lancanshire in the United Kingdom has successfully transmitted a signal on 137.5 kHz across the North Atlantic to Joe Craig, VO1NA, in Toebay, Canada. This over a distance of 3,500 kilometers or 2200 miles.

Taylor transmitted six full callsign frames in a two hour period, which is a big time saving over other slow digital modes like QRSS. Opera was created by Graham Brown, G0NBD with the actual code written by Jose Ros, EA5HVK. This as a way of providing data operations for stations that only had the CW capability. The most up to date information on this mode can be found at groups.yahoo.com. (Southgate)

**

RADIO SCIENCE: UK HAMS EXPERIENCE DELAYED ECHO PHENOMENA ON 80 METERS

Two UK amateurs have reported hearing strong echoes on their 80 meter CW signals in the evening. Tony Roskilly, G3ZRJ in Herefordshire and Andrew Fairgrieve, GW3OQK in Swansea were in QSO on January 1st when they could hear another signal underneath theirs. It turned out to be an echo of their own signals.

Roskilly said the echoes were initially so strong that he had trouble monitoring his CW keying. The delay in the echoes was of the order of a quarter to a half second and the echo strength hit S9. Tests by Fairgrieve on the evening of the 3rd of January revealed the same phenomena at around 21.00 UTC, albeit weaker in signal strength.

Steve Nichols, G0KYA, is the chairman of the RSGB's Propagation Studies Committee. He says that these were unlikely to be round-the-world echoes, but could be due to a form of magnetospheric ducting where signals follow the earth's magnetic field lines down to the southern hemisphere before being bounced back along the same duct. Nichols said that this was quite rare and not really understood.

Amateurs are being urged to look out for any echoes on their 80 meter signals and report any findings to G0KYA (at) qsl (dot) net. (GB2RS)

RESTRUCTURING: DUTCH HAMS GRANTED BANDS AT 500 KHZ AND 70 MHZ

Dutch amateurs have been granted access to two new bands. The first is a low-band grant from 501 to 505 kHz on a secondary basis with power and mode restrictions. And like most of the European continent they also now are permitted operations from 70 to 70.5MHz. This also on a secondary basis with restrictions on the power output level that they can run. (GB2RS)

RADIO LAW: MISSOURI EXEMPTS HAMS FROM PROPOSED CELLPHONE AND TEXTING LAW

Some good news for hams in the show me state. They won't be subject to a new law working its way through the Missouri legislature to control cellphone and texting while driving a motor vehicle. Matthew Chambers, NR0Q, is here with the details:

--

If you live in Missouri you might have heard, there is a new Senate Bill, SB 567, that has been introduced by State Senator Robin Write-Jones, a Democrat-St Louis to be considered in 2012 by the Missouri Senate. There is good news though in this bill if you're a ham radio operator. The last line of the bill contains the following exemption language:

Exempt are the use of two-way radio transmitters or receivers by a licensee of the Federal Communications Commission in the Amateur Radio Service.

That means that the mobile use of amateur transceivers is for now safe in Missouri.

For the Amateur Radio Newsline, This is Matthew Chambers, NR0Q. In Moberly Missouri

--

>From its wording, the exemption is only for ham radio so users of F-R-S, GMRS and CB might be subject to penalties unless the regulation gets changed to exempt theses personal radio services as well. (NR0Q)

**

RADIO LAW: LESS THAN ONE YEAR REMAINS FOR LAND MOBILE RADIO LICENSEES TO NARROWBAND

Land mobile radio service licensees operating in the 150 to 174 Mhz and in the 421 to 512 MHz bands now have less than a year to transition to FCC mandated narrowband operations. This as the regulatory agency issues a Public Notice reminding all licensees, frequency coordinators, equipment manufacturers, and other interested parties of the Commission's January 1, 2013 deadline to migrate to 12.5 kHz or narrower channel spacing technology.

By January 1, 2013, all VHF/UHF Industrial, Business and Public Safety Radio Pool licensees must operate on 12.5 kHz or narrower channels, or employ a technology that achieves the narrowband equivalent of at least one channel per 12.5 kHz of channel bandwidth. As of that same date equipment manufacturers will no longer be permitted to manufacture and import previously certified equipment that includes a 25 kHz channel spacing mode.

The FCC's Wireless Telecommunications Bureau, Public Safety and Homeland Security Bureau, and Office of Engineering and Technology have issued prior guidance by Public Notice regarding narrowbanding migration, compliance, and waiver requests. In addition, detailed information and references to other resources concerning narrowbanding are available at www.fcc.gov/narrowbanding.

We should add that the amateur 2 meter and 70 centimeter bands are not affected by this FCC mandated narrowbanding order. It only affects commercial land mobile operations.

In the world of amateur radio FM and repeaters, most regions already use 15 kHz channel separation on 2 meters. On 70 centimeters, some regions are reportedly considering a shift from 25 to 12.5 kHz in crowded urban areas. And to be different than the rest of the nation, Southern California shifted from 25 to 20 kHz inter system spacing in the 70 centimeter repeater subband several years ago. (FCC, ARNewsline(tm) archive)

**

RADIO LAW: VERIZON PROCEEDS WITH SPECTRUM ACQUISITIONS

A big move by telecommunications provider Verizon to ease its own spectrum crunch. Jim Davis, W2JKD, reports:

--

Verizon is set to invest in well over 100 licenses to operate broadband systems between 1700 MHz and 2100 MHz. This after spending $3.6 billion dollars to obtain spectrum from cable companies Comcast, Time Warner Cable and Bright House. Jim Davis, W2JKD, has the details:

Verizon says that the acquisition is a positive development which would take spectrum that had been gathering dust in the cable company's inventories and put it in the hands of a company with the motivation and wherewithal to put it to good use.

Lowell McAdam is Verizon's Chief Executive Officer. He recently told the Communications Daily industry newsletter that his company feels good about the acquisition from another perspective. This is because as Verizon has discussed its acquisition of spectrum with the FCC, it has found that one of the problems was there is a lot of spectrum that has been warehoused. This says McAdam takes spectrum with no plans for commercial service and gets it into the hands of somebody who will use it and allow additional investment and development.

Im Jim Davis, W2JKD.

--

Congress and the FCC are trying to push through a spectrum package involving the auction of spectrum in the television band but that has become bogged down in partisan politics. However it appears as if Verizon has taken the initiative to let the free enterprise market set the value and proceed on its own. (Future Communications)

DIY RADIO NEWS: CQ TO INTRODUCE MAKER COLUMN

CQ magazine will introduce a quarterly "Maker" column, to be written by Matt Stultz, KB3TAN, that will appear in the March, June, September and December issues of the magazine.

KB3TAN is the founder of "HackPittsburgh. This is a community workshop for makers in Pittsburgh, Pennsylvania. He has been a ham since 2009

and has integrated amateur radio into many of HackPittsburgh's activities.

As already reported, the hacker and maker movement is a worldwide do-it-yourself phenomenon among mostly younger, tech-savvy individuals who enjoy hands-on tinkering and experimenting with electronics, crafts and similar projects. Many "makers" are not familiar with amateur radio, even though hams have been "makers" since the dawn of radio. CQ says that the goal of this column to help build and strengthen bridges between the amateur radio and the maker communities. (CQ)

**

DIY RADIO NEWS: MULTIPLE LANGUAGE VERSIONS OF THE DIY MAGIC OF AMATEUR RADIO

And speaking of the maker and hacker communities, while it's not even been out a month, there appear to be several groups that have either asked permission to translate the ARRL's new the DIY Magic of Amateur Radio video into other languages or are already undertaking such a project.

Since its release last December 27th, word is that versions with either sub titles or over-dubbed audio are being prepared by individuals or groups around the globe in the Spanish, Portugese and possibly even Russian languages. And these are the ones that are known about.

Also, Tom Medlin who hosted the December 27th release of the video on his W5KUB website has made available some statistics. These show that the new video had viewers in Canada, Venezuela, Mexico, Argentina, France, Cayman Islands, Puerto Rico and New Zealand as well as across the United States.

Those who have not yet seen the new video can do so on-line on YouTube in English at tinyurl.com/arrl-diy-movie. You can also watch it or download it at www.arrl.org/DIY. (ARNewsline(tm))

NAMES IN THE NEWS: FORMER UK OFF SHORE DJ KNIGHTED

Some names in the news. First up is Roger James Gale, a Disk Jockey on Radio Caroline North and Caroline South in the 1960's, who has been

knighted in the United Kingdom's New Year's Honors List. Gale had a long career in radio before becoming the member of Parliament for the North of Kent. He is also the president of the group Conservative Animal Welfare. More about Roger Gale is on-line at www.rogergale.com. (Southgate)

**

NAMES IN THE NEWS: G3KMA AND G3ZAY NAMED WINNERS OF YASME AWARD

And congratulations to Roger Ballister, G3KMA and Martin Atherton, G3ZAY on being named as recipients of the Yasme Excellence Award for 2011. This, in recognition for their dedicated work for the Islands on the Air program. The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to amateur radio, including DXing and the introduction and promotion of amateur radio in underdeveloped countries. (RSGB)

**

NAMES IN THE NEWS: VLA TO BE RENAMED KARL G JANSKY VLA

The world's most famous radio telescope will become the Karl G. Jansky Very Large Array on March 31st. This, to honor the founder of radio astronomy which is the study of the universe using radio signals naturally emitted by objects in space.

The National Radio Astronomy Observatory announced the new name for the National Science Foundation's Very Large Array at the American Astronomical Society's meeting in Austin, Texas. The new name will become official at a rededication ceremony at the radio telescopes site in New Mexico.

The new name was selected from among 23,331 suggestions submitted by 17,023 people from more than 65 countries. The National Radio Astronomy Observatory had asked the public and the astronomical community to suggest names that reflected both the proud heritage and the future promise of the telescope array. More is on-line at tinyurl.com/jansky-vla. (NARO)

WORLDBEAT: THE HCJB COAX CABLE MIRACLE

Word that religious broadcaster HCJB has gotten its Radio Rasuwa project on the air as of last December the 1st, but not without a little divine guidance. An HCJB article about the rural Nepal radio project noted that engineer Ty Stakes fortuitously grabbed an extra length of coaxial cable as he packed for the journey to that lonely corner of the world. And it's a good thing that he did.

It turned out to be needed because the station's studio was not where it had been planned. Once on-site, Stakes and HCJB missionary Toffer King discovered the tower was not the one they had requested. Using local talent, translations and drawings solutions were crafted. A local welder found himself quite busy and needless to say that the extra length of coax that Stakes brought with him came to good use.

HCJB's Global Technical Center in Elkhart, Indiana provided the FM transmitter. The station's coverage area is the northern border of Nepal with an estimated 14,000 people as its potential audience. This includes a large number of Tibetan refugees fleeing Chinese control of their country.

The station will air 17 hours a day, in the local language. It joins five other HCJB FMs in Nepal. Three more are expected to launch during 2012. (RW, HCJB)

**

WORLDBEAT: RAC LOOKING FOR NEW DEFENSE OF AMATEUR RADIO FUND TRUSTEE

Radio Amateurs of Canada is looking for a person to fill the recently vacated position of trustee in the Canadian Defense of Amateur Radio Fund. The Defense of Amateur Radio Fund trustee must be a licensed Canadian radio amateur and may not be an officer, employee, director or agent of Radio Amateurs of Canada. The Defense of Amateur Radio Fund is a Trust Fund established in the early 1990's to provide financial support for travel expenses of an amateur radio representative on the Canadian delegation to World Radio Conferences to defend the amateur radio bands. If you fit the requirements and are interested in this position please provide your name and a brief resume of no more than 500 words by e-mail to Paul Burggraaf at Vo1prb73064 (at) rac (dot) ca. (RAC)

**

WORLDBEAT: IRTS TO CELEBRATE 80TH ANNIVERSARY WITH CONTEST

The Irish Radio Transmitting Society which is Irelands national ham radio organization will be celebrating its 80th anniversary by sponsoring a worldwide contest to commemorate the event. Called CQIR, it will take place most appropriately on Saint Patrick's Day, which this year occurs on Saturday, March 17th. Full rules and information are available on-line at www.irts.ie/cqir or by email to cqir (at) irts (dot) ie. (IRTS)

**

WORLDBEAT: EMI SOUNDS PAGE FROM ON4WW

ON4WW in Westham, Belgium, has created a web page with sound clips that covers the many cases of interference he's dealt with over the years. The sounds cover everything from a rain gutter noise to plasma TV interference and even L-E-D lighting. The ON4WW RFI audio page page is on-line at www.on4ww.be/emi-rfi.html (Southgate)

HAM RADIO IN SPACE: DUTCH ANNOUNCE FUNCUBE LAUNCH AGREEMENT

An agreement has now been reached with ISIS Launch Services BV, based in Delft in the Netherlands, for them to provide a launch of the FUNcube-1 CubeSat satellite. It is anticipated that this will be with a number of other spacecraft from a DNEPR rocket, sometime in the third quarter of 2012.

The orbit is still to be defined precisely but it is expected to be nearly circular and approximately sun synchronous. The FUNcube-1 spacecraft will transmit signals that can be easily received directly by schools and colleges for educational outreach purposes. In addition to providing these educational services for schools and colleges around the world, the spacecraft will also carry a UHF to VHF linear transponder for radio amateurs to use during local nights, weekends and during holiday periods.

The construction and testing of the spacecraft itself has already been funded via a legacy and other sources. For more information, check out www.funcube.org.uk (GB2RS)

**

SPACE SCIENCE: CHINA RELEASES FIVE YEAR PLAN FOR SPACE EXPLORATION

China plans to launch orbital space laboratories and manned ships and prepare to build space stations over the next five years. This according to a plan released Thursday, December 29th that shows the country's space program is very quickly gathering momentum.

China has already said its eventual goals are to have a space station on-orbit and put an astronaut on the moon. According to news reports, that nation has made systematic progress with its ambitious human spaceflight programs, but its latest five-year plan beginning signals a major acceleration to its space exploration program.

According to the white paper setting out China's space progress and future missions, by the end of 2016 China says that it will launch space laboratories, manned spaceships and ship freighters. It will also make technological preparations for the construction of more than one space station.

China's space program has already made major breakthroughs in a relatively short time, although it lags far behind the United States and Russia in space technology and experience. More on China's plans

for its future in space is on-line at tinyurl.com/d52q2lj (Space Science)

ON THE AIR W4NH FOURLANDERS SEEK WSJT CONTACTS IN VHF SWEEPS

The W4NH Fourlanders group will again be operating in the January VHF Sweepstakes from January 21st to the 23rd from its location near Dahlonega, Georgia. That is in grid square EM-84-ao.

According to Jim Worsham, W4KXY, the group will operate limited multi category on 6meters through 432 MHz running a full gallon into stacked beams on all four bands.

W4KXY notes that the group is looking for skeds, especially 6 and 2 meters with those operating WSJT. If you are interested in such a scheduled contact please contact Jim Worsham by e-mail to wa4kxy (at) bellsouth (dot) net. (VHF Reflector)

**

DX

In DX, G3PHO will be on the air as 9H3C from Malta's Gozo Island between March 8th and the 15th. Activity will be on 80-10 meters and possibly 160m. Look for him to be an entry in the RGSB Commonwealth Contest. QSL via his home callsign or Logbok of the World.

JS6RRR will be operational stroke KH2 from Guam between February 10th and the 14th. Activity will be on 160 through 6 meters using CW, SSB, FM, RTTY and PSK31. QSL via JS6RRR.

IK2GZU will be in Tanzania to do some work at a new hospital and orphanage between March 4th and April 4th. He plans to be active during his spare time as 5H3MB on the HF bands. QSL via IK2GZU, direct or by the Bureau. Also, via Logbook of the World, but only after his return home.

IK2QPR will be active stroke PJ7 from Sint Maarten through January 16th. This operation will be holiday style on the H-F bands. QSL via IK2QPR.

IW2CXJ will be active portable YS3 from El Salvador through January 24th. His operation will also be holiday style on 40-10 meters using a Cushcraft R7 vertical and 100 watts. QSL via LoTW, eQSL or direct to IW2CXJ.

Lastly, OE3GEA will take to the airwaves stroke 6Y5 from Jamaica between February 2nd and the 12th. This will be yet another holiday style operation, mainly using CW. QSL to his home address.

And for those not familiar with the term holiday style, it basically means that the ham in question is on vacation and will get on the air anytime that he or she feels like operating, if at all.

(Above from various DX news sources)

THAT FINAL ITEM: CELEBRATING THE LIFE OF COUNTRY MUSIC LEGEND JOHNNY CASH

And finally this week, ham radio will help commemorate the life of a country music legend. Tim Goodrich, N5ASH, better known to radio listeners as Skeeter Nash, joins us with the details:

--

Members of my club, the Northeast Arkansas Radio Club will be sponsoring the first ever Johnny Cash Birthday Celebration Special Event Station. This, on what would have been the late Country Music Hall of Fame and Rock and Roll Hall of Fame members 80th birthday.

The Johnny Cash Birthday Celebration Special Event Station will take to the air on Sunday, February 26th using the special call sign N5C. You can listen out for it beginning at 18:00 hours UTC which is noon Central U-S time. We plan to operate for a six hour period ending around 6 p.m. Central US time. .

N5C will have stations operating SSB on the 80, 40 20 and 10 meter bands. At least one of these will be located in Dyess Colony, not far from the house where the Cash family once lived.

Johnny Cash never forgot his roots here in northeast Arkansas, and we in the amateur radio community are looking forward to having the opportunity to honor one of the most recognizable figures in music history. Those making contact with N5C will receive a commemorative certificate.

>From Jonesboro, Arkansas, Im Tim Goodrich, N5ASH, a-k-a Skeeter Nash of the Northeast Arkansas Radio Club reporting for the Amateur Radio Newsline.

--

More information on this celebration can be found at the Northeast Arkansas Radio Club website. It's located in cyberspace at nea-rc.org. The club also maintains a Facebook page at eww.facebook.com/nearadioclub (N5ASH)

Hey that's the word going around, that you're a seriously depraved pervert
socked up as a guy named Morgan/kb9rqz who enjoys licking fecal material
off other men's genitals. Sick shit dude.

Professional Photoshop does not lie motherfucking wannabe netKKKop. It is a
fact that you shit your pants and didn't have the respect or decency not to
subject others to your stench

YES IT DOES and so do you. Everybody on my facebook is laughing at you
guys for claiming that photoshop can tell if a person shit his pants
or not.

Hell, everybody HERE in auk knows that photoshop can't do that, so why
the fuck are you fuckboys lying so much and making jackasses out of
yourselves????

One quick question Emmett , all kidding aside. What was it they served at
the Daily Bread on the day, or evening before, you "allegedly" shat
yourself on that dock?

There's a good chance you're off the hook, once and for all, if the
alimentary plug-in had the wrong input pixel data.

From the manual.
"The Photoshop Alimentary canal plug-in:"

The tubular passage that extends from mouth to anus, functions in digestion
and absorption of food and elimination of residual waste, and includes the
mouth. Subject's food intake is important for CS5 x64 bit colour accuracy."

Remember these guys?

"Ohhhhh, Yeeaah Yeeaaaah! Let me... Let me smell that shit, man.
Awwwww, fuck That's a hell of a lot better turn-on than those
poppers."

Again and again, the boy sniffed the stench into his lungs. His lips
parted, his tongue crept out, curling spoon-like into the warm, fresh
softness which only minutes earlier his stud's bowels had issued to
him. Eagerly, he began to pull the brown waste into his hungry mouth.

"Please, Sir! I'm hungry. I'm starving for that funky turd.

"Oh, Stud! Give it to me! Let mehave it! Make me take it from you.
Tonight, I'm your shitlicker, turd sucker, crap-eater. Force me to go
all the way in serving you." In the back of his mind he wished this
scene could go on forever. Hs needed to be possessed by a man who
could really put him to use.

"That's it! Do your worst, Stud!"

"Jerk my yearning jaws open, stuff my hungry mouth with that beautiful
offering from your big, hairy, full shitter. "Yeah, force-feed me!
Shit fuck my crap craving mouth."

"All of it, Mister."

"Son-of-a-bitch, I want to eat all of it. Shove it on me; push it down
my throat. Use me as your filthy toilet, Sir."

"Look at me, SIR!"

"Look at your shit in my mouth. Now you know me for the kind of kid I
really am, so put me through your paces. Don't let me miss anything."

"Oh, Yesssss! Use me! Make me serve you, your buddies."

"Come-on, shit-face! Chew that fucking load up. Swallow that turd
slowly or I'll cram this huge ram of mine inside that full mouth and

pile-drive every bit of that shit straight down into your waiting belly.

"That's it, boy! Take it slow. There's a hell of a lot more where that came from, and I want to give it all to you before the night's over."

What a fucking turn-on this kid had become, laying there on the floor, chewing up the last of the giant turd, his enormous horse-like pecker clutched in his grimy hand.

From the rock hard erection he was displaying, to the look of total satisfaction across his face, it was easy to see that he was enjoying the hell out of everything that was happening to him.

Swallowing the last of the stud's load, he looked up and saw the man laid back not far from him.

Slithering across the floor, he cried out, "Let me lick your filthy hole clean, SIR. Oh, SIR! Push more shit into my mouth. MORE! MORE SHIT!!!"

"I'm so fucking hungry, hungry for your shit."

He loved groveling on the floor before this filthy asshole. He needed to be dominated, used, abused.

"MORE!" This time it was the tongue raped man making the demand. "MORE! Use your fist!"

"That's right, fucker. There's a lot more shit up this big butthole of mine, but you've gotta dive in there and get it yourself."

Knowing exactly what had to be done, the kid quickly reached out, scooping up as much of the softened shit and slimy spit as he could find, and began smearing the gooey mixture around the gaping crapper.

Forming a giant wedge, the fingers began sliding inside the man's butt as he strained to take them all the way.

"Come-on, Shit-Freak, work on that asshole," the guy cried as he felt the fist turning, twisting, pumping deep inside his shit tunnel.

It was obvious that he was really getting off on it the way he kept moaning, working his own body on it as he jerked his own fist up and down the colossal column of hard, rigid flesh which was stretching straight upward from his overgheated crotch.

"That's it, boy! Spread that big ass apart and search for your dinner."
"Yeah! Fuck the living shit out of my hole.

Hs felt the kid's fist sliding in and out of his butthole and knew that he was driving beyond the wrist, working in a big part of his forearm.

Pushing down, he tried to suck more of the arm with his eager hole.

The kid loved the way the taut asscheeks were working up and down, around his impaling fist, but he was anxious to get his whole face in there.

Hs pulled back, the asshole clutching, bulging outward like a giant pair of brown, puckered lips.

The steaming chute didn't want to let go of that plunging raper, that plowing fist. Twisting around onto his knees, the fisted guy, half-demanding, half pleading, cried out, "I want this asshole fucked wide open. Bust it with something. Get something big and shove it in there.

Spotting an enormous rubber dick laying in the corner, the kid grabbed it. "You sure you want this dildo?" he asked.

The man turned his head so that he could get a good Look at the size of it. "Hell, never in my life have I seen one as big as that, but I know that I want to have it. Yeah, I have to see what it's gonna feel like in my ass."

He started moving his ass beck and forth, grinding the huge set of lips against the head of the dildo.

"Come-on, kid! I can't wait to have you bust my ass with that thing."

"Shit, man! You got some big, fucking asshole," the kid moaned as he screwed the incredible head of that gigantic dick all the way through the extraordinary sphincter.

Squirming, thrusting, bucking with his hips, he wanted it! He wanted it all! He wanted it bad and the kid sure as hell was not going to hold back. No! He rammed the rubber dick into the man's gut with unrelenting fury, pounding the shit out of the super eager butthole.

Harder and harder, deeper and deeper, he pummeled the stud's asshole with the big, thick tool watching as his panting became very rapid as if he were suffering uncontrollable pain, but his cries were those of sheer, unabated pleasure.

"Go down on it, kid! You can take it! Hell, that grubby mouth of yours is every bit as big as my crapper. So, if I can take it, you can, too."

All the kid could think of was shit as he strained, his jaws aching, fucking the dildo in and out between his lips. The deep ramming caused him to gag. Shitty vomit rose into the back of his mouth, and he swallowed, reeating the bellyful, time and time again.

He had lost control, didn't care any longer how he was used. Any time, any place, any way, this shit fucking stud could have him, could use him, could give him away to be used by others. He had found what he needed. Now he would find a way to hold onto it.

Unconscious of what was happening, he suddenly realized that he had taken his own prick into his hand, and without moving a finger, he had bolted a. long, sticky, steamy supply of scum out of his horse-dick and across his body. Humbled but totally unashamed of all that had happened, he lay at the feet of his STUD.

What does your refusal have to do with
alt.slack,alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy, persent?

Unnecessary, persent, given that I never claimed that it did
have something to do with those newsgroup. Logically, if the
claim had been made, then it would have been unnecessary to
ask you what your posting had to do with those newsgroups,
yet in my response, I specifically asked you what your posting
had to do with those newsgroups, and I can ask the same
question of your latest posting, persent.

"Crushing the heads of the infidels and splitting their skulls with sharp swords, we continually thrust and cut at the enemy. Blood gushed from their deep wounds as the battle wore them down. We conquered bearing the Prophet's fluttering war banner. Our cavalry was submerged in rising dust, and our spears quivered, but by us the Prophet gained victory."

What a DUMBASS! No wonder you make so many mistakes. You're obviously not qualified to be the FNVR.

The rule has always been that the FNVR must post using DataBasix as his NSP. You are using altopia and you are obviously Fred Hall. Changing your gmx mail addy to a no longer valid DataBasix mail addy won't cut it. You are such a Rube that your new Kook awards are now officially invalid because you broke time-tested traditional Award administration rules.

LOL. PUTZ!

--
Sir Gregory

Better late than never, and thanks to Cujo for reminding me of this
important election.

[Official ballot - VOTES MUST APPEAR in Alt.Usenet.Kooks]

Kook of the Year

A just reward for the best Kook of the Month, the Kook of the Year award
(KotY) is elected from the list of all Kooks of the Months, of past and
present.

Nominations are *not* accepted for this award.

Here follows the one true ballot for the 2007 Usenet Kook of the Year
awards. Anybody may vote, but your votes may be disqualified, mocked,
burnt, shredded and/or recycled for use as toilet paper or filler for
Fluffy's litter box at the Vote Wrangler's discretion if:

502. THE DESCRIPTION OF THE BARRIER BETWEEN TWO SEAS !!!!!!!!!!!

Newsgroup: rec.radio.amateur.policy
Date: 2012-01-18 06:41:00 UTC
From: BV <bv5bv5bv5@yahoo.com>
Message-ID: <390ee68a-7e66-47ff-b473-6ba8e39d5267@n6g2000vbz.googlegroups.com>

THE DESCRIPTION OF THE BARRIER BETWEEN TWO SEAS

Sorry for not sending anything related to this group but it
might be something new to you
Oceanographers, in the wake of the scientific progress in this age, have discovered the barrier between two seas. They have found that a barrier separates two neighboring seas. The barrier moves between them, and it is called by scientists “a front” compared to the front between two armies. By virtue of this barrier each sea retains its own characteristics which Allah (SWT) has assigned to it and which are suitable for the organisms living in that environment.

Because of this barrier, the two neighboring seas mingle so slowly that the amount of water that passes from one sea to the other acquires the characteristics of the other sea while crossing the barrier which overturns the waters crossing from one sea to the other, keeping each sea with its own characteristics.
The gradual progress of human knowledge about the fact of the differences between seawater masses and the existence of barriers between them : Oceanographers discovered that there were certain differences between water samples taken from various seas in 1284 AH/ 1873 AD, by the British Marine Scientific Expedition of the Challenger Voyage. It was discovered that masses of sea water vary in their composition, in respect of salinity, water temperature, density and types of marine organisms. The data were obtained from 362 oceanographic stations. The report of the expedition filled 29,500 pages in 50 volumes and took 23 years to complete. One of the great achievements of scientific exploration, the expedition also showed how little man knew about the sea. After 1933 AD another American expedition set out in the Mexican Gulf and installed hundreds of sea stations to study the characteristics of seas. It found out that a large number of stations in a certain area gave similar information about the characteristics of the water in that area, whether in respect of salinity, density, temperature, marine organisms or solubility of oxygen in water, while another group of stations in another area gave a different set of data about that area. So, oceanographers concluded that there were two distinctive seas with different characteristics, and not just limited samples as the Expedition of Challenger showed. Man installed hundreds of marine stations to study the characteristics of various seas. Scientists have found out that the differences in these characteristics distinguished one sea from another. But why do these seas not mix and become homogeneous in spite of the effect of tide and ebb that moves sea water twice a day, and causes seas to move forward and backward turbulently, besides other factors that cause sea water to be in

continuous movement and turbulence, such as surface and internal waves and sea currents? The answer appeared for the first time in scientific books in 1361 AH/1942 AD. Extensive studies of marine characteristics revealed that there are water barriers separating neighboring seas and maintaining the distinctive properties of each sea with respect to density, salinity, marine life, temperature and solubility of oxygen in water.

There are large waves, strong currents, and tides in the Mediterranean Sea and the Atlantic Ocean. Mediterranean Sea water enters the Atlantic by Gibraltar. But their temperature, salinity, and densities do not change, because of the barrier that separates them. After 1962 AD there was known the role of sea barriers in modifying the properties of the water masses that pass from one sea to another, to prevent one sea from overwhelming the other. So salty seas retain their own properties and boundaries by virtue of these barriers. A field study comparing the waters of Oman Gulf and those of the Arabian Gulf has shown the difference between them regarding their chemical properties, the prevalent vegetation and the barrier separating them. About a hundred years of research and study has been required to discover the fact of the existence of barriers between sea water masses and their role in making each sea retain its own properties. Hundred of researchers took part and numerous precise scientific instruments and equipment were used to achieve that. Fourteen centuries ago the Holy Qur'an revealed this fact. Allah (SWT) says: (He has let free (MARAJA) the two sees meeting together. Between them is a barrier that they do not transgress. Then which of the Blessings of your Lord will you both (Jinn and men) deny? Out of them both come out pearls and carol." (LV: 19-22) Allah (SWT) also says: "And He made a barrier between the two seas.) (XXVII: 61) Linguistic meanings and the commentators' sayings: Maraja (let free): IbnFaris said: "'maraja': The consonants m, r and j form a root indicating a movement of going and coming and turbulence." Al-Bahrayn (the two seas): Al-Asfahani said: "Some say that the word "bahr" (sea) is usually used to mean salt water rather than fresh water." Ibn Manzursaid: "'Bahr' is more frequently used to describe salt water than fresh water." If the word "bahr" is used without qualification it means salt water; otherwise, it means the thing qualified." The Holy Qur'an uses "nahr"(river) to indicate abundant running fresh water, while it uses "bahr" (sea) to indicate salt water. Allah (SWT) says: (And He has made the ships to be of service to you that they may sail through the sea by His Command; and He has made rivers (also) to be of service to you.)(XIV: 32) In the hadith, "bahr" (sea) is also used to mean salt water. Allah's Messenger (Peace be upon him) was asked by a man who said: "O Allah's Messenger! We travel by sea and carry with us a little fresh water. If we should use it forwudu (ablution) we would get thirsty. May we use seawater for wudu? Allah' Messenger (Peace be upon him) said: "Its water is pure and its dead (animals) are lawful (to eat)."Al-Barzakh: It is the barrier. Most commentatorssuggest that it is invisible. Al-baghi: IbnManzur said: "'Al-Baghi' means

transgression, exceeding the limits.” Al-Jawhari and Al-Asfahani said the same. Al-Marjan: Ibn Al-Jawzi said: “Al-Qadi Abu Ya’li says that Al-Marjan is a kind of bar-like pearls. Al-Zajjajsaid: “Al-Marjan is white, very white.” IbnMas’ud said: “Al-Marjan is red beads.” Abu Hayyan said that to some people Al-Marjan is red stone. Al-Qurtubi said: “It is said that Al-Marjan is the big pearls. The same is also said by ‘Ali and Ibn ‘Abbas (May Allah bestow His Mercy on them both). The small pieces of Marjan are the small pearls. It is also reported on their authority the opposite: the big pieces are called pearls and the smaller are called Marjan. Al-Dahhak and Qatadah said the same.” Al-Alusi said: “If we take into consideration the connotation of brilliance and glitter which the Arabic word “pearls” carries, and the connotation of movement and mixing that the word “Marjan” carries, we can say that “pearls” is used for big pieces and“Marjan” for small ones.” Anyhow, Marjan is a kind of ornament that is found in various colors: white and red. It may be in big or small pieces. It is bar-like stone. In the Verse it is something other than pearls, for the conjunction “and” implies talking bout two different things. Marjan (carol), however, is found in salt seas only. The Verse shows us the minute secrets which oceanography has revealed only recently. They describe the meeting between salt seas. Following is the evidence to that: First: The Verse uses the word “bahrayn” (two seas) without any qualification. This means that salt seas are intended here. Second: The Verses in Surat Al-Rahman show that the two seas yield pearls and “Marjan”(carol). It has become evident that Marjan is found in salt seas only. This indicates that the Verse is referring to two salt seas. Allah (SWT) says: “Out of them both come out pearls and carol,” i.e. out of each of them. Who knew in the past that salt seas differ in many respects in spite of their apparent similarity to the observer? (They all taste salt, look blue, have waves, contain fish, etc.) How can they differ although they meet each other? We know that when two amounts of water are mixed in a container they get homogenous. How can seas remain differentiated even in the presence of the factors of mixing, such as the ebb and flow of the sea, currents and storms? The Verse mentions the meeting of two salt seas that differ from one another. If the two seas were similar to one another, they would be one sea. However, differentiating between them in the Qur’anic utterance implies the difference between them although they are both salt. (He has let free (Maraja) the two seas meeting together) means that the two seas are mixed; they are in the state of backward and forward movements, of mixing and turbulence at the site of the meeting, as is understood from the literal meaning of“Maraja”. This is the fact that science has discovered, that is to say, the barrier is described as being zigzag or wavy and shifting in position during the various seasons because of the tide and winds. This Verse by itself implies the presence of so much mixing and merging between these seas as would deprive them of their distinctive properties. But Allah (SWT), the All-Knower, shows in the following Verse that “between them is a barrier which they do not transgress”, i.e. In spite of this state of merging and turbulence that characterizes the

seas there is a barrier between them preventing them from transgressing or exceeding their limits. This is what man has discovered as a result of the advances achieved in his sciences and instruments. It has been found that a third water mass separates the two seas and it has such properties as are different from those of each of the two seas separated by it. Yet, in spite of the presence of the barrier, the waters of the two adjacent seas mix very slowly without one sea encroaching upon the other through carrying over its own properties to it, for the barrier zone is a region for changing the water crossing from one sea to the other so that it gradually acquires the properties of the sea that is going to enter and loses the properties of the sea it has come form. Thus neither of the two seas transgresses by carrying its own properties to the other, although they mix during the process of meeting. How truthful is Allah's Saying: (He has let free (maraja) the two seas meeting together. Between them is a barrier which they do not transgress.) Most commentators suggest that the barrier that separates the two seas referred to here is an invisible barrier created by Allah. Some commentators find it difficult to reconcile the idea of the seas being merging and the presence of a barrier at the same time, for the presence of a barrier entails the prevention of merging. So the mention of merging (maraja) entails the absence of a barrier. This apparent contradiction has been resolved by discovering the secrets of the seas. The Miraculous Aspects of the Previous Verses: We can conclude the following from the discussion above: The Holy Qur'an, which was revealed more than 14 centuries ago, includes very precise pieces of information and knowledge about marine phenomena that have been discovered only recently by means of very sophisticated equipment. An instance in this respect is the existence of water barriers between seas. Allah (SWT) says:(He has let free (maraja) the two seas meeting together. Between them is a barrier which they do not transgress.) The historical development of Oceanography shows that no precise information had been available on seas before Challenger Expedition (in 1873 AD), let alone at the time when the Holy Qur'an was being revealed 14 centuries ago to an illiterate Prophet that lived in a desert environment and never traveled by sea. Oceanography has witnessed no advances except in the last two centuries, particularly in the latter half of the twentieth century. Prior to that a sea was considered as something fearful and mysterious. Myths and superstitions were fabricated about it. Sea voyagers were only interested in their own safety and how to find the correct routes during their long journeys. Man discovered that salt seas are different only in the thirties of the twentieth century, after thousands of marine stations had been established by researchers to analyze samples of sea water to measure the differences between the degrees of temperature, salinity, density and oxygen dissolubility in the sea water recorded at all those stations, and then realize that salt seas are different. Man did not know anything about the barrier that separates between salt seas till the establishment of the aforesaid stations, and after spending a long time tracing these wavy

moving barriers that change their geographical locations with the change of seasons. Man did not know that the water masses of the two seas are separated by a water barrier and are mixed at the same time till he started studying with his ships and equipment the water movement in the meeting region of the seas and analyzing the water masses in those regions. Man did not apply this rule to all seas that meet together except after vast scientific surveying, investigation and verification of this phenomenon, which occurs between each pair of adjacent seas in the world. Now then, did Allah's Messenger (Peace be upon him) own stations and equipment for analyzing water and the ability to trace the movement of various water masses? Did he carry out a comprehensive surveying process, although he never sailed the sea and lived at a time when superstitions were prevalent, particularly in the field of seas? Were, at the time of Allah's Messenger (Peace be upon him) such researches, instruments and studies as are available for the oceanographers of today who have discovered all these secrets by means of research and study? This knowledge, which the Qur'an came with, included a precise de******ion of the subtlest secrets at a time when humanity could never have known them, which indicates that its source is Divine, as Allah (SWT) says: (Say: "the (Qur'an) was sent down by Him Who knows the secret (that is) in the heavens and the earth: Verily He is Oft-Forgiving, Most Merciful.) (XXV: 6) It also indicates that the one to whom the Book was sent down was a Messenger inspired. Allah (SWT) but says the Truth in the Verse: (Soon will We show Our Signs in the Universe and in their own selves, until it becomes manifest to them that this the Truth. Is it not sufficient that your Lord does witness all things?) to morehttp://rapidshare.com/files/18405467…5___1586_.html

This photograph of Emmett Gulley, which I currently own all rights to, is
imo, the *ugliest* individual on Usenet...no, wait, on the entire planet.

Prepare for the most shockingly stoOpid looking petty-criminal ever.
Emmett "Teh PoopKook" Gulley.

http://bayimg.com/jAMaEaAdA

Look at the far away determination in Emmett's crooked eye - CLEARLY
the look of the Pissbum shitting himself in this very photo.

Kiddie rapist k9bqrz, aka "Pseudomark" must be salivating!
Skidmark Gulley poops, Pseudomark Morgan slurps -
THE perfect ecological match.

Back in December, i nominated Ray Karczewski for Looney Maroon.
Did it get missed, or do are we starting over with nominations?

Nomination:

Sadly, we must start over. It is considered impolite in The Cabal
Breakroom (tincb) to trod upon another FNVW's ballot, no matter that
the ballot was never posted.

I take it you wish to renominate Kazoo for Looney Maroon. If that is
the case, I will consider your post as a nomination. Or renomination
as the case may be.

If Cujo still wishes to second, I will accept that second.

Nomination and second accepted and recorded.

Looks like Emmett will have some competition after all.

Thanks.

It will mean more to Emmett to win a contested election.

*Pseudomark* Morgan [aka kb9qrz] has a lot on his mind with all his recent
AUK nominations for Busted Urinal and the Anal Pineapple awards was it?

Excuse his confrontational attitude -- you know how these kOoks tend to get.

ELECTRONIC BALLOTING FOR DIVISION ELECTIONS

The ARRL Board of Directors held its 2012 Annual Meeting January
13-14, 2012 in Windsor, Connecticut, under the chairmanship of
President Kay Craigie, N3KN. Newly elected Delta Division Director
David Norris, K5UZ, attended his first Board meeting as Director. In
addition, two recently elected Vice Directors -- Glen Clayton, W4BDB,
Delta Division, and Dale Williams, WA8EFK, Great Lakes Division --
attended their first Board meeting.

After viewing a demonstration of electronic balloting, the Board
adopted amendments to the ARRL Bylaws that will permit the
implementation of electronic voting in the 2012 fall elections for
Director and Vice Director of the Central, Hudson, New England,
Northwestern and Roanoke Divisions. Plans call for paper ballots still
to be mailed to those members who have not shared their e-mail
addresses with the ARRL, or who simply prefer to cast their votes by
```

mail. Supervision of the balloting is the responsibility of the Ethics and Elections Committee. Read more here <http://www.arrl.org/news/arrl-board-of-directors-holds-2012-annual-meeting-okays-electronic-balloting-for-division-elections>.

==> + ARRL BESTOWS AWARDS AT 2012 ANNUAL MEETING

The ARRL Board of Directors had the pleasure and distinction of bestowing three annual awards on six recipients at its 2012 Annual Meeting: The George Hart Distinguished Service Award, the Bill Leonard, W2SKE, Professional Media Award for print, audio and video, and the ARRL International Humanitarian Award. Read more here <http://www.arrl.org/news/arrl-bestows-awards-at-2012-annual-meeting>.

==> + ARRL BOARD WELCOMES RICK NISWANDER, K7GM, AS NEW TREASURER

When ARRL Treasurer Jim McCobb, K1LU, announced last year that he would retire after more than three decades of volunteer service to the ARRL, ARRL President Kay Craigie, N3KN, appointed a search committee to find a suitable replacement. The committee received many resumes from League members, and after interviewing several applicants, selected Rick Niswander, K7GM, of Greenville, North Carolina. At the 2012 ARRL Annual Meeting, Niswander was elected by the Board of Directors as the sixth Treasurer of the ARRL.

Niswander -- an ARRL Life Member -- has been the Vice Chancellor for Administration and Finance for East Carolina University since 2010, where he is the senior executive responsible for all financial, administrative, and operational activities at the university. Prior to that appointment, he served as ECU's Assistant Dean for Graduate Programs and Dean of its College of Business. He is also a Professor of Accounting at the university. Niswander is also the Executive Treasurer for the ECU Foundation, the ECU Medical Foundation, the ECU Alumni Association and the Pirate Club (the ECU athletic booster club). A Certified Public Accountant since 1981, he holds a BBA in Accounting from Idaho State University and a PhD in Accounting from Texas A&M University. Read more here <http://www.arrl.org/news/arrl-board-welcomes-rick-niswander-k7gm-as-new-treasurer>.

==> + A REMINDER: POSTAGE RATES TO RISE THIS MONTH

Beginning Sunday, January 22, it will cost more to mail first class letters, postcards and packages within the US. The cost to mail a first class letter will be 45 cents, an increase of 1 cent. According to the USPS, this is the first increase since May 2009. The cost of mailing a postcard will be 32 cents, an increase of 3 cents. This is the second increase for postcard postage in less than a year; in April 2011, the USPS boosted the postcard stamp price from 28 cents to 29 cents. You will also pay more to send letters to Canada, Mexico and other international destinations. Click here <http://about.usps.com/news/national-releases/2011/pr11_factsht_pricechng_101

8.pdf>
for more information on all the postal increases.

==> + ARMY MARS RESUMES USE OF WINLINK 2000

According to Government Liaison for Army MARS
<http://www.netcom.army.mil/mars/> Pudge Forrester, AAA9GL, Lieutenant
General Susan Lawrence has reversed the decision to phase out the use
of the Winlink 2000 <http://www.winlink.org/> global radio e-mail
system by Army MARS members. General Lawrence stated that the Army --
after reviewing its capabilities -- had decided that the continued use
of Winlink 2000 was a valuable asset to Army MARS members and to the
agencies that were using the service. She issued a statement to that
effect on December 21, 2011. On January 5, 2012, the Chief of Army MARS
officially notified his membership that the phase out notice had been
rescinded. Army MARS members and agencies who had been using the
service hailed the decision by General Lawrence and resumed use of
Winlink 2000.

==> + US DISTRICT COURT FOR MAINE ISSUES ORDER GRANTING SUMMARY
JUDGMENT AGAINST GLENN BAXTER, K1MAN

On January 10, the US District Court for Maine issued a ruling in
the FCC's lawsuit to collect monetary forfeitures issued to Glenn
Baxter, K1MAN, of Belgrade Lakes, Maine. The FCC had assessed
forfeitures in the amount of $21,000 against Baxter
<http://www.arrl.org/news/us-charges-k1man-with-failure-to-pay-fine> on
three asserted violations of the Communications Act of 1934 and its
regulations: Failure to respond to an FCC inquiry in violation of Title
47, Section 308 of the US Code
<http://www.law.cornell.edu/uscode/html/uscode47/usc_sec_47_00000308----000-.
html>,
willful or malicious interference with other radio transmissions in
violation of Section 97.101(d)
<http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&sid=47ae9117aa64a743f2b
dfb3db7c32da6&rgn=div8&view=text&node=47:5.0.1.1.6.2.157.1&idno=47>,
and engaging in communications in which he has a pecuniary interest in
violation of Section 97.113(a)(3)
<http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&sid=47ae9117aa64a743f2b
dfb3db7c32da6&rgn=div8&view=text&node=47:5.0.1.1.6.2.157.7&idno=47>.

Chief US District Judge John A. Woodcock Jr, in writing for the Court,
agreed with the FCC on the first two counts -- willful or repeated
failure to respond to FCC requests for information, and willful or
malicious interference -- and granted summary judgments to the FCC in
the amount of $3000 and $7000, respectively. On the third claim --
communications in which an amateur station licensee or control operator
has a pecuniary interest -- the Court declined to grant a summary
judgment to the FCC, holding that there were issues of material fact to
be litigated in the Court in later proceedings. Find a link to the
complete decision here
<http://www.arrl.org/news/us-district-court-for-maine-confirms-summary-judgme

nt-against-glenn-baxter-k1man>.

==> SOLAR UPDATE

Tad "Fooling me like the Sun in the winter
<http://www.youtube.com/watch?v=4HVdT3D820Y>" Cook, K7RA, reports: New sunspot groups appeared on every day over the past week. On January 12, new sunspot group 1396 appeared, and the next day two more -- 1397 and 1398 -- popped into view. On January 14, four new sunspot groups appeared: 1399, 1400, 1401 and 1402. January 15 saw group 1391 vanish and new group 1403 emerge. Two more appeared January 16 -- 1404 and 1405 -- while 1397 vanished. On January 17, 1406 appeared and 1395 disappeared, while 1407 emerged on January 18. The average daily sunspot numbers rose this week, from 90.6 to 116.9, while the solar flux stayed about the same, changing from 134.9 to 133.4. The latest predictions have a solar flux of 150 on January 19-20, 155 on January 21-22, 160 on January 23-25, 155 on January 26, 140 on January 27-29, and 135 on January 30-February 6; we are still looking for a solar flux peak of 165 on February 17-21. The predicted flux values of 160 on January 23-25 are markedly higher than the 145 predicted last week for the same dates. The predicted planetary A index is 6, 8, 5, 8 and 12 on January 19-23, and 5 on January 24 through the end of the month. Look for more information on the ARRL website on Friday, January 20. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Max Graham's Sun in Winter
<http://en.wikipedia.org/wiki/Max_Graham>.

==> THIS WEEK IN RADIOSPORT

This week:

- January 20 -- NCCC Sprint Ladder
- January 21 -- Feld Hell Sprint; LZ Open Contest
- January 21-22 -- North American QSO Party (SSB); Hungarian DX Contest; YL-ISSB QSO Party (SSB)
- January 21-23 -- ARRL January VHF Sweepstakes
<http://www.arrl.org/january-vhf-sweepstakes>
- January 25 -- SKCC Sprint
- January 25-26 -- CWops Mini-CWT Test

Next week:

- January 27 -- NAQCC Straight Key/Bug Sprint; NCCC Sprint Ladder
- January 27-29 -- CQ 160 Meter Contest (CW)
- January 28-29 -- BARTG RTTY Sprint; REF Contest (CW); UBA DX Contest (SSB); SPAR Winter Field Day
- January 28 -- WAB 1.8 MHz Phone Contest
- January 29 -- QRP ARCI Fireside SSB Sprint
- January 29-30 -- Classic Exchange (CW)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 27-28 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfest-1>, Jackson, Mississippi
- February 4 -- ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>, Richmond, Virginia; ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-1>, Ladson, South Carolina
- February 10-12 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>, Orlando, Florida
- February 17-18 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>, Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>, South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention <http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest>, Del Rey Oaks, California; ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-2>, Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>, Birmingham, Alabama

Correction:

It was the Gweggiieeeeeeeeee-Crappantz Axis Alliance:

"However I also nominate the Gweggiieeee-Crappantz Axis Alliance for the Ministry of Circle Jerks."

I took the above excerpt of the poast from my sent folder so no message ID. It doesn't make sense to have only Crappantz for the MoCJ. Right?

It *could* happen to be Crappantz and his voices or turds but not this time.

RADIO LAW: QRZ.COM JOINS THE FIGHT TO STOP SOPA AND PIPA

The giant QRZ.com ham radio website has joined the fight to stop
passage of SOPA, the Stop Online Piracy Act, and PIPA, a similar bill
working its way through the U-S Senate. Amateur Radio Newsline's Robert
Sudock, WB6FDF, reports on why QRZ.com and its owner Fred Lloyd, AA7BQ
is taking this hard-line stand.

--

Why should ham radio care about these two bills? According to
publisher Fred Lloyd, AA7BQ, the measures are sponsored by Hollywood
entertainment corporations and the recording industry. They threaten to
destroy the internet as we know it. And in his front page posting on
the QRZ.com, he lists what he terms "the facts about the bills."

According to AA7BQ, websites will be required to police their own
content for copyright violations of all kinds. Any website found in
violation of the intellectual property of another party must be shut
down -- it's internet access blocked by its Internet Service Provider,
DNS de-listing, and all banking transactions via online payment
providers would be stopped.

Lloyd notes that there is no burden of proof required to shut down a
website. Any claim of copyright infringement could result in a court
ordered shutdown.

Website owners will be responsible for policing content uploaded by
their users. A violation could be ridiculously minor to qualify such as
uploading a trademarked image, a photo of a celebrity, a clipping from
a newspaper, an audio clip from movie, or the like. Also, uploading a
copyrighted song or video would become a felony under the US Code.

And it is not just domestic websites that would be impacted. The law would apply to foreign websites as well, requiring United States based Internet Service Providers to block access to those sites.

Lloyd then notes that this law could also kill his site, QRZ.com, as users know it. He notes that the site currently has some 300,000 photographs on its server, all of which would have to be taken down and manually verified to be in compliance. The same thing would hold true for each biography page where a photograph or other image exists.

Lloyd says that in his case, there's no way he could do it. If burdened with this sort of responsibility, QRZ would simply be found in violation and forcibly shut down by the federal government, all in an to protest both bills many websites went dark on Wednesday, January 18 effort to please what he terms as Hollywood and the music industries.

To protest both bills, many websites went dark on Wednesday, January 18. The Amateur Radio Newsline provides a short video insert in the TWiT network's Ham Nation podcast each Tuesday evening. That network did not go dark, but devoted its live programming to the SOPA and PIPA topics. As we go to air the programs should be rendered and posted for download in both audio and video formats. Go to www.twit.tv and look for "Security Now," "This Week in Google," "Tech News Today," and "Triangulation" for a more detailed and web centric discussion.

For the Amateur Radio Newsline, I'm Robert Sudock, WB6FDF, in Los Angeles.

--

AA7BQ ends his posting by asking those who use his website to contact their Congressmen and Senators to voice your opposition to both of these measures, especially SOPA. He says that it's not just QRZ.com that depends on their action. Rather he says, it's the entire internet as they know it today. (QRZ.com, TWIT.tv, ARNewsline(tm))

RESCUE RADIO: ARMY MARS RESUMES USE OF WINLINK 2000

The Army's Military Auxiliary Radio System better known simply as Army MARS is back using WinLink 2000. The ARRL reports that Lieutenant General Susan Lawrence has reversed the decision to phase out the use of the global radio e-mail system by Army MARS members that was issued late last year.

Lieutenant General Lawrence stated that the Army, after reviewing its capabilities, had decided that the continued use of WinLink 2000 would be in MARS best interest. She went on to call it a valuable asset to Army MARS members and agencies that were using the service.

On January 5, 2012, the Chief of Army MARS officially notified the membership that the phase out notice had been rescinded. Army MARS members and agencies who had been using the service hailed the decision by Lieutenant General Lawrence and have resumed use of the WinLink 2000

radio e-mail system.

More about WinLink 2000 is on the web at www.winlink.org. (ARRL)

**

RADIO GROWTH: DXCC SEES AN INCREASE IN APPLICATIONS

Interest in DX is growing. So says the ARRL as we hear from Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has more:

--

The ARRL reports that it appears as if more amateurs are working DX these days. This in turn means the ARRL's Membership and Volunteer Programs Department, especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus, are working very hard in processing applications and sending out cards via the different QSL Bureaus.

In 2010, the DXCC Desk processed 7134 applications for initial awards and endorsements. These 2010 applications included 853,462 QSOs. In 2011, the DXCC Desk processed 11,175 applications, representing 1,250,864 QSOs.

Sharon Taratula is the Membership and Volunteer Programs Administrative Manager. She explained that comparing 2010 to 2011 represents a 47 percent increase in the number of QSO's and a 57 percent increase in the number of applications received.

And that's quite an impressive increase in any area of ham radio.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, near Pittsburg, Pennsylvania.

--

To learn more about this increase in DX, go to tinyurl.com/dxcc-numbers on the world wide web. And we will have more DX related news later on in this weeks Amateur Radio Newsline report. (ARRL)

**

BREAKING DX NEWS: VP6T PITARICAN OPERATION SAYS NO 6 METERS

The VP6T DXpedition to Pitcarin Island will not be on 6 meters nor any exotic modes such as EME or SSTV. Nor will it likely even show up on 60 meters.

The operation which begins on January 20th and continues through February 4th has issued a press statement explaining its decision to concentrate its operations on the traditional and popular High Frequency bands.

According to the team they are a small group and are limited in baggage weight and size. As such they were forced to make choices. And while most of the team are 6 meter operators, they reached a decision not to

spend much their time and effort on this band.

For these reasons no 6 meter antenna will be taken with them and no time slot is booked for 6 meter operation. For more details, updates along the suggested frequencies for the VP6T DXpedition please visit the operations website at www.vp6t.org. (Southgate)

HAM RADIO IN SPACE: STUDENT HAM RADIO D-STAR SATELLITE TO LAUNCH LATER THIS YEAR

D-Star should be in space before the end of 2012. Students at the University of Liege in Belgium are hoping their D-Star based ham radio satellite OUFTI-1 will be launched towards the end of this year if at all possible.

Plans originally called for it to be carried to orbit on the maiden flight of the European Space Agency's Vega launch vehicle. That now appears to be out of the question. However team leaders say that other opportunities have been identified and discussions are ongoing with at least one launch provider.

If and when OUFTI-1 makes it to orbit it could mean a lot of those on the fence about purchasing D-Star based gear might just tape the plunge. This in turn would likely result in a major world-wide sales boost for Icom which to date is the only supplier of D-Star based ham radio gear.

An update on the satellite and plans to get it into space have been published in the January 2012 issue of the OUFTI-1 Newsletter. That issue focuses on the current status and near-future of D-Star based bird. You can read it on-line at tinyurl.com/oufti-1-2012. (Various sources)

RADIO LAW: JUDGE ISSUES SUMMARY JUDGMENT IN K1MAN FORFEITURE CASE

It's two for the government and one for Glenn Baxter, K1MAN, in the case involving a fine issued to the Maine radio amateur by the FCC several years ago.

In a 38 page ruling issued January 10th, U.S. District Judge John Woodcock Jr., chief of Maine's federal court, upheld two of the three

judgments the FCC sought against Glenn Baxter, K1MAN, of Belgrade Lakes, Maine.

The judge upheld forfeitures totaling $10,000 for violations of the Communications Act of 1934. The two violations were willful or repeated failure to respond to FCC requests for information and conducting willful or malicious interference with other radio transmissions.

Judge Woodcock, however, denied the FCC's request for judgment on a count of engaging in communications in which there is a pecuniary or monetary interest. Specifically, the judge questioned whether Baxter's promotion of his website during his transmissions rose to the level of a violation of FCC rules even though the FCC argued that the website sells merchandise.

The judge extensively cites Baxter's responses to the FCC, including referring to Baxter's personal attacks against a government attorney, and FCC personnel, including retired FCC Special Counsel Riley Hollingsworth, K4ZDH.

Woodcock conceded in his opinion such attacks by Baxter made it difficult to separate policy and factual disputes. However, the judge concluded that Baxter could not "avoid summary judgment by attempting to manufacture a factual dispute."

At one point, Judge Woodcock asserts: "Clearly, Mr. Baxter is bristling with irritation with the government."

Citing Baxter's arguments and demands for a trial on the ongoing matters, Judge Woodcock ruled that there must be a triable issue. He then ruled that the government had only proven its case for a summary judgment in two of the three matters before him.

But it's probably not over. Baxter is more than likely to file a further appeal on the two matters that Judge Woodcock found for the government. It's also believed that the government will proceed to take the third issue to trial before a judge and jury. (From Actual Court Transcript)

RADIO AND EDUCATION: THE FOUNDATION FOR AMATEUR RADIO SCHOLARSHIPS

The Foundation for Amateur Radio has announced that it will be administering fifty scholarships for the 2012 to 2013 academic year. This, to assist licensed Radio Amateurs in the pursuit of higher education. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Foundation for Amateur Radio fully funds two scholarships. The remainder are administered by the foundation, without cost to the various donors.

Only licensed Radio Amateurs may compete for these awards. To qualify, a ham must be planning to pursue a full time course of studies beyond high school and be enrolled, or have been accepted for enrollment, at an accredited university, college or technical school.

The awards range from $300 to $5,000 with preference given in some cases to residents of specified geographical areas or the pursuit of certain study programs. Non-US residents are eligible to apply for some of the scholarships.

Additional information and an application form may be requested by letter or QSL card to FAR Scholarships, Post Office Box 911,Columbia, Maryland, 21044-0911.

For the Amateur Radio Nrewsline, Im Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Scholarship applications are also available for download at The Foundation for Amateur radio website. Its in cyberspace at wwr.farweb.org. (FAR)

THE SOCIAL SCENE: WINTERFEST 2012 IN ANNADALE VIRGINIA

Turning to the ham radio social scene, the 36th Annual Winterfest is slated for Sunday, February 26th . This, at the Northern Virginia Community College, Annandale Campus, in the city of Annandale, Virginia.

Tailgating starts at 6 am EST with the indoor sales area opening to the public at 8 am. The large, heated indoor area accommodates more than 100 tables operated by commercial vendors, clubs, ham radio organizations and individuals.

This event is sponsored by the Vienna Wireless Society which will also hold a ham radio testing session associated with the hamfest on Saturday, February 25th. More information is on the web at www.viennawireless.org/winterfest.php. (AI4SV)

**

THE SOCIAL SCENE: PALM SPRINGS CA. HAMFEST JANUARY 28

The annual Palm Springs Hamfest takes place on January 28th from 9 am to 5 pm Pacific Standard Time at 4193 Matthew Drive in Palm Springs, California. Hosted by the Desert RATS Club the show will feature 35 vendors, hands on equipment demonstrations, a swap meet and much more. Talk-in on is on the local 166.940 repeater that requires a 107.2 hertz sub-audible access tone. More information is on-line at desertrats.am. (VE7REZ)

**

HAM HAPPENINGS: TIME TO REGISTER FOR INTERNATIONAL MUSEUMS WEEKEND

The International Museums Weekend special event will this year take place on the double weekends of June 16th and the 17th and again on the 23rd and the 24th. Hams world-wide are being encouraged to participate by setting up stations in their local museums.

The events organizer is M1BYT. He asks that all those intending to take part to register their museum via the from on the International Museums Weekend website at www.ukradioamateur.co,uk/imw. M1BYT can also be contacted via e-mail to harry (dot) m1byt (at) tiscali (dot) co (dot) uk. (M1BYT)

SCIENCE AND TECHNOLOGY: 2012 TO BE A LEAP SECOND YEAR

Look for 2012 to be a tiny bit longer than years past. This is because 2012 will be a bit longer than 2011 or 2010. Confused? Bruce Tennant, K6PZW, is here to sort it all out:

--

The International Earth Rotation and Reference Systems Service has decided to add a leap second to Coordinated Universal Time at the end of June 2012.

The most recent leap was added on December 31, 2008. They have been necessary because of the Earth's unpredictable rotation.

Coordinated Universal Time, better known as UTC is based on highly accurate atomic clocks, but has been kept more or less synchronized with mean solar time by way of leap seconds.

Leap seconds were first introduced in 1972 but may not be with us much longer. Now however, a proposed revision of Standard-Frequency and Time Signal Emissions will be voted by the International Telecommunication Union Radiocommunication Assembly meeting, immediately before this years World Radiocommunication Conference. If the international panel agrees, Leap Seconds will be eliminated by 2018.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, leaping along in Los Angeles.

--

Meantime with this being a so called leap year, February will have a total of 29 days instead of the usual 28, to make up for our rotation around the Sun. So adjust your computer logging software accordingly. (VK3PC)

**

RADIO IN SPACE: DEDICATED CUBESAT SPECTRUM FOR RESEARCH PROJECTS

SmallSat, CubeSat, and Nano Satellite developers are seeking a spectrum allocation, outside of the 435 to 437 MHz amateur satellite band that could be dedicated to their specific bandwidth, data rate, and mission requirements.

In a press release ISIS notes that experimental, proof-of-concept demonstration missions find it increasingly more difficult to find spectrum on today's crowded bands. Also, obtaining commercial or research space frequency allocations is beyond the budgetary capability of many of these missions.

ISIS says that some satellite developers may be able to adapt their communication requirements to operate in the amateur radio spectrum. But in order to fully meet mission requirements on other projects a more suitable spectrum is quickly becoming a potential long term need for the emerging nano-satellite market.

ISIS says they plan to attend the World Radio Conference, WRC, this month as part of the Dutch national delegation. This is to make use of the opportunity to informally sound out the various opinions on this matter and investigate potential possibilities for creating a future solution ensuring the spectral needs of the community are met. (ANS)

THAT FINAL ITEM: NORMAN KRIM - CHAMPION OF THE TRANSISTOR -SK

And finally this week we pay homage Norman Krim, an electronics visionary who played a pivotal role in the industry's transition from vacuum tube to solid state electronics. Amateur Radio Newsline's Jeff Clark, N8TMW, takes a look back at the man who put solid state devices in the hands of experimenters, and ham radio operators world wide:

--

In a long career with the Raytheon Company Norman Krim made several important breakthroughs in popularizing the transistor to experimenters. He also had an early hand in the growth of the RadioShack chain,

Norman Krim did not invent the transistor. That was the work of a scientific team at Bell Laboratories back in 1947. Rather Krim saw the device's potential and persuaded Raytheon to begin manufacturing it on a mass scale, particularly for use in miniaturized hearing aids that he had designed. As a result, thousands of hearing impaired benefited from Krim's initial use of the transistor in compact hearing aids.

But not every transistor Raytheon made was suitable for that purpose and this is where Norman Krim's foresight took hold.

Harry Goldstein is an editor at IEEE Spectrum, the magazine of the Institute of Electrical and Electronics Engineers. He said that when transistors were first being manufactured by Raytheon on a commercial scale, there was a batch called CK722's that were too noisy for use in hearing aids. So Krim contacted editors at magazines like Popular Science and Radio Electronics and began marketing the CK722's to hobbyists. The result was that a whole generation of kid engineers, many likely young ham radio operators working in their garages and basements got to construct all kinds of electronic projects. Among these were early transistor radios, guitar amplifiers, code oscillators, Geiger counters and metal detectors.

Goldstein says that as a result, a lot of them went on to become engineers. And as a result, Norman Krim became known as the father of the CK722.

After leaving Raytheon, Norman Krim bought two electronics stores in Boston called RadioShack. By the time he sold the business to the Tandy Corporation two years later, it had seven stores. Today the chain has about 7,300.

For the Amateur Radio Newsline, Im Jeff Clark, K8JAC.

--

News reports say that Norman Krimm passed away of congestive heart failure last December 14th in a retirement home in Newton, Massachusetts, at age 98. As far as we can determine, he was not a radio amateur. That said, the impact he had on our hobby was and is truly immeasurable. (RW and other published reports)

You AUK asshats have way too much time on your hands, no one besides your
circle-jerk of friends gives a flying fuck about teh lameass awards, but if

you insist, go ahead and give me teh blue ribbon.

I win again!

I've been on Facebook a _lot_, and just lately, back into RuneScape.
At any given time, now, I may be gaming, on Fb, or lurking/posting
here. Mind you, I dunno if I'm "back," yet, since I let my NSP
subscription die last month, and I also dunno if I really want to re-
configure another newsreader, since I installed Linux on this laptop
several times, since the last time I d/l'ed messages.

Kazoo has won plenty of awards. Next time around we won't have
Emmy to kick around any more, so go ahead and vote for him. The
Crappanz sweep will be even more resounding having defeated his
fellow ILK.

So naturally you use a gmail.com alias, persent. What does such
contradictory information have to do with alt.fucknozzles,
alt.usenet.kooks,alt.slack,rec.radio.amateur.policy,
comp.os.os2.advocacy, persent?

276> i really don't have anything but usenet ,

Out of the thousands of newsgroups available to you, persent, why
pick on alt.fucknozzles,alt.usenet.kooks,alt.slack,
rec.radio.amateur.policy,comp.os.os2.advocacy to
represent your only something?

276> i deleted most of my operating system ,
276> except for what i need to be in usenet

What does your classic pontification have to do with
alt.fucknozzles,alt.usenet.kooks,alt.slack,
rec.radio.amateur.policy,comp.os.os2.advocacy, persent?

What does your irrelevant question have to do with alt.fucknozzles,
alt.usenet.kooks, alt.slack, rec.radio.amateur.policy,
comp.os.os2.advocacy, Tholenator?

> 276> i really don't have anything but usenet ,

He's a k00ky little wannabe t0rll, who''ll never make it to the big
time, and it's as much as he can do to defeat your f'up games, if not
*more than*, Tholenator.

> 276> i deleted most of my operating system ,

No more than your x-poasting of these robotic digests to all five
groups does, Tholenator.

Snarky
```

Honestly, I can't believe how thoroughly I own your brain -- only Mark
himself can claim it more than I. Not that either of us particularly
want it, but it is, after all, a gift, much like fruitcake.

Snarky

You are so screwed up, when it comes to US Radio Law, you wouldn't know
the REAL FACTS, if they bit you in the Arse....

First Off: What Cops, are saying WHAT, about which Frequencies?
Be VERY specific....
Second Off: It would be VERY hard to a local prosecutor to try
such a case, even in a local Court, KNOWING that
it would likely be overturned in the first Federal
Court where the case landed.
Third Off: Local Cops, and even State Cops, do not have jurisdiction
in the enforcement of FEDERAL Laws, and should they try,
the local Federal Marshal would slap them down in a
nanosecond. That is HIS Job.
Fourth Off: Cops can, and do, say a lot of stuff, about which they have
NO CLUE, just like YOU do. Just because some local IDIOT
LEO says something, does NOT make it True, or in fact
Legally, the LAW. I have testified in MANY Courts of Law
on just these kinds of issues, and mostly the local LEO
has it WRONG, and the IDIOT Prosecutor, gets his hands
slapped by the local Judge, once the correct FEDERAL
Statutes, are introduced into Evidence, if it ever
actually gets that far, in the first place.....
I mean REALLY... Duh....

Just Say'en..... YMMV.....

Really? Hmmmm..."funny" to a point I'd say. I was the subject of a
nicely done bullet wound to my head fotoshop. I guess to *some* people
thats funny. Oddly, I didn't take it that way :)

first off, radioguy is a frickin ignorant asswipe,
second off, local cops enforce federal law every day of the year.

e.g., a convicted felon is found with a gun. that's a federal law.
when sworn in they take oaths to "uphold the laws of the United States and
the US Constitution....".

US marshalls rarely deal with cops who enforce the law.

Read the constitution. You will find that sheriffs are the law.
It's only when you have assholes like Eric Holder running the country do
you hear them whining about local cops enforcing federal law.

Jack Wants to Feed
...a true story

by Jack

. . . take your time reading this, you shit eaters are gonna like it. This is a true story from Amsterdam. I am Jack, a BIG hairy white muscled guy, 27, 1,98 m (6'6''), 110 kg. (243 lb.), dark hair, crew cut (almost zero crop). I play football and I do heavy fitness workouts 4 days a week. I know I'm hot, gay guys are always staring at me and especially at my ass and my big bulge. I am straight but I like pissing and shitting in somebody's mouth, and because unfortunately my girlfriend is not into all my extreme sex desires, I am looking for gay bottoms because only they wanna go as far as I wanna go. At least I hope they'll go that far . . . because you can experience your wildest sex adventures that you won't be able to share with anyone else, because I am really UNLIMITED. So, glad I found this website!

After years of very nasty dreams, I finally want to make them come true . . . This is what I want: Every Friday night after my fitness workout, I don't take a shower, but I come to your place. I lay down and relax in a comfortable chair and watch television. You show me you know your queer place by kneeling in front of me. You take off my big sneakers and my shorts and while I slowly begin to jock my big fat uncut 9'' cock, you place your little queer nose on my hot wet and stinking white athletic socks and you begin by taking deep and long breaths through the wet, sweat soaked fabric. You take a long time by deeply sniffing all my stinking workout sweat and when I decide you're done with inhaling all the stench, then you take off my socks slowly and gently and you lick and suck my big moist and sweaty feet clean (size 47; 12 US !). I want you to pay extra attention to my big fat toes; I want you to suck hard on them like they're fucking cockheads. My feet must be tongue bathed and soaked all over with your faggot drool. I also want to stick both my thick long toes in your mouth and stretch your lips apart wide open to prepare you for my thick monstrous cock

Then you lick both of my massive hairy football player legs, very slowly all the way up, by paying extra attention to my thick hairy ankles and my muscled beefy calves, and also to the muscles of my monstrous hairy upper legs. You give me a long and thorough muscle massage with your tongue. And then you lick and suck my big heavy hairy balls. Everything must be wet and shiny, it must drip with all your queer drool and I wanna god damn HEAR you sniffing and slurping like crazy! You go on with tongue bathing my feet, legs and balls for as long as I want, you only stop when I say so.

Then I spread my big hairy buns by holding my massive legs wide with my hands and then you start licking my wide hairy stinking sweaty asshole, and tongue and suck it out long and deep. Now and then I take big stinking farts to trigger your appetite; I warn you with a slight grunt just before a huge fart is coming out and you immediately stick your little queer nose in my asshole and you inhale my farts deep. You have to know; at the fitness club I'm famous for my big loud stinking farts! When you miss a fart, I'll hit you hard with my foot sole or my heal against your queer face. Several times when you do a good licking and sucking job on my crack, I push out my asshole a little so you already feel the tip of a huge and heavy hot brown football player log waiting there for you. With great eagerness you have to show me how hungry you are for my hot shitload by deeply tongue fucking my asshole and trying to desperately suck out the long monster turd. You often have to beg me to feed you.

When I am horny enough I put you on your back with force, and stand over you. I look down on you straight in your queer eyes and I place my big heavy foot on your throat and push a lot of weight on it, just to make your face red and hot enough , then I squat down with the tip of my reeking uncut cock hanging inches from your mouth and nose and I slap you about ten times hard in your face with my big hands on both your cheeks. When your face is not red enough, I keep slapping until it gets red like a beet. With this little foot play on your throat and this slapping, I've made your faggot face nice and warm so it's more comfortable for my straight ass to sit on. Then I plant my hairy asshole straight on your mouth and without any hesitation and with deep and loud grunting and sighing, I will push out my asshole, make my hole open wide and slowly fuck a big thick and long hot brown turd all the way deep down your throat, directly into your stomach. You will also listen to the sound it makes, slowly moving out and down through my ass lips directly in your mouth. You're not allowed to chew on it; I just pump it slowly straight down your throat. I like to shit with force but also slowly, so I have more time enjoying it.

This heavy crap might take a long while because you have to consider I eat HUGE fitness meals (I eat 4 times a day and I eat at least 3 whole breads a day, and 2 big plates of spaghetti), my mega dumps are at least 1 kilo, sometimes 1,5 kilo or more (between 2 lb. and 3+ lb.). When I shit in the toilet bowl (yeah I know, what a waste!), my turds are always at least around 30 cm. (1 feet) long (often longer) and at least some 6 cm. (2,5 inches) wide. My turds are of the finest quality; not too stiff and not too loose! I don't care if you gag or choke on it or not, I just sit on your face and empty my complete shit load in your mouth; slowly but forcefully, and without stopping, no matter how you are reacting to it, no matter how hard your helpless body is resisting to it, I will push the whole mega dump in your gut. Because of the constant pressure and with my full weight on your face and my asshole on your wide open mouth, my huge shit mass has no other way to go than through your stretching throat down in your gut. Filling you up with my hot football player dump makes my cock rock hard! And when you get tears in your eyes, and your facing is turning

into red or blue because of this mega dump pushing it's way slowly down your throat, that's an extra turn on for me!

The first Friday nights you don't get the privilege of chewing on my turds yet; you're just my god damn sewer mouth. But later when you're doing a good job, I allow you sometimes to chew on my dump; I will then need to pump my big wet shit load in at least 4 or 5 steps in your mouth, to let you do a proper chewing job. After every partial dump, I stand up, place my big heavy foot on your stomach and looking down on you, enjoying your moving neck muscles when you are chewing my mouthful of hot straight shit mass. You're only allowed to swallow it down when I give you permission. When you try to push it out of your mouth or when you try to puke it, I place my big flat foot sole on your chewing mouth, to make sure everything stays in.

When all that hot shit is down your throat, you lick my ass all nice and clean and I will then reward you with a long hot man's piss directly into your mouth, you have to swallow quickly because my big yellow piss stream is thick and hard. Then I pull my thick and low hanging foreskin completely over your nose and you deeply inhale my hot cock stench. Then I will push my big fuck monster slowly down between your lips and I will slowly start to fuck your face with my huge fat 9'' cock and after a long and deep throat fuck session, -- although I know you can't take all of my big fat cock because the base is too thick-- I want to cum deep down your throat, straight in your shit and piss filled gut! We do this every Friday night and when my girlfriend is out, we go for long weekend sessions; you have to know, my Sunday afternoon dumps are the biggest! What makes me even hotter is that you don't eat for 1 or 2 or (even better!) more days before I come, and I save up my shit for several days, so you're EXTRA hungry for my giant shit load and you're really starving and begging to be fed by my ass, I want you to truly mouth water for my shit!

When you're doing a good job, I take my fitness partner (also XXX big!) with me and you do us both, we pump you full with hot shit loads, one after another. Be prepared . . . my fitness buddy eats even more than I do! Later, I might consider bringing in more fitness pals, we will all use you as our fitness club toilet to see how much hot straight sportsman's shit can be pumped in that little queer stomach. But first you service me alone, I don't want to disappoint my friends.

What really turns me on is you buy me one of those new fancy digital scales (per 100 gr. / 3.52 oz. precise); before and after I feed you my big shit load, I weigh myself, so I know exactly how much of my shit is pumped in your stomach. The first Friday night I am friendly and shit for free. A one time free service entry! But since my high quality shit will make you addictive to my dumps, the next times when you are really starving and hooked to my hot shit (and believe me; you will!), you're gonna pay me for my long fat turds. I have to come up with a good prize, depending on how well you lick and suck my feet,

legs, balls, and cock. If you lick and suck me hard and long enough I might lower the prize. But I'm thinking of 10 Dutch guilders per 100 gr. ($5 / 3.52 oz.) shit. The idea you pay for my hot shit loads, that I dump for money, makes me extra horny! And of course triggers me to munch away even more food! We can also play little games, like you're only gonna suck my big cock again when over a few sessions, there's another 10 kilo (22 lb.) of my shit down your sewer throat. With this scale, me and my fitness club friends can also play exciting dump contests: who pumps the biggest shit load in our shit tank at once? We can also sometimes use the scale and a stopwatch and see how big the load is and how fast it is pumped down your stomach; we sometimes take speed contests to see who is the fastest with forcing a shitload down your eager throat. When we turd fuck your throat with a whole group (I call it gang dumping!), we exactly know how much kilo's of fitness guys shit is pumped in you. Maybe when you swallow all our hot straight shit, you become as cool as we are!

When you lay there on the ground totally filled up with our hot shit we'll think about more nasty games to play. I've got some wild fantasies like standing on your shit filled gut so you puke all the shit out and when you're on your hands and knees we slap you hard on your ass, yelling at you, while you eat our puked-out shit pile from the ground again. Or one guy is sitting on your face and the other guy is sitting with his full weight on your shit-filled gut and see how you cope with that! Or we can hang you upside down with your gut packed with lots and lots of hot, wet shit of some 8 big men, we place a wide open mouth gag between your teeth and then one after the other fucks your face deep ! Or when you hang there upside down we fasten a closed gag in your mouth and we'll push a big fat 16'' dildo down your ass!

You wanna know more of my nasty dreams? If you become my real long time sewer pal, I seek a dentist who pulls out all your teeth, so you can REALLY deep throat my long and fat monster cock all the way down to the wide base, because with teeth for sure nobody can take it all the way down, my cock is too fat and the base is too thick. Then, I can really face fuck that gummy mouth hard and deep for hours!

When you are toothless, I have another funny game: I'm gonna stuff my big SOFT COCK AND BOTH OF MY HUGE BALLS in your mouth, and clamp your face tightly between my massive hairy thighs. Then I'm gonna sniff poppers and soon my cock will start to grow and getting bigger and harder, filling your whole mouth and throat to the max, and because my balls are also crammed in your toothless mouth, your lips starting to function as a LIVING COCKRING! It's one big bulging faggot face and nothing can get out! I like to see the tears coming out of your eyes and see your face turning into red and blue when you're in this helpless position. It's like your whole face is gonna explode! How 'bout that! The only way out of this, is you are lucky I get horny enough that I cum in your throat and my cock gets soft again. Otherwise your face keeps being plugged on my rock hard and thick

cockbase and my massive balls until you're knocked out completely. I have got more extreme ideas, for example fisting your toothless mouth and throat long and deep. Or shoving my big hand and my thick wrist and muscled hairy forearm deep in your throat, and see how far I can get, and then arm fucking your face by pumping it in and out faster and faster.

Or I push a long hot stiff fat turd in your throat and let it stick gently some 5 inches out of your toothless mouth, and I slowly shove it further all the way down with my fist. Or what do you think of this: when you lay there after the gang dump, totally filled with our hot shit, we are gonna fist you from both ways; I am gonna fist your throat and my buddy fists you in your ass!

The wildest idea I have, is by FOOT FUCKING your toothless mouth by slowly pushing my big monster football player FOOT as deep as I can DOWN your helpless face and stretching your throat, seeing your neck getting wider, and then shoving it up and down your throat with increasing speed. Seeing my slimy and spit soaked big straight foot and my thick hairy ankle and leg going in and out of your stretching queer mouth, is my ultimate kick. When your stretched lips almost rip apart, surrounding my thick muscled hairy calf, and my leg is about to tear your jaws apart, I will cum spontaneously, without even touching my rock hard cock! They often say gays have big mouths, well let's see if that's true! And how would you feel when your gut is filled with shit of many big hot beefy sportsmen and you have one big foot forcing it's way up your ass, and one big foot working it's way down your mouth and throat? And you're worried that they wanna touch toes somewhere in the middle of the little faggot?

But that's all for now, don't worry, first the shit tank session is enough to begin with. This is a real turn on for me, and I will prepare my fitness friends for it, and I know they ARE ready for it, we've often made jokes about shitting in queer mouths! So, let's make it happen! Okay, who wants to be AMSTERGANG-DUMPED?!

Kent, the boy is a fruit cake.
What he's talking about here is the two frequencies are actually shared
with both ham and police. But some police departments feel because they use
it, you can't.

> the US Constitution....".

Local and State Cops Do NOT enforce Federal Law... They enforce State Law... What you cite is cases where BOTH State and Federal Statutes prohibit a convicted Felon from possessing a Firearm, and the local or State cops are enforcing the State Statutes, NOT the Federal One.

>
> US marshals rarely deal with cops who enforce the law.

apparently you have never dealt with a US Marshal... I have, many times, as a Resident Field Agent for the FCC, reTIRED... and know exactly of what I speak..... When on land, the US Marshal provides any muscle needed for ALL Federal Agencies that do not have Police Powers, inherent in their founding Statutes. On the water, it is the USCG, that provides the enforcement function, for any Federal agency, that doesn't have Police Powers. Nobody messes with a Federal Marshal. Their Police Powers are valid anywhere inside US Territory, Period... including Military Bases. The USCG has those same Police Powers on ANY navigable body of water, for US flagged Vessels, as well as foreign vessels inside US Territorial waters, PERIOD... No one messes with a USCG Boarding Party, either...

Just Say'en.....

and they are WRONG, and any enforcement action by some local or State
Cop, would be thrown out by the first Court of Jurisdiction, when the
Relevant Statutes, and FCC Regulations, are presented to the Judge. If
not there, then the first Appeals Court. Usually these things never make
it to a Court, as the Prosecutor doesn't want to be overturned, or
laughed out of Court, for not knowing the relevant Statutes, in the
first place.

Just Say'en.....

421.2500 mhz & 426.2500 mz.

I know.

>What he's talking about here is the two frequencies are actually shared
>with both ham and police. But some police departments feel because they use
>it, you can't.

Aren't those frequencies reserved for law enforcement use only?

From the US Amateur 70cm bandplan at the ARRL website:

70 Centimeters (420-450 MHz):
420.00-426.00 ATV repeater or simplex with 421.25 MHz video carrier control
links and experimental

426.00-432.00 ATV simplex with 427.250-MHz video carrier frequency

http://www.arrl.org/band-plan-1

Nothing there says it's even a shared service.

You've got that backwards. I'm a (big) dick with LOTS of chicks:
```

1) Kachina aka neon aka ?u
2) Sweetness
3) Pandora
4) LV
5) LP
6) Kat
7) Barbarella Schwartz
8) Rhonda Lea
9) Albatross
10) "I"

```
--
Sir Gregory
```

LOL! No wonder Clayton McGill (aka Demon of Mockery, aka Pope
Snarky) is a faggot, there's no way any woman with functioning vision would
go within 10 yards of that mouth breathing freakshow!

That fucker had to be born in sideshow tent!

he is a total idiot. i gave him some good advice on how to deal with
auk. he completely ignored it. which is kinda funny as that is what i
said to do with aukers.

>Back to your point, yes, lots of funny, mutilated pics were posted
>once upon a time.

a two way street that both sides where once free to run up and down
and give a good laugh to all reading.

liar.

[Snip question already asked and answered]

--
A: Maybe because some people are too annoyed by top-posting.
Q: Why do I not get an answer to my question(s)?
A: Because it messes up the order in which people normally read text.
Q: Why is top-posting such a bad thing?

What does you being a liar have to do with alt.usenet.kooks,
misc.legal,alt.law-enforcement,comp.os.os2.advocacy,
rec.radio.amateur.policy, Wills?

12> [Snip question already asked and answered]

While all answers are replies, it is not necessarily true
that all replies are answers, Wills. Your reply did not
constitute an answer. So the question remains:

On what basis do you claim that his appearance has everything to
do with alt.usenet.kooks,misc.legal,alt.law-enforcement,
comp.os.os2.advocacy,rec.radio.amateur.policy, Wills?

Amateur Radio Newsline(tm) Report 1798 - January 27 2012

Amateur Radio Newsline report number 1798 with a release date of January 27th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC nixes a waiver request from Anchorage VEC that would have lead to instant re-licensing of hams with expired licenses but the proposal is far from dead. Also ham radio to be discussed at WRC 2012; International cooperation removes a noise generator from 40 meters and the city of Los Angeles celebrate the life of a ham who started broadcast emergency alerting, Find out the details are on Amateur Radio Newsline(tm) report number 1798 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC SAYS NO TO LICENSE ELEMENT WAIVER REQUEST

The FCC has turned away a request from Alaska's Anchorage Volunteer Examination Coordinator for a temporary blanket waiver of Section 97.505(a) of the Commission's Rules. This, to allow the VEC to give individuals whose amateur radio operator licenses have expired examination credit for test elements previously passed so that all former licensees could be re-licensed without retesting. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

The Anchorage VEC had filed for the waiver pending the outcome of a related rulemaking petition in FCC Docket WT 11-130. That request seeks the same end but on a permanent nationwide basis.

But in its denial order the FCC noted that individuals who do not hold a current or renewable amateur radio operator license, regardless of whether they have held one in the past, must demonstrate their qualifications to be amateur radio operators before obtaining a new license. As such, the approval of the requested waiver to allow examination credit to be granted for any previously held amateur service operator license would not serve the underlying purpose of the regulatory agency's licensing rules.

The FCC also stated that amateur radio testing opportunities are widely available. It said that Volunteer Examiner teams can administer tests at any location and time convenient to them and the examinee. As such

Anchorage VEC has not shown that requiring retesting of examinees whose operator licenses expired more than two years ago, including those of advanced years, is inequitable or unduly burdensome, or that these examinees have no reasonable alternative.

But this matter is far from closed. In its conclusion the FCC also noted that the dismissal of the Anchorage VEC's waiver request is a separate matter from the groups pending Rule Making request in FCC Docket WT 11-130. As such this action is without prejudice to Anchorage VEC's pending rule-making petition.

The Report and Order denying the Anchorage VEC's waiver request was issued on Tuesday, January 24th. As we go to air it's not known if the Anchorage VEC will appeal this decision or simply wait for the outcome on its underlying Rule Making request.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, near Pittsburgh, Pennsylvania.

--

The bottom line: At least for now if a ham lets his or her license expire and fails to renew it during the two year grace period, he or she will be back to ground zero and will have to go through the testing procedure before being granted a call sign to get back on the air.

**

RADIO REGULATION: AMATEUR RADIO AT WRC-2012

Amateur radio is mentioned in the preface of the International Telecommunication Union's agenda document for the World Radiocommunication Conference 2012 now taking place in taking place in Geneva, Switzerland. Of interest to the Amateur and Amateur satellite Services is item 1.15. This, to consider possible allocations in the range 3 to 50 MHz to the radio location service for oceanographic radar applications, taking into account the results of ITU-R studies and in accordance with Resolution 612 from WRC-07.

Also, there is item 1.19 to consider regulatory measures and their relevance, in order to enable the introduction of software-defined radio and cognitive radio systems. This one is based on the results of ITU-R studies, and in accordance with Resolution 956 of WRC-07.

Lastly, there are items 1.22 to examine the effect of emissions from short-range devices on radio communication services and item 1.23 which will consider an allocation of about 15 kHz in parts of the band from 415 to 526.5 kHz to the amateur service on a secondary basis. This, taking into account the need to protect existing services.

WRC 2012 runs through February the 17th. We will all know more once the final reports on all these measures are in and made public. (ITU)

**

INTRUDER WATCH: INTERNATIONAL COOPERATION TAKES WHITE NOISE OFF 40 METERS

Interference from All India Radio to the 40 meter band has been eliminated. Amateur Radio Newsline's Cheryl Lasik, K9BIK, has the details:

--

Wolfgang Hadel, DK2OM, in Siegbach, Germany, reports via the I-A-R-U Region 1 website that back last December 1st he and Peter Jost HB9CET of Zurich, Switzerland, noticed a band of white noise like interference on 40 meters. This from 6 dot 960 to 7 dot 040MHz and also on 7 dot 820 MHz and showing up every evening.

Calculation by DK2OM showed the center of the spurious emissions was expected to be on the center 7 dot 410 MHz. From this point the German and Swiss Departments of Post and Telecommunications became involved.

Both offices filed official complaints to their counterpart in India. VU2GMN assisted by filing a personal complaint. On January 13th the transmitter located near the city of New Delhi was reported as having been repaired, and all traces of this source of interference to 40 meters was gone.

RESCUE RADIO: ALABAMA AGAIN HIT BY TORNADOS

Ham radio was again called out as another group of tornadoes touch down in Alabama. Amateur Radio Newsline's David Black, KB4KCH, is at our South-East Bureau in Birmingham with more:

--

The January 22nd storms that pounded residents in Arkansas and Alabama were particularly difficult to deal with because they hit at night and couldn't be seen. Some tornadoes were wrapped in rain. Damage was reported in five Arkansas counties. One woman was trapped in her home for a time. At least six tornadoes hit areas south and east of Little Rock across the state's Delta region. A 150 year old church was hit and a transmission tower was destroyed. Members of Arkansas Skywarn activated at the request of National Weather Service forecasters in Little Rock. In all, about 60 radio amateurs helped with providing emergency communications across the state.

Hams remained busy as the storms swept east, hitting Alabama during the predawn hours January 23rd. A single supercell thunderstorm produces four tornadoes across central Alabama. Two of the twisters strike

neighborhoods north and west of downtown Birmingham. A 16-year-old girl dies when her home is hit by an 800-yard wide tornado packing winds of 150 miles an hour. An 81-year-old man dies when a tornado hits his mobile home shortly after 3am. In all, forecasters say Alabama was hit by at least eight tornadoes, some of them leaving long tracks of destruction while tearing up hundreds of homes and businesses, and injuring 150 people. The tornadoes hit very close to areas pounded during a series of storms that killed 239 people in the state April 27th, 2011.

Members of the Alabama Emergency Response Team, ALERT, provided severe weather reports to Weather Service forecasters who used the information to issue warnings to the public. Hams with amateur radio clubs in Birmingham and nearby Sylvan Springs were on the air throughout much of the night, as well, assisting emergency management officials. And members of the Amateur Radio Emergency Service were active, as well. They provided communications as officials set up shelters for people who lost their homes in the storms.

The winter months typically see what's called a secondary severe weather season across the Southeast. With that in mind, radio amateurs throughout the region are being thanked for their services...and reminded that their help will likely be needed again.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, at the South-East Bureau in Birmingham, Alabama.

RADIO LAW FOLLOW-UP: SEVERAL AMATEUR RADIO WEBSTES SUPPORTED THE SOPA - PIPA BLACKOUT PROTEST

A follow up to last weeks story about the involvement of ham radio in halting the progress of two measures working their way through the U-S Congress. Laws that many say would have destroyed the Internet as we know it today.

While the giant QRZ dot com website took what could best be described as the amateur radio point position in helping to halt the twin bills

in their tacks, it turns out that it was not alone. The Southgate News reports that at least two other ham radio websites took part in the protest. Both the amateur radio HF Link Forum and the APRS site aprs.fi were closed in the United States on Wednesday, January 18th.

The aprs.fi blog noted in advance that it would join Wikipedia and Reddit, and protest the proposed United States Stop Online Piracy or SOPA and the Protect Intellectual Property Act or PIPA legislation by closing down. The blog went on to note that if some APRS user were to post links to copyright infringing material, even when that material would reside somewhere other than aprs.fi itself, that aprs.fi could be shut down in the U.S. and there would not be much that the website owners could do about it.

As we go to air, both SOPA and PIPA have been withdrawn by their respective sponsors in Congress for retooling. That's a fancy way of saying that enough votes had defected to make passage at this time impossible. At the same time it's a way of keeping both pieces of legislation alive for re-introduction to the United States Federal law making process at some later date. And it's a sure bet that content providers such as the motion picture and music industries which basically wrote these two pieces of legislation will try again. (Southgate, ARNewsline(tm))

**

ENFORCEMENT: FORMER AUSTRALIAN HAM ADMITS TO INTERFERING WITH OTHERS

A former ham in VK-land has admitted to being a source of interference on the ham radio bands. This after the 63-year-old man from one of Melbourne's western suburbs pleaded guilty on January 11th to several offences under the Australian Radio Communications Act. Amateur Radio Newsline's Norm Seeley, KI7UP has more in this report:

--

In testimony, the Australian court hearing the case was told that, until August 2009, the defendant had been a licensed amateur radio operator but was investigated by the Australian Communications and Media Authority following complaints about interference. As a result of the inquiry, the regulatory authority cancelled the defendant's amateur licensee.

But it did not end there. The Australian Communications and Media Authority alleged that he continued to use his amateur radio gear his home to jam the communications other licensed amateur licensees. The execution of the search warrant by the authorities in September of 2011 confirmed that the defendant had a large quantity of radio communications gear. Tests confirmed that the equipment was set to the radio frequencies that had been interfered with.

In its sentencing, the court placed the defendant on a 12-month good behavior bond, ordered him to get rid of all of the seized equipment

within four months and prove to the Australian Communications and Media Authority in writing that he had disposed of the gear.

The unidentified ham is considered lucky. Under Australian telecommunications law the court hearing the case had the option to sentence him to up to 24 months in prison for these offenses.

For the Amateur Radio Newsline, I'm_Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

As is policy down-under, the defendants name was not made public by the Australian court. (WIA News)

**

ENFORCEMENT: FLORIDA LPFM FINE LOWERED TO $1500

Back in the United States, a low power FM station that interfered with FAA frequencies in Florida will only have to pay a $1,500 fine for operating without an FCC certified transmitter. This after it successfully convinced the commission to slash the penalty from the original $12,000.

Power Ministries is the licensee of low power station WRLE in Dunnellon, Florida. As reported here on Newsline, last September the Enforcement Bureau issued a notice of apparent liability, saying the station had operated with a non-certified transmitter for about three months in 2010. This action came after an investigation prompted by a complaint of interference it received from the Federal Aviation Administration's Jacksonville Center to Air Traffic Control on133.75 MHz.

The proposed fine was $12,000 but the station appealed in a letter from Power Ministries owner Anthony Downes. The FCC now has rejected his arguments that the fine should be waived on the grounds that he had acted promptly and had not been aware of interference. But the commission has accepted the station's documentation of inability to pay, and it cut the penalty to the $1500 level. (FCC)

**

RADIO LAW: LIGHTSQUARED ASKS FCC TO CONFIRM ITS RIGHT TO SPECTRUM

The seemingly never ending story continues. This with word that LightSquared, the company that wants to build a nationwide broadband data distribution system has asked the FCC to confirm its right to use the spectrum licensed to it by the federal government. It's also asking the regulatory agency to confirm that commercial G-P-S manufacturers have no right to interference protection from LightSquared's network since they are not licensed users of that spectrum. Amateur Radio Newsline's Burt Hicks has the latest in this report:

--

According to news reports, LightSquared claims that commercial GPS manufacturers are responsible for having designed and sold unlicensed devices that use adjacent spectrum licensed to LightSquared and its predecessor companies. In a petition recently filed with the FCC LightSquared claimed that commercial GPS receivers are not licensed, do not operate under any service rules, and thus are not entitled to any interference protection whatsoever. The petition also noted that the FCC itself has stated that the GPS industry has been on notice for almost a decade that LightSquared was planning to use its spectrum to launch a nationwide broadband network.

LightSquared's petition claims that it has had FCC authorization to build its network for over eight years, and that authorization was endorsed by the GPS industry, and fully reviewed and allowed to proceed by several other government agencies. A company spokesman added that commercial GPS device-makers have had nearly a decade to design and sell devices that do not infringe on LightSquared's licensed spectrum. They have no right to complain in the eleventh-hour about incompatibility when they had ample opportunity to avoid this problem.

As previously reported, LightSquared plans to deploy an open 4G network to be used by existing and new service providers to sell their own devices, applications and broadband connectivity. The company claims that the deployment and operation of the network represent more than $14 billion of private investment over the next eight years.

In its closing remarks the company did moderate its position a tiny bit. It said that while it asks the FCC to confirm its legal rights, LightSquared remains fully committed to cooperate with all parties including the GPS industry, GPS users and the federal government to ensure that its network is deployed in a way that is compatible with GPS users.

For the Amateur Radio Newsline, I'm Burt Hicks in Los Angeles.

--

LightSquared says that it has always recognized the critical importance of the GPS system. As such it firmly believes that a way can be found for GPS devices to peacefully co-exist adjacent to its network. That said, the GPS industry and Congress are not so sure. (Published News Reports)

RADIO BUSINESS: TAPR AND IQUADLABS ANNOUNCE AGREEMENT ON SDR BOARDS

Tucson Amateur Packet Radio and iQuadlabs have jointly announced a sourcing agreement for the open source Software Defined Radio or HPSDR boards. These are the ones best known by their nick-names of Magister, Mercury and Pennylane.

Under the new agreement, Tucson Amateur Packet Radio will acquire inventory of iQuadLabs creating a one-stop source for all open HPSDR boards. On the other side, iQuadLabs will gain the inventory from Tucson Amateur Packet Radio to build pre-configured and tested complete open HPSDR systems.

The end result will be that Tucson Amateur Packet Radio will have all open HPSDR boards in stock, in one place, for those wishing to buy boards, kits and components. And, for the first time in the history of open HPSDR, those who wish to by a completely assembled and tested radio will have a source at iQuadLabs. Zephyr Engineering, Inc will continue to manufacture the assembled boards. (TAPR)

STRANGE TECHNOLOGY UNKNOWN ANIMAL TAKES KENTUCKY TV STATION OFF THE AIR

A TV station went dark for a short time due to damage from one of the creatures of the wild. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the details:

--

An unidentified animal has been blamed for taking a Kentucky television station off the air. Lexington CBS affiliate WKYT announced on its Facebook page Wednesday, January 11th that it was in the midst of broadcasting a University of Kentucky basketball game when a power outage shut it down.

It turns out that the power interruption was caused by an animal gnawing through a power line on the station's property. Mike Kanarek, WKYT's vice president of operations, told the Lexington Herald-Leader newspaper that the station switched to a back-up generator almost immediately after the animal cut off electricity but it took a few minutes for the transmitter to resume broadcasting.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

WKYT didn't specify what type of animal caused the disturbance or if it survived the ordeal. (RW)

**

AWARD NEWS: LOGBOOK OF THE WORLD TO SUPPORT CQ OPERATING AWARDS

CQ Communications and ARRL have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World electronic confirmation system. CQ's awards will be the first non-ARRL awards supported by Logbook of the World and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow.

The target date for beginning Logbook of the World support for WPX is April 1st. Amateurs will be able to use Logbook of the World logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard Logbook of the World credit fees and CQ award fees will apply.

The ARRL's Logbook of the World system is an interactive database recording contacts between radio amateurs was created in 2003 and has been adopted by 47,500 radio amateurs worldwide. It already has records of 400 million contacts and grows weekly.

The agreement was announced jointly on Tuesday, January 24th by ARRL Chief Operating Officer Harold Kramer, WJ1B, and CQ Communications President Richard Ross, K2MGA. (CQ)

HAM HAPPENINGS: K5B TO COMMEMORATE THE BATAAN DEATH MARCH

The Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating special events station K5B on March 25th. This, in conjunction with the 23rd annual Bataan Memorial Death March Marathon to be held at the near-by White Sands Missile Range.

K5B will operate from 1000 to 2300 UTC on or near 21.337, 14.330, 7.225, and 3.893 megahertz. A commemorative card will be available by request. If you make contact please QSL with a self addressed stamped business sized envelope to Special Events Station K5B, in care of the Mesilla Valley Radio Club, P. O. Box 1443 Las Cruces, NM 88004-1443. All QSL requests must be received by Friday, April 20th. More information is on-line at www.n5bl.org/bataan. (Mesilla Valley ARC)

**

HAM HAPPENINGS: SEVHFS SOLICITING PAPERS FOR APRIL CONFERENCE

Papers and other presentations are solicited The 15th Annual Southeastern VHF Society Conference to be held in Charlotte, North Carolina on April 20th and 21st. Submissions are welcomed on both the technical and operational aspects of VHF, UHF and Microwave weak signal amateur radio. The deadline for the submission is February 17th. Send all questions and comments to Robin Midgett via e-mail to K4IDC at comcast dot net. More is on-line at www.svhfs.org. (SEVHFS)

**

HAMVENTION 2012: DAYTON DX DINNER INFORMATION ANNOUNCED

The Southwest Ohio DX Association has announced that it will again sponsor the DX Dinner to be held in conjunction with the 2012 Dayton Hamvention. The date is Friday, May 18th at the Dayton Marriott Hotel in downtown Dayton, Ohio. There will be a cash bar starting at 5:30 p.m. with dinner served at 7:00 o'clock Eastern time. Reservation information can be found on line at www.,swodxa.org. (SWODXA)

**

HAM HAPPENINGS: ORLANDO HAMCATION FEBRUARY 10 To 12

The 66th annual Orlando HamCation Amateur Radio and Computer Show will take place on February 10th through the 12th at the Central Florida Fairgrounds, in Orlando, Florida. Presented by the Orlando Amateur Radio Club, HamCation 2012 will feature over 150 commercial vendors offering a wide variety of radio gear, antennas, accessories, test equipment, tools, software and books. There will also be over 400 swap vendors and a large outdoor tailgating area. More information on this fun winter get-away event in the Florida sun is on-line at www dot hamcation.com. (Orlando HamCation)

**

HAMVENTION 2012: N6TR TO BE FEATURED SPEAKER AT DAYTON CONTEST DINNER

2003 Radio Amateur of the Year Larry "Tree" Tyree, N6TR, will be the featured speaker at the 20th Annual Dayton Contest Dinner to be held on Saturday, May 19, 2012 in Dayton, Ohio.

According to the North Coast Contesters who sponsor the dinner, N6TR has an extensive and distinguished contesting resume that goes beyond his many top ten finishes in domestic CW contests. He was one of the founders of the popular Stew Perry Top Band Distance Challenge and the creator of the twice-a-year Kids Day operating events. Tyree is also the author of the popular TRLOG contest logging software and is responsible for log checking packages that are used to adjudicate many of the major radio contests.

Outside of contests, Tyree spends most of his time chasing new countries on 160 meters. More about this event is on-line at contestdinner.com. (K3LR)

SCIENCE AND TECHNOLOGY: LEAP SECONDS GET A REPRIEVE

The Leap Second is getting a temporary reprieve. This after delegates at an international telecommunications meeting in Geneva failed to reach a consensus on whether or not to delete these sporadic additions from the global time standard system.

As reported last week, attendees to the conference were supposed to decide whether to recommend the elimination of leap seconds. Since no decision was made, the issue has been referred back to a panel of experts for further study. A revised proposal will be introduced no earlier than 2015.

Leap Seconds are time increments which are occasionally added to the world's atomic clocks to keep them synchronized with Earth's rotational cycles. The last leap second was added in 2008. The next one is this year at the end of June.

Also one correction to last weeks report. As pointed out to us in an e-mail from John Rabold KS6M, the Earth doesn't rotate around the sun. Rather it revolves around the sun.

Thank you John for catching that one. It was our bad. (Space & Science)

**

HAM RADIO IN SPACE: NASA AND W5KWQ WORKING ON RELEASE OF FIRST MOVIE SHOT IN SPACE

The first science fiction film shot in space could be coming to viewers here on Earth. This after NASA confirms it's almost ready to give approval for the project.

Titled Apogee of Fear, the film was shot by space tourist Richard Garriott, W5KWQ, during his 2008 trip to the International Space Station. Garriott shot the basic footage for the film, using astronauts as his cast. He then added scenes and visual effects after his return to Earth.

The film was privately shown at Dragon*Con last year, but has been in legal limbo since then. This is because it wasn't included in Garriott's deal with NASA. Now the space agency confirms that it is

working with W5KWQ to facilitate the video's release. The complete story is on-line at tinyurl.com/movie-in-space. (The UK Register, Wired, others)

**

EMERGING TECHNOLOGY: THE IPAD PASSPORT

A Canadian man traveling by car to Vermont claimes that his iPad helped save the day. This after he realized he left his passport, which is required to cross into the United States, at his home in Quebec.

According to news reports, Martin Reisch said that on December 30th he arrived at Canada's Stanstead crossing and proceeded to the U.S. border post. He then showed the U.S. officer his Canadian driver's license, his Medicaid card and a digital scan of his passport he had on his iPad. At that point says Reisch he was permitted to enter the United States.

But the U.S. Customs and Border Protection agency says that it did not happen that way calling Reisch's story false. In a statement the agency said that in this case, the individual had both a driver's license and birth certificate, which the CBP officer used to determine identity and citizenship in order to admit the traveler into the country.

But Reisch isn't backing down from his story. He told the press that he does not even know where his paper birth certificate is. He added that his experience does however make him think about how technology can be used for identification purposes when traveling at some point in the future. (Various published news sources)

WORLDBEAT: RADIO AMATEURS OF CANADA SEEKS TREASURER

Radio Amateurs of Canada is looking for a Treasurer who is a Chartered Accountant, Certified General Accountant or Certified Management Accountant. Experience with QuickBooks would be an asset. Interested parties should contact Paul Burggraaf by e-mail to vo1prb(at) rac (dot) ca. (RAC)

**

WORLDBEAT: UK SCHOOL TO HOLD D-STAR EVENT

A school in the village of Gresham in the United Kingdom will be holding an amateur radio special event station using the D-STAR digital network for children age 6 to 11 on May 23rd. The callsign will be GB2GVS which stands for Gresham Village School.

Andy Johnston, 2E0AIV is the event coordinator. He says that they have already arranged link-ups with schools in Northern Ireland, the USA and England, but are looking for more countries and schools to

participate. If anyone is interested, they can contact Andy via e-mail at 2e0avi (at) 2e0aiv (dot) co (dot) uk. (Southgate)

**

ON THE AIR: CELEBRATING DENMARK'S PRESIDENCY OF THE EUROPEAN UNION

Ham radio is helping Denmark celebrate its turn as President of the European Union. Denmark holds this from January 1st to June 30th. Ro celebrate, the callsign 5P12EU will be activated during this same time period. QSL cards will be available and there is an award scheme for working or just hearing this callsign. For all details on QSLing, the award format and logs, check out www.5p12eu.dk (DX OnLine)

**

DX

In DX, members of the Buddies in the Caribbean will mount a mini-DXpedition to Grenada between February 1st through the 9th. The team specializes in 100 watts or less low power radios and the Buddipole portable antenna systems They will have fixed operations from a cliff-top villa and portable operations from various points on the island. Modes used will be CW, SSB, and the Digital on 160 through 10 meters. Licensing is not yet complete, but each operator is expected to receive their J3/callsign. QSL via Logbook of the World, eQSL, or regular mail to operator's home callsign and include a self addressed stamped envelope if you go the postal route.

JA1XGI will be active from Hawaii as W8XGI/KH6 between January 31st and February 4th just prior to his upcoming trip to Tonga. Operations will probably be on 20 through 6 meters with an emphasis on 30, 17 and 12 meters. He is expected to operate mainly CW, with some SSB and the Digital modes. QSL via JA1XGI, direct or by the Bureau. QSO's will be uploaded to Logbook of the World.

DL7AFS and DJ7ZG will be operational as V21FS and V21ZG, respectively, from the Villa Sundowerns on the island of Antigua beginning March 5th for an unknown stay. Focus of this operation on 160 through meters as propagation conditions allow. Modes noted are RTTY, PSK and SSB. QSL via the DARC German QSL bureau or direct to DL7AFS.

(Above from various DX news sources)

**

THAT FINAL ITEM: LOS ANGELES CELEBRATES THE 57TH ANNIVERSARY OF THE SIGALERT DEVELOPED BY THE LATE LLOYD SIGMON, W6LQ

Los Angeles transportation leaders gathered at Caltrans headquarters Monday January 23rd to commemorate the 57th anniversary of what may be Los Angeles' most iconic gift to the rest of the world: the SigAlert. And it was developed by a ham radio operator. Amateur Radio Newsline's Bill Pasternak, WA6ITF, tells about this legacy gifted to the people of

Southern California by a broadcasting pioneer:

--

It's hard to fathom that it was 57 years ago this week that the late Lloyd Sigmon, W6LQ, developed the SigAlert. At the time Lloyd was a vice president and engineer at Gene Autry's Golden West Broadcasting AM radio station KMPC.

In the pre Internet world of the 1950's KMPC had revolutionized Southern California driving by launching a fleet of fixed wing aircraft and helicopters to report live on traffic conditions during rush hours. But what became known as the "KMPC Air Force" could not fly around the clock.

In off hours Lloyd Sigmon had wanted Los Angeles Police Department officers to simply phone KMPC's news department when freeways or streets were clogged but the department rejected that idea. So W6LQ used his ham radio know how to develop a hardware-based work around that has been a region wide standard for more than half a century.

Today the California Highway Patrol and other police authorities still use the term SigAlert to advise motorists to an unplanned lane closure lasting more than 30 minutes. And over the years SigAlerts have not only aided in traffic reporting but have also been used in disaster alerting.

The first such emergency notification SigAlert took place in 1955 when it urged medical personnel to respond to a train derailment. It reportedly caused a traffic jam when many doctors and nurses showed up to assist at the scene.

W6LQ's SigAlert is also credited with saving the lives of hundreds when the Baldwin Hills Dam collapsed on December 14, 1963. And even today Lloyd Sigmon's basic alerting concept is in use nationwide in the form of the high-tech Emergency Alert System or E-A-S.

During his time in Southern California, Lloyd Sigmon, W6LQ, was very active and well known in the Los Angeles ham radio community. He was also a frequent guest on late-night talk shows, especially that of Ray Briem, N6FFT. There he could be heard discussing both his love of ham radio and, once in a while, a bit of the technology on the development of the SigAlert.

In later year after his retirement from KMPC Lloyd Sigmon moved back to his native Oklahoma. There, W6LQ, became a Silent Key in 2005 at age 90.

I was fortunate to have known Lloyd and to have appeared with him several times on the Ray Briem Show. I can tell you first hand that Lloyd Sigmon, W6LQ, was one truly nice guy.

For the Amateur Radio Newsine, I'm Bill Pasternak, WA6ITF, in the newsroom here in the City of Angels.

--

You can learn more about both Lloyd Sigmon, W6LQ, and the SigAlert at tinyurl.com/3myftzl. (Various published news reports and ARNewsline(tm) Archive)

How would a woman sucking cock be gay? Clayton McGill sucks cock and
that's gay.

Roll-Aids.

761. CONCEPT OF GOD IN ISLAM !!!!!!!!!!!!

Newsgroup: rec.radio.amateur.policy
Date: 2012-01-27 19:19:35 UTC
From: BV <bv5bv5bv5@yahoo.com>
Message-ID: <732925f3-d387-4eb7-ad56-c05382153ce2@o13g2000vbf.googlegroups.com>

CONCEPT OF GOD IN ISLAM

Sorry for not sending anything related to this group but it might be something new to you.
CONCEPT OF GOD IN ISLAM
It is a known fact that every language has one or more terms that are used in reference to God and sometimes to lesser deities. This is not the case with Allah. Allah is the personal name of the One true God. Nothing else can be called Allah. The term has no plural or gender. This shows its uniqueness when compared with the word god which can be made plural, gods, or feminine, goddess. It is interesting to notice that Allah is the personal name of God in Aramaic, the language of Jesus and a sister language of Arabic. The One true God is a reflection of the unique concept that Islam associates with God. To a Muslim, Allah is the Almighty, Creator and Sustainer of the universe, Who is similar to nothing and nothing is comparable to Him. The Prophet Muhammad was asked by his contemporaries about Allah; the answer came directly from God Himself in the form of a short chapter of the Quran, which is considered the essence of the unity or the motto of monotheism. This is chapter 112 which reads:

"In the name of God, the Merciful, the Compassionate. Say (O Muhammad) He is God the One God, the Everlasting Refuge, who has not begotten, nor has been begotten, and equal to Him is not anyone."

Some non Muslims allege that God in Islam is a stern and cruel God who demands to be obeyed fully. He is not loving and kind. Nothing can be farther from truth than this allegation. It is enough to know that, with the exception of one, each of the 114 chapters of the Quran begins with the verse: "In the name of God, the Merciful, the Compassionate." In one of the sayings of Prophet Muhammad (PBUH) we are told that "God is more loving and kinder than a mother to her dear child." But God is also Just. Hence evildoers and sinners must have their share of punishment and the virtuous, His bounties and favors. Actually God’s attribute of Mercy has full manifestation in His attribute of Justice. People suffering throughout their lives for His sake and people oppressing and exploiting other people all their lives should not receive similar treatment from their Lord. Expecting similar treatment for them will amount to negating the very belief in the accountability of man in the Hereafter and thereby negating all the incentives for a moral and virtuous life in this world. The following Quranic verses are very clear and straightforward in this respect:

"Verily, for the Righteous are gardens of Delight, in the Presence of their Lord. Shall We then treat the people of Faith like the people of Sin? What is the matter with you? How judge you?" (68:34-36)

Islam rejects characterizing God in any human form or depicting Him as favoring certain individuals or nations on the basis of wealth, power or race. He created the human beings as equals. They may distinguish themselves and get His favor through virtue and piety only. The concept that God rested in the seventh day of creation, that God wrestled with one of His soldiers, that God is an envious plotter against mankind, or that God is incarnate in any human being are considered blasphemy from the Islamic point of view. The unique usage of Allah as a personal name of God is a reflection of Islam's emphasis on the purity of the belief in God which is the essence of the message of all God's messengers. Because of this, Islam considers associating any deity or personality with God as a deadly sin which God will never forgive, despite the fact He may forgive all other sins.
The Creator must be of a different nature from the things created because if he is of the same nature as they are, he will be temporal and will therefore need a maker. It follows that nothing is like Him. If the maker is not temporal, then he must be eternal. But if he is eternal, he cannot be caused, and if nothing outside him causes him to continue to exist, which means that he must be Self-Sufficient. And if He does not depend on anything for the continuance of His own existence, then this existence can have no end. The Creator is therefore eternal and everlasting: 'He is the First and the Last.' He is Self-Sufficient or Self-Subsistent or, to use a Quranic term, Al-Qayyum. The Creator does not create only in the sense of bringing things into being, He also preserves them and takes them out of existence and is the ultimate cause of whatever happens to them.
"God is the Creator of everything. He is the guardian over everything. Unto Him belong the keys of the heavens and the earth." (39:62, 63)
"No creature is there crawling on the earth, but its provision rests on God. He knows its lodging place and its repository." (11:6)

GOD'S ATTRIBUTES
If the Creator is Eternal and Everlasting, then His attributes must also be eternal and everlasting. He should not lose any of His attributes nor acquire new ones. If this is so, then His attributes are absolute. Can there be more than one Creator with such absolute attributes? Can there be for example, two absolutely powerful Creators? A moment's thought shows that this is not feasible. The Quran summarizes this argument in the following verses:
"God has not taken to Himself any son, nor is there any god with Him: For then each god would have taken of that which he created and some of them would have risen up over others." (23:91)
And Why, were there gods in earth and heaven other than God, they (heaven and earth) would surely go to ruin." (21:22)

THE ONENESS OF GOD
The Quran reminds us of the falsity of all alleged gods. To the worshippers of man-made objects, it asks:

"Do you worship what you have carved yourself?" (37:95) "Or have you taken unto you others beside Him to be your protectors, even such as have no power either for good or for harm to themselves?" (13:16)

To the worshippers of heavenly bodies it cites the story of Abraham: "When night outspread over him he say a star and said, ‘This is my Lord.’ But when it set he said, ‘I love not the setters.’ When he saw the moon rising, he said, ‘This is my Lord.’ But when it set he said, ‘If my Lord does not guide me I shall surely be of the people gone astray.’ When he say the sun rising, he said, ‘This is my Lord; this is greater.’ But when it set he said, ‘O my people, surely I quit that which you associate, I have turned my face to Him Who originated the heavens and the earth; a man of pure faith, I am not of the idolaters.’" (6:76-79)

THE BELIEVER’S ATTITUDE
In order to be a Muslim, i.e., to surrender oneself to God, it is necessary to believe in the oneness of God, in the sense of His being the only Creator, Preserver, Nourisher, etc. But this belief – later on called "Tawhid Ar-Rububiyyah is not enough." Many of the idolaters knew and believed that only the Supreme God could do all this. but that was not enough to make them Muslims. To tawhid ar-rububiyyah one must add tawhid al’uluhiyyah, i.e., one acknowledges the fact that is God alone Who deserves to be worshipped, and thus abstains from worshipping any other thing or being. Having achieved this knowledge of the one true God, man should constantly have faith in Him, and should allow nothing to induce him to deny truth. When faith enters a person’s heart, it causes certain mental states which result in certain actions. Taken together these mental states and actions are the proof for the true faith. The Prophet said,
"Faith is that which resides firmly in the heart and which is proved by deeds."

Foremost among those mental states is the feeling of gratitude towards God, which could be said to be the essence of ‘ibada’ (worship). The feeling of gratitude is so important that a non-believer is called ‘kafir,’ which means ‘one who denies a truth’ and also ‘one who is ungrateful.’ A believer loves, and is grateful to God for the bounties He bestowed upon him, but being aware of the fact that his good deeds, whether mental or physical, are far from being commensurate with Divine favors, he is always anxious lest God should punish him, here or in the Hereafter. He, therefore, fears Him, surrenders himself to Him and serves Him with great humility. One cannot be in such a mental state without being almost all the time mindful of God. Remembering God is thus the life force of faith, without which it fades and withers away. The Quran tries to promote this feeling of gratitude by repeating the attributes of God very frequently. We find most of these attributes mentioned together in the following verses of the Quran:
"He is God; there is no god but He, He is the Knower of the unseen and the visible; He is the All-Merciful, the All-Compassionate. He is God, there is no God but He. He is the King, the All-Holy, the All-Peace,

the Guardian of Faith, the All-Preserver, the All-Mighty, the All-Compeller, the All-Sublime. Glory be to God, above that they associate! He is God the Creator, the Maker, the Shaper. To Him belong the Names Most Beautiful. All that is in the heavens and the earth magnifies Him; He is the All-Mighty, the All-Wise." (59:22-24)
"There is no god but He, the Living, the Everlasting. Slumber seizes Him not, neither sleep; to Him belongs all that is in the heavens and the earth. Who is there that shall intercede with Him save by His leave? He knows what lies before them and what is after them, and they comprehend not anything of His knowledge save such as He wills. His throne comprises the heavens and earth; the preserving of them oppresses Him not; He is the All-High, the All-Glorious." (2:255)
"People of the Book, go not beyond the bounds in your religion, and say not as to God but the truth. The Messiah, Jesus son of Mary, was only the Messenger of God, and His Word that He committed to Mary, and a Spirit from Him. So believe in God and His Messengers, and say not, ‘Three.’ Refrain; better is it for you. God is only one God. Glory be to Him – (He is) above having a son." (4:171)

Clayton McGill (aka Demon of Mockery, aka Pope Snarky) claims he's not
gay, I say a guy sucking cock is gay, tiz not my problem or issue for
me.

Do you think a guy sucking cock or being ass fucked by a guy is gay?

Still suffering from reading comprehension problems, persent? I did
not produce your unsubstantiated and erroneous claim. Rather, you
did,
and question remains, what does your unsubstantiated and erroneous
claim have to do with alt.slack,rec.nude,rec.radio.amateur.policy,
comp.os.os2.advocacy,rec.radio.cb, persent?

[IARU-R2-News 151] Looking for a new amateur radio band
2012-01-28

Ramon Santoyo V. - Secretary - IARU Region 2 wrote:

WRC-12 report from G3PSM.

Progress was made with a compromise proposal on agenda item 1.23, drafted to take into consideration the views of those for and those against an amateur service allocation around 500kHz. This proposal suggests a 7kHz segment between 472-479kHz, very close to the CEPT position of 472-480kHz. Initial indications are that this could be acceptable to many administrations and regional organisations. However, various meetings need to take place to have these formally accepted.

In order to tidy up the draft for the next meeting of the sub working group, a weekend meeting of the drafting group will be held. At the time of writing the NOC No Change advocates steadfastly maintain their positions.

Only 3 weeks left!

Tears On My Pillow--a nice 50's ballard changed just for
Marky!

********STAINS ON YOUR PILLOW**********

You don't remember me, but I remember you.
I'm that seventeen year old, who tore your ass in two

Stains on your pillow, jizz in your ass, because of you.

My cock is not a gadget, your ass is not a toy, your dam asshole is
so stretched out because my name is LeRoy!

If I could start anew, I'd only masturbate. You made me fuck your
ass,
Mark you're a reprobate!

Stains on your pillow, jizz in your ass, because of you.

AND......who could ever forget this classic.............

"""Marky's Renaissance Fair ***Free Credit Report dot Com Tune***"""

Marky was getting depressed 'cause of all the stress he was feeling at
home. Marky has a little cock and Gav would taunt him wherever he'd
go.
Marky Thought he'd move to a place where he could have a tiny dick and
Gav wouldn’t care. He just wishes that Gav had told him that place was
a Renaissance Fair!

VE7KFM dot com!

Tell your friends, tell Gav's dad, tell Gav’s mom! Never mind they've
been singing our songs Since Mork showed up sucking Karol's dong! If
you're not into fake sword fights Karol says Marky’s ass ain’t tight!
Take a tip from a knight who knows

VE7KFM dot com, Mark blows!

835. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2012-02-01 07:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1328079601@panix.com>
Source record: 249933
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

838. The Grand Wizard's Commentary on the January 2012 Ballot

Newsgroup: rec.radio.amateur.policy
Date: 2012-02-01 15:42:53 UTC
From: Rusty Tavek <grandwizard@safe-mail.net>
Message-ID: <CB4EC7AD.EAF%grandwizard@safe-mail.net>
Source record: 249937
Cross-posted to: alt.usenet.kooks,rec.radio.amateur.policy,alt.atheism

In accordance with the rules of rasslin' management, it would not be fitting for the Grand Wizard of AUK to vote for or against his own candidates with anything but half a dozen sockpuppets. However, I am happy to offer color commentary on the current ballot - and given my impeccable sartorial sense you would be wise to listen and listen closely to my suggestions.

On 1/31/12 11:43 PM, in article jgafae$1gq$2@blackhelicopter.databasix.com, "Friendly Neighborhood Vote Wrangler" <fnvw@databasix.com> wrote:

>> BOBO
>> (vote "yes" or "no")
>>
>> Atlas Bugged

A Bobo candidate should be held to the highest (or lowest) standards. Compared to former Bobo winner Emmett "The Pissbum Powerhouse" Gulley, Mr. Bugged just doesn't quite measure up to the levels of Internet self-destruction one looks for in a Bobo. Is Mr. Bugged in prison thanks to his online activities? Does he live in a tent and bicycle to his local soup kitchen? Has he been photographed recently wearing pants with questionable stains? He has not, my friends, he has not.

I do not wish to disparage Mr. Bugged. He is certainly a fine barrister, although not quite up to the genius of our attorney-on-retainer John Grubor. But so as not to devalue the quality of this august award I would urge you, my friends, to vote "no."

THE WIZARD PREDICTS: an undeserved win for one of the weakest contenders in recent memory.

>> KOOK OF THE MONTH
>> (vote for one candidate or for "none of the above")
>>
>> % Squiggle teh AssWorm
>> Atlas Bugged
>> none of the above

This one is a horse race, but in the end % is the horse's rear end. Rarely has someone posted so much and had so little to say. He's not quite a Village Pump, but he's definitely a slow drip. And so the Grand Wizard must give a tip of the turban and a recommendation to % to be this month's decorated kook.

THE WIZARD PREDICTS: % for the win, although he may be handicapped by virtue of being universally killfiled. So don't count Bugged out yet.

>> LOONEY MAROON AWARD
>> (vote for one candidate or for "none of the above")
>>
>> Emmett Gulley
>> Raymond Karczweski
>> Greg "Greegor Piggly Wiggly" Hanson
>> Dave "The Doctor"/"The Idiot" Yadallee
>> Richard Morton Scoville
>> none of the above

This is one of the closest races on the ballot. When the Pissbum Powerhouse and Rock Hard Stupid Hanson square off against each other, you know it's going to be a donnybrook. Now throw three more longtime kook contenders into the ring and you know it's going to be a showdown. On a weaker card any one of these nominees could walk away with the award.

THE WIZARD PREDICTS: The Pissbum Powerhouse after a bruising brawl.

>> CLUELESS NEWBIE OF THE MONTH
>> (vote for one candidate or for "none of the above")
>>
>> % Squiggle teh AssWorm
>> Janithor
>> none of the above

I'm favoring Janithor for this one. He's not so well-known as % and therefore is more likely to win an award for Newbies.

THE WIZARD PREDICTS: Janithor

>> COWARD OF THE MONTH
>> (vote for one candidate or for "none of the above")
>>
>> Janithor
>> Emmett Gulley
>> Alien
>> none of the above

Emmett and Alien are going to be duking it out on this one. Alien has some strong support, but there's a growing number of voters who want to make February 2012 the Month of the Pissbum Powerhouse.

THE WIZARD PREDICTS: Too close to call, my friends, too close to call.

>> GOLDEN KILLFILE
>> (vote "yes" or "no" for each candidate)
>>
>> Ras Michael Enoch (aka Michael McCarty)
>> fasgnadh

The Grand Wizard is almost embarrassed to speculate on this one. This is a case where even Edmo Wollmann could make an accurate forecast.

THE WIZARD PREDICTS: Golden killfiles for both Ras and fasgnadh

>> JOSEPH BARTLO "PATHETIC ANAL PINEAPPLE" AWARD
>> (vote for one candidate or for "none of the above")
>>
>> Emmett Gulley
>> MMFC (Mark Morgan Fan Club)
>> % Squiggles the Assworm
>> none of the above

Another tight, tight race. Given the MMFC's fascination with excrement, the Wizard feels they should get this award to match their 2008 Busted Urinal. Others might point to %'s long history of meaningless one-liners. But the wild card in this one is the Pissbum Powerhouse. He's got so much momentum going into this race that he will be tough to beat.

THE WIZARD PREDICTS: A close race between the MMFC and Emmett, but ultimately this is the Pissbum Powerhouse's award to lose.

>> PALMJOB PADDLE
>> (vote "yes or "no")
>>
>> Emmett Gulley

THE WIZARD PREDICTS: Gulley by a landslide.

>> VICTOR VON FRANKENSTEIN WEIRD SCIENCE AWARD
>> (vote for one candidate or for "none of the above")
>>
>> Emmett Gulley
>> fasgnadh

Fasgnadh's logical gymnastics should make him a shoo-in for this one, but it's difficult to count out the Pissbum Powerhouse in any race this month.

THE WIZARD PREDICTS: a slight edge for fasgnadh. But whoever wins, the Grand Wizard will be adding this award to our Wall of Trophies, since I represent both fighters.

>> GEORGE PICKETT MEMORIAL TROPHY
>> (vote "yes or "no")
>>
>> Emmett Gulley
> >
>> GEORGE ARMSTRONG CUSTER "KICKED @$$" AWARD
>> (vote "yes" or "no")
>>
>> fasgnadh
> >
>> BUSTED URINAL
>> (vote "yes" or "no")
>>
>> Emmett Gulley

THE WIZARD PREDICTS: Three more sure wins for the Grand Wizard's stable.

>> GOOFY AZZED BABBOON
>> (vote for one candidate or for "none of the above")
>>
>> Ras Michael Enoch (aka Michael McCarty)
>> Emmett Gulley
>> None of the above

The Wizard was sure that Ras Michael Enoch would be winning this one: if ever there were a goofy azzed baboon posting to Usenet, it's Ras. But then Emmett came in and made him a decided underdog in a competition that should have been his.

THE WIZARD PREDICTS: Emmett comes in from behind and takes this one.

>> TONY SIDAWAY MEMORIAL DRAMA QUEEN AWARD
>> (vote "yes" or "no")
>>
>> Emmett Gulley and Gregory Hall aka Capt Neal Warren

No competition. Gulley pulls ahead on this one and brings Captain Neal in his wake. (Be careful about any floating objects you may see in the water behind them).

THE WIZARD PREDICTS: Another triumph for the Wizard's stable.

>> UNABOMBER SURPRISE
>> (vote for one candidate or for "none of the above")
>>
>> Meowmix
>> fasgnadh
>> None of the above

Meowmix has a great deal of flonking support, but if the folks in alt.atheism pull together, the Wizard is confident that fasgnadh, confused soldier of god, will receive due credit for his voluminous and convoluted posting style.

THE WIZARD PREDICTS: Slight edge for fasgnadh.

>> 72 RAISINS "CRACKPOT RELIGION" AWARD
>> (vote for one candidate or for "none of the above")
>>
>> WeeSaul
>> Ras Michael Enoch (aka Michael McCarty)
>> alt.atheism
>> "Mangler"
>> None of the above

It's a pity that "mangler" came into such a crowded field. The Grand Wizard always wondered what might happen if Joan "Anal Rape at Microsoft" Brewer switched to Macs. I wonder no longer. WeeSaul has a strong coterie of supporters, as does alt.atheism. Ras Michael Enoch's take on Rastafarianism is also worthy of notice.

THE WIZARD PREDICTS: A too-close-to-call three way race between WeeSaul, alt.atheism and Ras Michael Enoch.

>> BOLO BULLIS FOAM DUCK
>> (vote for one candidate or for "none of the above")
>>
>> Emmett Gulley
>> Greegor "Rock Hard Stupid" Hanson
>> None of the above

THE WIZARD PREDICTS: Greegor will have to wait for another month. This one has "Pissbum Powerhouse" written all over it.

>> BALSA GAVEL
>> (vote "yes" or "no")
>>
>> Atlas Bugged

THE WIZARD PREDICTS: A win for Atlas Bugged.

>> BARBARA WOODHOUSE MEMORIAL- DOG WHISTLE AWARD
>> (vote for one candidate or for "none of the above")
>>
>> Neon Kachina trained by Checkmate, Johnny Dollar, and Fred Hall
>> Greg Hall, trained by Checkmate
>> Emmett Gulley trained by Albatross
>> None of the above

The Grand Wizard is a great handicapper, but this one puts all my skills to the test. We have a flonker candidate who's sure to bring in the flonk, and with Johnny Dollar in the picture we could see a swell of votes from alt.fan.karl-malden.nose. We've got Greg Hall, a longtime favorite among AUK voters. But once again the Grand Wizard will have to go with the Pissbum Powerhouse, although he might note that it's not entirely clear which half of the Pissbum/Albatross duo is blowing the whistle and which half is jumping on command.

THE WIZARD PREDICTS: The Pissbum Powerhouse and Albatross by a slight edge.

>> KOOKI INFORMATION MINISTER
>> (vote for one candidate)
>>
>> dsharavi <dsharavii@hotmail.com>
>> Agamemnon of rec.arts.drwho (incumbent)

THE WIZARD PREDICTS: As of right now, it looks like Agamemnon will hold onto this award. Perhaps dsharavi's supporters can band together and make this a more competitive race but at it stands the wizard is predicting a rout by Agamemnon.

>> MINISTRY OF CIRCLE JERKS
>> (vote for one candidate)
>>
>> Emmett Gulley,Greg Hall, %, and Janithor

>> Emmett Gulley, Alexander 'Dink' Cain and Albatross
>> The Creationist Vigilance Committee (incumbent)

There's no question that Emmett is going to win this one. While the Grand Wizard's heart is with the Gulley/Cain/Albatross ticket, I must do my handicapping with my immaculately turbaned head. While Dink is a favorite chewtoy here at AUK, he's no match for a ticket which features Greg Hall and this month's strongest KoTM and CNoTM candidates.

THE WIZARD PREDICTS: Emmett, Greg, % and Janithor.

>> OFFICE OF VILLAGE IDIOT
>> (vote for one candidate)
>>
>> Greegor Scott "Rock Hard Stupid" Hanson
>> Captain Neal aka Gregory Hall (incumbent)

A close, close competition here, folks. While nobody questions Greegor's utter idiocy, Captain Neal is certainly a cretin to contend with. The Grand Wizard feels that Greegor is a stronger - certainly a far stupider - candidate. But Hall might be able to hold onto this one for a while longer.

THE WIZARD PREDICTS: Hall by a nose, which he will be pinching shut as he tosses another bucket overboard.

>> AUK MASCOT
>> (vote for one candidate)
>>
>> Emmett Gulley
>> Bobbi Sanchez AKA Lady Veteran (incumbent)

LV has her fans, but I think she's going to be swept away in the tide of Pissbumania which has washed over AUK.

THE WIZARD PREDICTS: AUK, meet your new Mascot - the Pissbum Powerhouse.

>> GLOBAL VILLAGE PUMP
>> (vote for one candidate)
>>
>> fasgnadh
>> Onideus Mad Hatter (incumbent)

Onideus has long since moved on to greener pastures. The Pump is dead, long live the new Pump.

THE WIZARD PREDICTS: Polish your handle, fasgnadh, and get ready to give a suitably lengthy acceptance speech.

>> RICHARD M. NIXON "PATHOLOGICAL LIAR" AWARD
>> (vote "yes" or "no")
>>
>> Emmett Gulley
>>
>> THE DOUGLAS GRANT MEDAL FOR HISTORICAL REVISIONISM

>> (vote "yes" or "no")
>>
>> Emmett Gulley

THE WIZARD PREDICTS: Two easy wins for the Pissbum Powerhouse and the Grand Wizard of AUK.

>> HAMMER OF THOR
>>
>> (vote "yes" or "no")
>> Checkmate
>>
>> (vote "yes" or "no")
>> Albatross
> >
>> PIERRE SALINGER MEMORIAL HOOK, LINE & SINKER
>> (vote "yes" or "no")
>>
>> Fred Hall for "I got NETKKKOPPED at Altopia!" troll

THE WIZARD PREDICTS: All three of these gentlemen will be walking away with these awards of merit.

The Grand Wizard of AUK has spoken. Thank you all for listening.

--

In recent weeks, the Occupy Wall Street (OWS) anarchists have devolved from almost-comical whiners into residents of rat-infested enclaves in the nation's
capital, throwing bricks and Bibles at police and urinating on a crucifix in San Francisco, using storm drains as toilets in Charlotte, tossing condoms at Catholic high school girls in Providence, and rioting and burning American flags in Oakland.

That's not the half of the atrocities they have committed. There is more, much, much more.

So much for your liberal "I wanna change the world" crowds.

The Grand Wizard appreciates your campaign speeches, which are appropriately grunting, profane and monosyllabic. But you must realize my client Emmett Gulley, the Pissbum Powerhouse, has the Pathetic Anal Pineapple award in the bag for this month. Still, your efforts are not in vain. If you keep working hard, I'm sure you will yourself (or is that yourselves?) rewarded

for your efforts next month. And if Pope Snarky would be so kind as to post evidence that the MMFC is a one-man band, the Grand Wizard might even be able to get you drummed into the prestigious Order of the Holey Sockpuppet. I have some expertise on this topic, being as how I am a sock atop a sock and wearing a sparkly turban to boot.

The Grand Wizard of AUK has spoken. Thank you all for listening.

Pleace to be advised that the obsessed homophobic coward to whom you
are responding is offishully
addressed as "fanboi," as he is not the actual Mark Morgan, but
instead some radio ham (possibly
Wiseman, or maybe one of several others -- they're not a very
mentally stable crowd, radio hams,
though some aren't so bad;-{P}) who's been x-poasting to AUK from RRAP
as Mark since at least 2006.

Snarky

==> + WRC-12: THE FIRST WEEK

By IARU Secretary Rod Stafford, W6ROD

The International Telecommunication Union (ITU) 2012 World
Radiocommunication Conference (WRC-12) began January 23 in Geneva,
Switzerland. This is the "big show" for spectrum allocation matters and
a very important meeting if you are an Amateur Radio operator anywhere
in the world. Every four or five years, a WRC takes place; the last one
was in 2007. Approximately 3000 people are attending WRC-12. These are
government officials, telecommunication industry people and others --
like the IARU -- who have an interest in the use of the radio spectrum.
The agenda items discussed during WRC-12 were established at the
previous WRC in 2007. In the past 4.5 years, there have been many
committee meetings within the ITU to try to arrive at solutions that
```

will satisfy each of the agenda items. In the case of some of the agenda items, several possible methods to satisfy the agenda item have been identified. It is up to the WRC to select the most appropriate method to satisfy the agenda item, that is, to arrive at a worldwide solution to the issue presented in the agenda item. Read more here <http://www.arrl.org/news/wrc-12-the-first-week>.

==> + WRC-12: AGENDA ITEM 1.23 UPDATE

According to Colin Thomas, G3PSM, CEPT Coordinator for Agenda Item 1.23, WRC-12 delegates are progressing with what he calls a "compromise proposal" for an MF secondary allocation to the Amateur Radio Service. Agenda Item 1.23 calls for WRC-12 delegations to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur Service on a secondary basis, taking into account the need to protect existing services.

"Progress was made with a compromise proposal on Agenda Item 1.23, drafted to take into consideration the views of those for and those against an amateur service allocation around 500 kHz," Thomas explained. "This proposal suggests a 7 kHz segment between 472-479 kHz, very close to the CEPT position of 472-480 kHz <http://www.arrl.org/news/european-proposal-for-amateur-secondary-mf-allocation-clears-important-hurdle>.
Initial indications are that this could be acceptable to many administrations and regional organizations. However, various meetings need to take place to have these formally accepted. In order to tidy up the draft for the next meeting of the sub-working group, a weekend meeting of the drafting group will be held. At the time of writing [Saturday, January 28], the NOC (No Change) advocates steadfastly maintain their positions."

==> + FCC NEWS: FCC SETS DATE FOR MEDICAL DEVICES ON 70 CM

In November 2011, FCC Commissioners unanimously agreed <http://www.arrl.org/news/fcc-grants-secondary-service-allocation-to-wireless-broadband-medical-micropower-networks>
to allocate spectrum and adopt service and technical rules for the utilization of new implanted medical devices that operate on 413-457 MHz (70 cm). These devices will be used on a secondary basis as part of the Medical Device Radiocommunication (MedRadio) Service in Part 95 of the FCC rules. In the Federal Register for Friday, January 27 <http://www.gpo.gov/fdsys/pkg/FR-2012-01-27/pdf/2012-1540.pdf>, the FCC announced that the effective date for these new rules is Monday, February 27. The new rules expand the existing MedRadio Service rules to permit the use of new wideband medical implant devices that employ neuromuscular microstimulation techniques to restore sensation, mobility, and other functions to paralyzed limbs and organs. These medical devices hold enormous promise to advance the state of medical care, lower health costs, and improve the quality of life for countless Americans. The rules will allow these new types of MedRadio devices to access 24 megahertz of spectrum in the 413-419, 426-432, 438-444, and

451-457 MHz bands on a secondary basis.

==> + ARRL HQ: SAVE THE DATE! TAKE A VIRTUAL TOUR OF W1AW ON FEBRUARY 12

Join W1AW Station Manager Joe Carcia, NJ1Q, on a virtual tour of W1AW, the Hiram Percy Maxim Memorial Station <http://www.arrl.org/w1aw-antenna-farm>, the Amateur Radio station at ARRL Headquarters in Newington, Connecticut. Carcia will lead this tour via a live webcast on Sunday, February 12 at 5 PM EST (2200 UTC). Anyone with an Internet connection will be able to watch the tour here <http://www.awecast.tv/channels/arrl/>.

"We want viewers of this live Internet tour to feel as if they are actually at W1AW," Carcia explained. "If you came to W1AW in person, you would see the same things that we are going to show on the virtual tour: The three operating stations, the W1AW workshop, the transmitter racks that we use to send out our bulletins and use for the code practice transmission, the control console and Old Betsy <http://www.arrl.org/images/view/web_008.jpg>, Hiram Percy Maxim's personal spark gap transmitter."

Al Petrunti, KA1TCH, of the New Day Group <http://www.newdayhd.com/>, will follow Carcia as he leads viewers through the station. ARRL Staff members, including Media and Public Relations Manager Allen Pitts, W1AGP, and Chief Operating Officer Harold Kramer, WJ1B, as well as local television weatherman Geoff Fox, K1GF <http://www.geofffox.com/>, will also be on hand at W1AW during the tour.

"Hams around the world know of W1AW, and thousands have made contacts with this impressive station -- but most hams never get to see it," Pitts said. "Thanks to Al Petrunti's group, we hope that folks enjoy seeing what's at the other end of the signals. As in all live broadcasts, you never know just what might happen. We invite you to join us." Pitts is producing the live web tour.

This is the second video that the New Day Group has made for the ARRL. In 2011, they created the HR 607 video <http://www.arrl.org/hr-607> that educated radio amateurs of a bill in Congress that addressed certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network using current Amateur Radio spectrum.

==> + ARRL HQ: VOLUNTEER TOUR GUIDES MAKE YOUR VISIT TO ARRL HEADQUARTERS PLEASANT AND INFORMATIVE

When you visit ARRL Headquarters in Newington, Connecticut, the first smiling face you're likely to see is a tour guide. ARRL's Tour Guide program now includes 19 volunteers who donate thousands of hours of their free time per year, giving tours to hundreds of visitors. ARRL's tour guides are an integral part of the ARRL. When not giving tours, they are busy accomplishing tasks in various HQ departments -- sorting QSL cards, working on special projects in the lab, updating the

periodicals archive, and much, much more. Read more here
<http://www.arrl.org/news/volunteer-tour-guides-make-your-visit-to-arrl-hq-pleasant-and-informative>.

==> +ARRL FIELD DAY: 2012 FIELD DAY PACKET NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 23-24, 2012! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/fieldday> and include the complete rules, as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. A brief one-page flyer with basic "What is Field Day" information has also been included in this year's Field Day packet. Amateur Radio clubs and individuals are encouraged to reproduce this flyer as a handout for information tables.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of January -- takes a look the 2012 World Radiocommunication Conference, the ARRL Board of Directors' 2012 Annual Meeting, new ARRL books, new antennas at the W1AW antenna farm, FCC decisions affecting Amateur Radio, reports from the Official Observer Desk and more. Read more here
<http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-42>.

==> + ON THE AIR: 4U1ITU NOW 4U1WRC DURING WRC-12

4U1ITU <http://life.itu.ch/radioclub/> -- the Amateur Radio station at the ITU -- will be signing as 4U1WRC during the 2012 World Radiocommunication Conference (WRC-12), through February 17. The station will revert to 4U1ITU just in time for the ARRL International DX CW Contest <http://www.arrl.org/arrl-dx>, scheduled for February 18-19. According to ARRL Chief Executive Officer David Sumner, K1ZZ, who is attending WRC-12 as the IARU International Secretariat, the station is in really good shape, with two operating positions capable of going on any two bands at the same time. "A number of delegates are active amateurs, so the station should be quite active for the next several weeks," he said. Amateurs who work 4U1WRC between January 23-February 17, 2012 can receive a special QSL card via the HB9 Bureau or by QSLing direct to IARC, PO Box 6, CH-1211 Geneva 20, Switzerland.

==> SOLAR UPDATE

Tad "Strolling slowly toward the Sun
<http://www.youtube.com/watch?v=jYix2LttoB0>" Cook, K7RA, reports: Over the past reporting week -- January 26-February 1 -- the average daily sunspot number declined nearly 37 points to 62, while the average daily

solar flux was off nearly 21 points to 120.4. The predicted solar flux for the near term is 120 on February 2-5, 110 on February 6-9, 150 on February 10, 155 on February 11-13, 150 on February 14-19, and then 145 on February 20-23. The forecast in mid-January for flux levels at 165 on February 17-21 are but a distant memory. Shortly after the last bulletin was released on Friday, January 27, a powerful X-class solar flare was released at 1837 UTC, but it was not Earth-directed. Look for more information on the ARRL website on Friday, February 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Sugarloaf's Green Eyed Lady <http://en.wikipedia.org/wiki/Green_Eyed_Lady>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 3 -- NCCC Sprint Ladder
- February 4 -- Minnesota QSO Party; FYBO Winter QRP Sprint; AGCW Straight Key Party
- February 4-5 -- Vermont QSO Party; Delaware QSO Party; British Columbia QSO Party; Mexico RTTY International Contest; 10-10 International Winter Contest (SSB); YL-ISSB QSO Party (CW); Black Sea Cup International; EPC WW DX Contest
- February 5 -- North American Sprint (CW)

Next week:

- February 10 -- NCCC Sprint Ladder
- February 11 -- FISTS Winter Sprint
- February 11-12 -- Louisiana QSO Party; New Hampshire QSO Party; CQ WW RTTY WPX Contest
- February 12 -- North American Sprint (SSB); SKCC Weekend Sprint
- February 12-13 -- Classic Exchange (Phone)
- February 13-17 -- ARRL School Club Roundup <http://www.arrl.org/school-club-roundup>
- February 14-15 -- PODXS 070 Club Valentine Sprint (local time)
- February 15 -- NAQCC Straight Key/Bug Sprint; AGCW Semi-Automatic Key Evening

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ARRL CONGRATULATES: RALPH TAGGART, WB8DQT , WINS JANUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for January is Ralph
Taggart, WB8DQT , for his article "Vintage Low Power Radios. "
Congratulations Ralph! The QST Cover Plaque award -- given to the
author or authors of the best article in each issue -- is determined by
a vote of ARRL members on the QST Cover Plaque Poll Web page
<http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your
favorite article in the February issue today.

Amateur Radio Newsline(tm) Report 1799 - February 3 2012

Amateur Radio Newsline report number 1799 with a release date of February 3rd, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amateur radio is still live and well at WRC 2012; an Arizona ham files a petition with the FCC to expand the scope of PRB-1; medical implant devices coming to 70 centimeters on February 27th and meet a young ham who not only flies high altitude balloons but makes amazing videos with the pictures that they capture. All this and more on Amateur Radio Newsline(tm) report number 1799 coming your way right now.

(Billboard Cart Here)

RADIO LAW: WRC-2012 STILL CONSIDERING NEW HAM RADIO ALLOCATION NEAR 500KHZ

Ham radio is very much alive as a discussion topic at the 2012 World Radiocommunications Conference now taking place in Geneva Switzerland. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the latest:

--

Rod Stafford, W6ROD, secretary for the International Amateur Radio Union's Region 2, says from his vantage point, it appears that there are several member countries that are in favor of granting the amateur radio service an allocation somewhere in the 415 to 526.5 kHz range.

It had been proposed to carve out a 15 kHz section for amateur use.

However, Stafford says those engaged in the discussions say there is a need to protect existing services.

And, Stafford says in a report on the WRC proceedings so far that there appear to be a couple of options:

First, a secondary allocation of up to 15 kHz to the amateur radio service on a worldwide basis between 472 kHz and 487 kHz.

Second, two non-contiguous worldwide secondary allocations to the amateur radio service between 461 and 469 kHz and 471 to 478 kHz, totalling 15 kHz.

Third, a proposal for a worldwide secondary allocation of 8 KHz from 472 to 480 kHz.

And, finally, no change or allocation.

He says some countries are concerned that non-direction beacons that operate in the spectrum could be subject to possible interference from any new allocations to amateur radio. Stafford's assessment is that it's still early in the process to determine whether amateur operators will succeed in getting the spectrum allocation.

He says there's one other item of concern to amateur radio operators and the IARU being discussed at the conference.

That's a bid for oceanographic radar applications in the 3 to 50 MHz range.

Stafford says the IARU's position is the oceanographic radar applications are incompatible with the amateur and amateur satellite services in the range 3 to 50 MHz and should not be allocated in bands already allocated to the amateur and amateur satellite service, including 5.250 to 5.450 MHz.

WRC-12 wraps up on Feb. 17 and Stafford promises he'll keep the amateur community apprised of developments as they occur.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

As an aside, the International Amateur Radio Club in Geneva is on the air using the special call 4U1WRC during the 2012 World Radiocommunication Conference. It's operating all modes on 160 through 6 meters until the close of the conference on February 17th. If you work this special commemorative station please QSL via 4U1ITU.

(WRC 2012)

**

BREAKING DX NEWS: A GLOOMY FUTURE FOR DXPEDITIONS TO JAN MAYEN ISLAND

Jan Mayen Island could soon head to the top of the DX worlds most wanted this. This as the result of a recent decision by the Norwegian government that declared most of Jan Mayen a Nature Reserve and banned landings and camping on most of the island. This means that tour operators can no longer visit since the main landing area is part of the Reserve.

The only places left on the island which could be used as landing and camp sites are in the very extreme southern part of Jan Mayen which suffers from extreme weather conditions. Amateur radio operations may still be possible from the two locations but both are difficult to get to due to stormy seas and other severe weather conditions. As such it now appears that the recent JX5O operation was probably the last major DXpedition to Jan Mayen for many years to come.

There is the chance that hams who might be assigned as staff members at the islands Olonkin base will be able to activate Jan Mayen. Late word is that LA9JKA, is to be there beginning March 22nd and is expected to stay until March 2013 but what plans he has to operate from the island at this point are unknown. (Southgate)

**

RADIO LAW: MEDICAL IMPLANT DEVICES COMING TO 70CM ON FEB. 27

Monday, February 27th is the date when medical monitoring and control devices previously approved by the FCC could start showing up in various segments of the 70 centimeter band. Amateur Radio Newsline welcomes Chris Szpila who has this report:

--

As reported here on Newsline, last November the FCC voted to allocate spectrum for use by new implanted medical devices that operate on 413 to 457 MHz range. These devices which range from short range monitors to more advanced diagnostic and treatment gear will be used on a secondary basis as part of the Part 95 Medical Device Radiocommunication Service. The rules established by the FCC allow access 24 megahertz of spectrum on a secondary basis in the 413 to 419, 426 to 432, 438 to 444, and 451 to 457 Megahertz bands.

Amateur radio should hear little in the way of interference from any of these devices to signal reception. What's not known is the effect of nearby high power transmitters from various services across the spectrum to the operation of these devices or the ability of any remote transceiver system to hear their telemetry and send instructions back to these implanted units. Most researchers believe this to be minimal to none at all.

For the Amateur Radio Newsline, I'm Chris Szpila, in Los Angeles.

--

The most important aspect of these devices will be their benefit to mankind by restoring mobility and other functions to paralyzed limbs for those who cannot now use them now. (FCC)

**

RADIO LAW: ARIZONA HAM FILES FOR RULE MAKING TO EXTEND PRB1 TO OVERIDE CCR RESTRICTIONS

A petition to the FCC to extend PRB-1 exemptions to cover outdoor antennas in communities with Condition, Covenant and Restrictions has been filed with the FCC by Arizona resident Leonard J. Umina, W7CCE.

Umina's petition is based on an Equal Rights claim. He says that to establish the assertion it is necessary to ascertain that certain classes of amateurs are and / or were in identical situations with regard to those who received relief from PRB-1 but were not equally

treated by the regulation.

Umina states that what he terms as the "move elsewhere" philosophy of PRB-1 fails to address classes of amateurs who were born into restrictive areas and those who had no part in selecting where they would reside.

Umina notes that because over 66% of Americans now rent and that that Homeowners Association market penetration has skyrocked. This at the same time that the urban population has increased to 75%. As such, Umina suggests that it is finally time for the FCC to act by extending PRB-1 in its present form to negate private contracts better known as CC&R's.

Umina asks that special exemptions be applied to wire antennas so that simple rules exist in allowing for easier participation by youth and those who otherwise might be confused by complex regulation and court decisions. Umina also asks that Shortwave Listener and the commercial shortwave market be considered.

Most important, Umina asks that no significant changes be made which would compromise existing District Court decisions which upheld PRB-1 application. As we go to air the FCC has not yet assigned a rule making designation to W7CCE's petition filing. (QRZ.com)

HAM RADIO IN SPACE: RS-39 NOW ON-ORBIT: RECEPTION REPORTS WANTED

The Chibis-M microsatellite, also known as RS-39, was placed on-orbit from a Russian Progress M cargo spacecraft on Tuesday January 24th. The satellite is designed to study atmospheric phenomena such as Terrestrial Gamma Ray Flashes associated with lightning.

RS-39 also carries CW beacons on 435.215 and 435.315 MHz. Hams hearing these signals are being asked to submit reception reports via e-mail to the Space Research Institute of the Russian Academy of Sciences at amateur-rs39 (at) chibis (dot) cosmos (dot) ru. Each report will be acknowledged with a special QSL card.

We will have more ham radio space related news later on in this week's Amateur Radio Newsline report. (Southgate)

HAM HAPPENINGS: ARRL TO PRESENT LIVE WEB TOUR OF W1AW ON FEBRUARY 12

Never seen the ARRL Headquarters station W1AW? Well you can do so vicariously through a webcast. Amateur Radio Newslines Heather Butera-Howell, KB3TZD, has the details:

--

The ARRL and Al Petrunti, KA1TCH, of The New Day Group have teamed up to present the first ever on-line tour of the League's flagship station W1AW. The live webcast takes place on February 12th beginning at 5 p.m. Eastern time.

According to ARRL Public Relations and Media Coordinator Allen Pitts, W1AGP, many hams around the world know of W1AW. Thousands have made contacts with this impressive station, but few ever get to observe it in person.

Pitts who is producing the event says that thanks to Petrunti's media streaming group, people world-wide should enjoy seeing what's at the other end of the signals from W1AW.

Pitts notes that through the webcast viewers will be there as Petrunti, along with local weatherman Geoff Fox, K1GF, and others are given a tour of W1AW by Station Manager Joe Carcia, NJ1Q. W1AGP says that as in all live broadcasts, you never know what might happen.

Again, you can watch the webcast live on Sunday, February 12th beginning at 5 p.m. Eastern at www.awecast.tv/channels/arrl. W1AGP says that he hopes you enjoy the tour.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburgh, Pennsylvania.

--

Al Petrunti, KA1TCH, is no stranger to ham radio video projects. He was the creative force behind the ARRL video about HR-607. More about the New Day Group at www.NewDayHD.com. (ARRL)

**

RADIO LAW: NEW TOWER RULES FOR THE BIRDS

The FCC's new rules affecting tower sitting for certain tall towers, meant to protect migratory birds, have been published in the Federal Register. However, they have not yet become effective.

Some aspects of the new rules adopted in December need approval by the Office of Management and Budget. The FCC will publish a subsequent notice in the Federal Register announcing the effective date.

To recap, towers above 450 feet tall will face more analysis. Owners will need to do an environmental assessment and allow the public time to comment on where a new tower would be placed before construction accomplishing this through methods such as a newspaper notice or local

zoning public notice process. An environmental notice will also be required if an applicant changes the lighting of an existing tower to a less preferred style.

Very few if any ham radio towers are 450 feet or higher and are not affected by the new rules. However they do make for some very interesting reading. You can see these new bird safety tower rules at tinyurl.com/tower-birds-two. (FCC)

**

ENFORCEMENT: ANOTHER FLORIDA UNLICENSED BROADCAST FINE AFFIRMED

The FCC has affirmed a $10,000 fine to Willis Cernogg, Jr. of Miami, Florida. This for willful and repeated violation of Section 301 of the Communications Act by operation of an unlicensed radio transmitter on the frequency 90.7 MHz.

Back on October 25th, 2011, the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Cernogg. The FCC says that Cernogg never filed a response to the N-A-L. So, based on the information before it, the FCC has now affirmed the forfeiture.

As is normal procedure, Cernogg was given the customary 30 days from the January 25th date the order was released to pay the fine or file an appeal. If he fails to do either, the FCC will likely turn the matter over to the Department of Justice for collection. (FCC)

**

PUBLIC SERVICE: HAMS TEAM WITH CRIME STOPPERS IN MISSOURI

Members of the Barry-Lawrence Chapter of Crime Stoppers in Cassville, Missouri are joining forces with ham radio operators. This, to help keep an eye out for the thieves who have been stealing and burning vehicles in two counties.

Katherine Parker, KD0ETX, is the Assistant District Emergency Coordinator for both Barry and Lawrence counties. She says that general warnings could be issued to operators across the region to be aware of the situation and report suspicious activities occurring in their neighborhoods.

During their January meeting, the Crime Stoppers board members also approved offering a reward for information leading to the arrest of those responsible for the hundreds of thousands of dollars in property damage resulting from these recent crime sprees. Chairman John Strong also recommended organizing citizen patrols for parts of both counties, with suspicious activity reported back to local law enforcement agencies. (Cassville Democrat)

ON LINE NEWS: QRZ.COM ADDS GRIDMAPPER SERVICE

Another service has been added to QRZ.com. Called the Gridmapper this feature allows you to see the grid square on a Google map of the station you are looking up. A six character square is outlined. This is very handy for VHF and UHF enthusiasts who try to find and activate rare locations in the Maidenhead Grid Square location system. (K8YSE)

HAM MARKETPLACE: UK INNOVANTENNAS COME TO NORTH AMERICA

InnovAntennas have come to North America. According to Bill Hein, AA7XT, the full line of high performance British built High Frequency, VHF and UHF amateur radio antennas from InnovAntennas are now available to customers across the United States at R&L Electronics in Hamilton, Ohio.

By way of background, InnovAntennas was launched in 2011 by Justin Johnson, G0KSC. This after his hobby of designing antennas for his personal use led to a flood of make one for me requests from amateur radio operators who recognized that Johnson's designs outperformed they could buy in any U-K store.

Today, InnovAntennas is building antennas at a former boat factory in Canvey Island, England and selling its products directly via InnovAntennas.com and via a network of dealers in Europe, Australia, and now, the United States. Designs include the Loop Fed Array and Opposing Phase - Driven Element System Yagis both of which have become very popular in the world of Moonbounce or E-M-E operations.

For more information on the introduction of InnovAntennas to the United States ham radio marketplace, you can e-mail AA7XT to bill (at) innovantennas (dot) com. You can also check the R and L website at www.RandL.com. (AA7XT)

HAM MARKETPLACE: YAESU HINTING IT WILL BRING OUT C4FM DITIAL VOICE GEAR FOR AMATEUR RADIO

Yaesu is hinting that they will be coming out with new digital amateur radios in 2012.

A new pamphlet discussing amateur digital radios shows the new Vertex Standard APCO P-25 commercial radios, as well as new amateur radios based on the C4FM FDMA digital audio system commonly known as MotoTrobo.

The pamphlet makes it appear that Yaesu will be offering amateur gear based on the MotoTrobo digital standard sometime this. The new vertex radios look identical to their Motorola counterparts.

Our guess is that any launch of such a project would likely take place at the Dayton Hamvention in mid-May. (Adapted from Yaesu Press

Release)

HAM HAPPENINGS: AARA TO HOLD ITS 52ND HAMFEST IN RAYNE LOUISIANA MARCH 9-10

The Acadiana Amateur Radio Association will hold its 52nd annual hamfest at the Civic Center in Rayne, Louisiana. The dates are March 9 and 10 and the event will feature ARRL Education and Technology Program Coordinator Mark Spencer WA8SME as its special guest speaker. For entertainment Norm Helms K5SAC will be heading up the Texas Ham Playboys band.

This hamfest has been designated as the 2012 ARRL Louisiana State Convention and planners say that they are looking forward to seeing many of you there. More information about this fun event is on-line at www.w5ddl.org/hamfest. (KN5GRK)

**

HAM HAPPENINGS: DX UNIVERSITY 2012 APRIL 20TH IN VISALIA CA.

The 2012 DX University will take place on the Friday April 20th in conjunction with the International DX Convention in Visalia, California. Among this years lecturers are Bob Allphin, K4UEE; Bernie Mc Clenny, W3UR; Rusty Epps, W6OAT; Bob Locher, W9KNI, and a number of other world famous DX'ers many of whom are inductees of the CQ DX Hall of Fame. Together they will teach many of the operating techniques for working DX. You will also get the DXpeditioner's view of how DXers should operate to get into the log. Registration is available on line at www.dxuniversity.com. For further information please contact Wayne Mills by e-mail to N7NG (at) arrl (dot) net or Roger Western, at G3SXW (at) btinternet (dot) com. (DX University)

HAM RADIO TECHNOLOGY: ROS JOINS US EXPERIMENTAL SPREAD SPECTRUM TEST STA

R-O-S is among a number of modes raking part in spread spectrum experiments in the USA. The R-O-S data mode group reports that the FCC has issued a Special Temporary Authority to a United States based experimental group for the purpose of investigating Spread Spectrum

modes within the USA.

According to the press release from Graham Brown, G0NBD, Phil Williams, KA1GMN, of Euless, Texas has been issued the first license with the call WF9XJD. Williams was scheduled to become active on February 1st.

Brown says that anyone wishing to apply for a STA or be one of the designated receiving stations, should contact Williams directly at ka1gmn (at) gmail.com for details of the application process. Reports and QSO's are of course, most welcome from all.

The licenses are issued on a 6 month rolling basis and can also be applied directly from the FCC at tinyurl.com/fccsta. (G0NBD, Southgate)

HAM RADIO IN SPACE: SUMBANDILLASAT FAILS ON-ORBIT

South Africa's Defence Web reports that the nations second satellite, SumbandilaSat also known as SO-67 is no longer fully operational.

Rob Olivier is the head of Business Development at SunSpace. He told Defence Web that although contact can still be made with the satellite, it cannot capture images. As such it is no longer fulfilling its main purpose.

Oliver added that chances of repairing the satellite onorbit are virtually none. As such SunSpace has moved on to other projects.

SumbandilaSat was damaged during a solar storm in the June of 2011. The power supply to its onboard computer stopped working and the satellite stopped sending back images.

In addition to its primary mission SumbandilaSat also carried an radio payload as well. This consisted of a voice beacon, a store and forward parrot repeater and VHF to UHF FM repeater. (Defence Web)

HAM RADIO IN SPACE: WINNERS OF ARISSAT-1 CHICKEN LITTLE CONTEST ANNOUNCED

AMSAT and ARISS announced the winners of its ARISSat One Chicken Little Contest to predict when the hand-deployed bird would fall from the sky. The contest received 77 entries from 17 different countries, from all continents except Antarctica.

In the Kindergarten through grade 8 grade sector the winner was Cora Haefner, KK4ECV, of Fort A.P. Hill, Virginia. In grades 9 through 12 it was the Cameron School in Lancashire, in the United Kingdom. The Adult category winner was Thomas Frey, HB9SKA, of Birr, Switzerland.

Based on comments sent along with the submissions, a wide variety of techniques were used. These ranged from detailed calculations, to comparisons with past satellites, to guesses based on birthdays. In

the end, both KK4ECV and HB9SKA were within 15 hours of the best data from Space Track. It had reported that the remnants of ARISSat One splashed down in the South Atlantic approximately 07:00 UTC on January 4th.

All three winners have been sent a Chicken Little Certificate, and the congratulations of the ARISSat One team. The contest sponsors say that they also want to tank all those who entered, especially educators who worked with students on this project. (AMSAT / ARISS)

ON THE AIR: BCARA TO COMMEMORATE WASHINGTON'S BIRTHDAY ON THE AIR

On the air, word that Ohio's Butler County Amateur Radio Association will be sponsoring special event station W8WRK from February 18th to the 26th. This to commemorate a historic Washington's Birthday amateur radio message relay which was originally accomplished on February 22, 1916 by members of the American Radio Relay League. The special event will be conducted from the clubs home station which is located in the original building of Special Land Station 8ZU. For operating times, frequencies and QSL information please visit tinyurl.com/6og8epf on the World Wide Web. (KD8RLA)

**

DX

In DX, W1NN and JA1LZR will be operational as NH0J and NH0Z, respectively, from Tinian, in the Northern Marianas, until February 4th. Their activity is focused on the lower bands using an Elecraft K3 transceiver an amplifier and a quarter wave verticals. QSL this one as directed on the air.

EA5BYP and EA5KM will once again be active from Annobon Island and Bioko Islands. The pair plan to arrive in Equatorial Guinea by the middle of February and then travel first to Bioko using the callsign 3C6A and then on to Annobon as 3C0E. Activity will be on 160 through 6 meters. Exact dates of this operation should be announced shortly. QSL both callsigns via EA5BYP.

W6HGF, will be on the air stroke FP from Miquelon Island between February 10th through the 20th. Activity will be on 160 through 10 meters but focused on the Digital modes, mostly RTTY. QSL via Logbook of the World or to W6HGF, direct or via the bureau.

NP4Z will be active as EE8Z from the Los Chachos Contest Club in the Canary Islands. This, during the CQ World Wide SSB Contest from March 24th to the 25th. QSL via EA8AY.

Lastly, ZS4U will be operational portable 9Q6 from the Republic of the Congo between March 10th and April 5th. Activity will be limited, probably mainly on the weekends and some days during the week. Listen out for him between 1200 and 1600 UTC on 40 through 6 meters using CW,

SSB and PSK31. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: HACK THE TUBE - A TRIP TO THE EDGE OF SPACE BY TEEN HAM ERIN KING, AK4JG

And finally this week, Erin King, AK4JG, of Columbia, Georgia, may only be a teenager but she has already left a very positive imprint in our world of amateur radio. Cheryl Lasek, K9BIK, has the details on Erin's magic carpet ride to the edge of space and the video that is taking the ham radio community by storm:

--

Erin King, AK4JG has posted a video of her recent amateur radio high altitude balloon mission for the 'Hack the Tubes' project. This, for the Massachusetts Institute of Technology's class of 2016's early admissions program. And when you see it you will find it hard to believe that both the flight and the video are the work of a very, very talented teen.

According to AK4JG, she decided to send her Tube to the edge of space by turning it into an amateur radio high-altitude ballooning project. To accomplish this, Erin used two GPS and APRS-equipped transmitters for payload tracking. One of these signed the call AK4JG-11 and the other beaconed her fathers call sign of K4ETY-11. Each one sent out position packets from the Tube so Erin could follow it on the ground.

Also on board the tube-shaped payload was an Earth viewing GoPro Hero camera shooting high definition video. And capture some breathtaking video of the entire flight it did.

Erin's payload was carried aloft by a Helium filled 800 gram weather balloon. Takeoff took place on January 16th at around 1 P.M. Eastern time from Lumpkin, GA. The entire flight from launch to landing lasted about 2 hours. That is all compacted to 8 [illegible] minutes during which Erin's video takes you from initial payload assembly of the trackers to the edge of space at over 90,000 feet and to recovery of the payload from where it landed in a pine tree.

The video is set to the music of "Circuit" by Sonic Adventure Project. There is no narration. Instead Erin and her very professional video editing skill lets the pictures tell the entire story. You can see it for yourself by taking your web browser to tinyurl.com/AK4JG-balloon video.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Again, you will find Erin's video on-line at tinyurl.com/AK4JG-balloon-video. Go take a look. You will be glad that you did.

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350.

Before we go, a note to those listeners who have reported hearing Amateur Radio Newsline played in what might best be called unexpected places and asking why we are doing it. The answer is that we are not. Amateur Radio Newsline only produces a newscast and distributes it via the Internet and automated telephones. We have no transmitting equipment and we broadcast nothing. Since our inception as the Westlink Radio Network back in 1976 right on to today as the Amateur Radio Newsline, we have been and continue to be a ham radio news program supplier and nothing more.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, in sunny Vero Beach, Florida, saying 73 and we thank you for listening.

Amateur Radio Newsline(tm) is Copyright 2012. All rights reserved.

The Grand Wizard has not been able to attend any circuit parties for
some years, as I have been far too busy globe-trotting for my career.
Hence, I was not familiar with the term "rusty trombone." Now that I
have Googled the phrase, I must say that I was none the poorer for my
ignorance.

However, the Grand Wizard appreciates your efforts at educating me -
especially given as you have precious little education to spare.
Accordingly, let me present you with something which the whole fan club
can share amongst themselves.

http://www.ebay.com/itm/12-LOT-Brown-Paisley-HEAD-BANDANAS-SCARVES-BRAND-
NEW-WHOLESALE-CLOSEOUT-SALE-/110802967235?pt=US_Hats&hash=item19cc5f1ac3

I neither know nor care which pocket you want to hang these from. But I
trust they will not be wasted on you - whether that "you" be singular or
plural.

The Grand Wizard of AUK has spoken. Thank you all for listening.

--

It's a crying shame how Mr. Tavek turned into just another trite and
boring stAUKer.

He used to be worth reading, now he's a waste of time.

i can't spend all that bother , boner seems to say it all for me ,
if there ever was one that triggers on anything male down to a mosquito ,
he is the essence of , " boner "

[IARU-R2-News 160] Special WRC Report Number Two
2012-02-03

The procedures used by the International Telecommunication Union (ITU) before and during a World Radiocommunication Conference (WRC) seem complicated. They are somewhat complicated but they are understandable with a bit of background.

Each agenda item that will be decided at a WRC has been studied for at least 3 or 4 years leading up to a WRC. ITU Working Parties discuss the issues involved in the agenda item. Compatibility studies, sharing studies, experiments, etc. take place whenever needed so that discussions and decisions can be made based upon facts rather than opinions. Within a year prior to the start of a WRC an important meeting called the Conference Preparatory Meeting (CPM) occurs. The CPM report pulls together all of the information dealing with each of the agenda items and sets forth the various ways, if there is more than one, that an agenda item can be satisfied or decided. By the time of the CPM, most all of the arguments in favor of the agenda item and opposed to the agenda items have been thoroughly discussed in the many meetings that take place regarding each agenda item. When a national administration arrives at the WRC, decisions have generally been made by that administration whether to be in favor or opposed to any particular agenda items. However, it is usually not that clear cut. Some administrations may be in favor if certain adjustments or modifications are made to one or more of the proposed methods to satisfy the agenda item. In other words, discussions and negotiations really get started during the earlier stages of the WRC. For example, Administration X may withhold support or opposition on a specific proposal until other administrations agree to support Administration X.s position on other agenda items that Administration X is very interested in.

At the beginning of the WRC, each agenda item is assigned to a Sub-Working Group (SWG) to allow interested administrations and other interested attendees the opportunity to discuss the agenda item. This is the stage where most of the negotiations and compromises are made in order to arrive at a consensus as to how to decide the agenda item. The preferred way is to have a consensus by the SWG attendees. Many times the consensus is achieved by all parties realizing that the result may very well turn out to be a situation where "everyone is a little bit unhappy".

The flow of the work is that the output of the SWG goes to the Working Group level. After the WG (WG)level deals with the issue it moves to the Committee level. By the time the issue gets to the Committee level, revisions to the work done at the lower levels is generally not done. Once the agenda item passes the Committee level, it goes to the Plenary for two readings. If it passes the two readings the agenda item appears in the Final Acts of the WRC.

There are also times when a consensus by ALL parties is just not possible. An agenda item can move from the SWG stage to the Working Group stage where most administrations have reached a consensus on how to resolve the issue but there are still some administrations that are in favor of No Change (NOC).

Agenda Item 1.23. In the case of agenda item 1.23, there was a good deal of support among administrations at the SWG level for a secondary allocation to amateur radio just below 500 kHz. However, there was strong resistance by several administrations to the allocation based upon a stated concern that amateur operation in that portion of the spectrum could cause interference to Non-Directional Beacons. SWG 4C3 (the SWG dealing with agenda item 1.23) met 12 times over a period of ten days trying to arrive at a consensus on 1.23. Finally, a consensus was achieved on the issue by adding various footnotes dealing with the allocation that satisfied most of the administrations opposing the allocation. At the end of the day, there were still a couple of administrations opposing the allocation. As a result, the SWG elevated the issue to the Working Group level with 2 options to satisfy the agenda item:

1) a secondary allocation to the amateur service in the band 472-479 kHz with certain operating conditions set forth in footnotes to the allocation, or

2.) No Change (in other words, no amateur allocation).

The proposal that has been agreed to by most administrations that support the amateur allocation calls for a worldwide secondary allocation to the amateur service at 472 to 479 kHz with a power limit of 1 watt e.i.r.p., but with a provision for administrations to permit up to 5 watts e.i.r.p. for stations located more than 800 km from certain countries that wish to protect their aeronautical radionavigation service (non-directional beacons) from any possible interference. Proposed footnotes provide administrations with opportunities to opt out of the amateur allocation and/or to upgrade their aeronautical radionavigation service to primary if they wish to do so. In addition to these protections for aeronautical radionavigation, the amateur service must avoid harmful interference to the primary maritime mobile service.

At the Working Group meeting, there was no shifting of positions so the matter was elevated to the next level to Committee 4 with the same 2 options. The Committee 4 meeting takes place on Tuesday, 7 February. I will report on the results of that Committee 4 meeting but based

upon the results thus far, I am cautiously optimistic that the amateurs will have a new secondary allocation at 472-479 kHz.

Agenda Item 1.15. Another agenda item being carefully watched by the IARU is agenda item 1.15 dealing with oceanographic radar. One of the candidate bands for the placement of oceanographic radar is 5.250 to 5.275 MHz. There have been a number of administrations that have granted amateurs access to spectrum around 5 MHz. In fact, one of the bands listed by IARU as a future allocation is 5 MHz. If oceanographic radar is operating in the 5.250-5.275 MHz band, that may impact the ability of the amateurs to obtain an allocation in that area. The candidate bands have not been finalized as yet at the WRC.

Rod Stafford W6ROD
IARU Secretary - Region 2

EXAMPLES OF PROPHET’S MERCY UPON NON MUSLIMS

Ex. No. (1)

It was narrated that ‘Aisha, May Allah be pleased with her, said to the Prophet, Peace be upon him: "Have you ever come across a day harder than the day ofUhod (one of the battles with the polytheists, in which Muslims were defeated failing to comply with the Prophet's instructions)?" He replied: "I have suffered from your people a lot. The hardest I suffered was on the day of Akaba (a place name). I brought out my message to Abd Yaleil bin Abd Kalal. He did not respond positively to what I called him for. I left there with a grief-stricken face. I did not wake up from that feeling, until I was near Karn-Ath-Tha-aleb (a place name). I raised my head, where I found a cloud casting its shadow over me. Upon looking, I saw Jibril (the angel) into it. He called upon me: Allah (the Almighty) has heard the saying of your people, and what kind of reply they gave to you. Allah has sent the angel of the mountains for you ready to do with them whatever you ask. The angel of the mountains called, and saluted me saying: "Oh Muhammad, what I do will be as you request. If you want, I close the two mountains on them?" The Prophet, Peace be upon him, replied: "Instead of that, I am hoping that Allah (the Al mighty) will create from their offspring people who worship Allah alone, without ascribing partners unto Him" narrated by Al Bukhari.

Ex. No. (2):

It was narrated that Ibn-Omar (the son of Omar), May Allah be pleased with both of them, said that after one of the battles of the Prophet PBUH, a woman was found killed. In response, the Prophet PBUH prohibited the killing of women and children. Narrated by Al Bukhari.

Ex. No. (3):

Anas-bin-Malek, May Allah be pleased with him, said:
A Jewish youth who served the Prophet, Peace be upon him, became ill, and the Prophet paid him a visit. The Prophet, peace be upon him, sat near the youth's head, and he spoke to him saying: "Embrace Islam". The youth averted his eyes towards his father, who was also beside him. The father told his son: "ObeyAbal-Kassem (one of the common names of the Prophet PBUH)". The youth embraced Islam (before dying), and the Prophet, peace be upon him, went out saying: "Thanks to Allah (the Almighty) Who rescued him from hellfire." narrated by Al Bukhari.

Ex. No. (4):

Abdullah Ibn-Amr, May Allah be pleased with both, reported that the Prophet, peace be upon him, said:
"He who kills a promisor (a non-Muslim living among Muslims where he is promised to have protection, and he promises not to help enemies against Muslims, hence, he is called 'a promisor'), will not smell the fragrance of paradise, though its fragrance is recognizable from a distance of forty years." narrated by Al Bukhari.

Ex. No. (5):

Boraida-bin-Al-Hosaib reported that when the Prophet, peace be upon him, delegated a prince to lead an army or a small army, he advised him, and Muslims with him, to be devoted to Allah, and to act to the common good. Then, he said: "Your battle should be in the name of Allah, and for His sake. Fight disbelievers. Fight, but don't exaggerate, don't cheat, don't mutilate, don't kill a new-born child. If you meet your enemies of polytheists call them for one of three options. Whatever they take, you must accept, and stop fighting them. Call them to Islam. If they take it, accept, and stop fighting them. Then call them to transfer from their home to the home of immigrants (Al Madina, or Hijra house, where all Muslims, at the start of Islam gathered). Tell them if they do so, they will have the same rights and duties of the immigrants. If, however, their choice was not to transfer from home, their status will be the same as the Muslim Bedouins (away in the desert), by the command of Allah not having the right for spoils or almsgiving unless they join holy war (Jihad) beside other Muslims. If they refused (Islam) ask them to pay the tribute (tax taken from non-Muslims for protection). If they gave a positive reply, accept that, and stop fighting them. If they refused, seek the help of Allah, and fight them. If you lay a siege around a fortress, and they ask to have the warranty of Allah and the warranty of his Messenger, do not give them the warranty of Allah and the warranty of his Messenger. But give them your warranty and the warranty of your companions. Observing your warranty and the warranty of your companions will be easier than observing the warranty of Allah and the warranty of his Messenger. If you lay a siege around a fortress, and its people ask to be brought down to thejudgement of Allah, don't bring them down to the judgement of Allah. But, bring them down to your own judgement, since; you never know whether yourjudgement will be the same as the right judgement of Allah about them or not." narrated by Muslim.

Ex. No. (6):

Abu Huraira, May Allah be pleased with him, reported that the Prophet, Peace be upon him, delegated some horsemen to a place called Najd . The horsemen captured a man from the tribe of Bani-Hanifa called Thomama-bin-Athal. They tied the captive to one of the posts in the mosque. The Prophet, Peace be upon him, came out to him saying: "How do you find yourself Thomama?" Thomama replied: "Good, Muhammad. If you kill me, you shed (retaliatory) blood. If you pardon me, you do a favour to an appreciative person. If you are seeking money, ask

whatever amount you want." He was left until the next day. The Prophet, Peace be upon him, asked him the same question (the next day), and he replied "The same like yesterday, if you pardon me, you do a favour to an appreciative person". The Third day, The Prophet, Peace be upon him, asked him the same question, and the captive gave the same reply. The Prophet, Peace be upon him, said" "Set Thomama free!". Thomama went to a place near the mosque where he washed (did ablution; Wudu'), and came back to the mosque giving the testimony "I bear witness that there is no God but Allah, and Muhammad is the Messenger of Allah". Then, he added: "I swear by Allah, that on earth no face was more hateful to me than your face. Now, your face is the one I love most. I swear by Allah, your religion was the one I disliked most. Now, it is the religion I like most. I swear by Allah, your city was the worst place for me. Now, it is your city which I like most. Your horsemen took me, when I was going for Omra (a smaller pilgrimage out of the normal time of Haj that was also practiced by polytheists before Islam imitating the monotheist religion of Abraham, PBUH). So, what is your decision?" The Prophet, Peace be upon him, announced him and ordered him to go for Omra. When he went toMakkah, somebody there said to him: "You have changed your religion!" (a shameful accusation for them) "No." he replied, "But I joined Islam with Muhammad, Peace be upon him. From now on, you will not receive even one grain of wheat from (my land) Al-Yamama, unless by the permission of the Prophet, Peace be upon him." narrated by Al Bukhari.

Ex. No. (7):

Khalid-bin-Al-Walid, May Allah be pleased with him, said: "I joined the Prophet, Peace be upon him, at the battle of Kheibar, where the Jews came complaining that people were harrying to their warehouses." (In response), the Prophet, Peace be upon him, said: "The possessions of promisors are not permissible unless by a rightful claim". Narrated by Abu-Dawood with a sound reference.

Ex. No. (8):

Sahel-bin-Saad-As-Sa'edi, May Allah be pleased with him, reported that he heard the Prophet, Peace be upon him, saying on the day of Kheibar battle:
"I will give the flag to the man that Allah brings victory through him" The companions stood up to see which of them will be given the flag. Then, he said: "Where is Ali?" He was given the answer that Ali, May Allah be pleased with him, was suffering from pain in his eyes. He called Ali, supplicated Allah (the Almighty) for Ali's cure, spitting in Ali's eyes. Ali was cured on the spot, as if he suffered no pain. Ali, May Allah be pleased with him, said: "We fight them until they are (Muslims) like us"? The Prophet, Peace be upon him, replied "Wait until you are on their land. Then, call them to Islam, and tell them their duties, I swear, that if Allah guided even a single man through you, will be better for you than getting the most expensive livestock." narrated by Al Bukhari, and Muslim.

Ex. No. (9):

It was reported that Abu Huraira, May Allah be pleased with him, said that the Prophet, Peace be upon him, was asked to invoke Allah (the Almighty) against polytheists. He replied: "I was not sent out for cursing, I was sent out as a mercy" narrated by Muslim.

Ex. No. (10):

It was reported that Abu Huraira, May Allah be pleased with him, said: "I called my mother for Islam, when she was still a polytheist. One day, upon calling her, she said to me words about the Prophet,Peace be upon him that I hate. I went to the Prophet, Peace be upon him, crying. I said: "Messenger of Allah! I was calling my mother to Islam, but she was refusing. Today, I called her, but she said to me words about you that I hate. Supplicate that Allah (the Almighty) guide mother of Abu Huraira to Islam". At that the Prophet, Peace be upon him, said: "Oh Allah! I call upon you to guide the mother ofAbu Huraira". I went out very happy at the supplication of the Prophet, Peace be upon him. Going back home, when I was near the door, my mother heard my steps. "Stay where you are Abu Huraira!" she shouted. I heard the sound of pouring water. Then, after washing, dressing, and putting on her veil, she opened the door, and said: "AbuHuraira, I bear witness that there is no God but Allah, and thatMuhammad (PBUH) is His Slave and His Messenger" I went back to the Prophet, Peace be upon him, crying this time out of joy, and I said to him: "Oh Messenger of Allah! I have the good news that Allah (the Almighty) responded to your supplication, and guided the mother of Abu Huraira". The Prophet,Peace be upon him, thanked Allah, and praised Him, and said good words. Then, I said: "Oh, Messenger of Allah! Supplicate Allah that His slaves and believers love both me and my mother, and make us love believers. The Prophet, Peace be upon him, said: "Oh Allah! I call upon you to make this little slave of yours – he means Abu Huraira – and his mother, beloved to your slaves and believers, and make your slaves and believers beloved to them." No believer on earth who heard of me or saw me, but he loved me" narrated by Muslim.

Ex. No. (11):

It was reported that Abu Huraira, May Allah be pleased with him, said: "Tofail-bin-Amr-Ad-Dawsi and his companions, came to the Prophet, Peace be upon him, and said: "Messenger of Allah! Daws (a tribe name) disobeyed and revolted against us, invoke Allah (the Almighty) against them. Thinking that the Prophet PBUH would do that, the people said: "Aws has perished". The Prophet, Peace be upon him, said: "Oh Allah! I call upon you to favour Awas with your guidance, and bring them". Narrated by Bukhary

Ex. No. (12):

It was reported that Jabir-bin-Abdullah, May Allah be pleased with both of them said: "Oh! "Messenger of Allah, we have been hit severely

by the fire arrows of Thakif (a tribe name), invoke Allah (the Almighty) against them. The Prophet, Peace be upon him, said: "Oh Allah! I call upon you to favour Thakif with your guidance" narrated by Al-Tirmizi with a sound reference.

You mean he wasn't always a whiney little Sook who spends his days
making pissy crossposted complaints about crossposting and
churning out Post-Style and -size flames aimed at those whose
threads get more attention than his? Hilarious! B^D

Is stAUKer how they self-title themselves..

in reality they are just little puppies that yap at one's heels.

--

Ex- Atheist, now Prophet, Richard Dawkins claims a "superpowerful
intelligent and moral energy" entity, "like God", is plausible and
could have 'evolved' somewhere in the Universe "by an explicable
scientific progression of incremental evolution", (which no
atheist can explain). B^D

"After two hours of conversation, Professor Dawkins walks far afield.
He talks of the possibility that we might co-evolve with computers, a
silicon destiny. And heï¿½s intrigued by the playful, even soul-stirring
writings of Freeman Dyson, the theoretical physicist.
#
'In one essay, Professor Dyson casts millions of speculative years
into the future. Our galaxy is dying and humans have evolved into
something like bolts of superpowerful intelligent and moral energy.
#
Doesnï¿½t that description sound an awful lot like God?
#
"Certainly," Professor Dawkins replies. "Itï¿½s highly plausible that
in the universe there are God-like creatures."
#
He raises his hand, just in case a reader thinks heï¿½s gone around a
religious bend. "Itï¿½s very important to understand that these Gods
came into being by an explicable scientific progression of
incremental evolution."'
#
Could they be immortal? The professor shrugs.
#
ï¿½Probably not.ï¿½ He smiles and adds, ï¿½But I
wouldnï¿½t want to be too dogmatic about that.ï¿½"

http://www.nytimes.com/2011/09/20/science/20dawkins.html?pagewanted=all

So, which atheist is going to explain the inexplicable,
unscientific, BELIEF in "these {atheist] Gods", with no proof
whatsoever, and show us the evidence of how, and where, God evolved?

No, it's most likely either Woger or Lloyd (from RRAP), harassing the
actual Mark Morgan for daring to be bisexual and not dead silent about
it, so as not to injure their sense of thoughtless heterosexual
privilege.

The Grand Wizard has a great love of irony and a fondness for those who post with tongue in cheek. I say this with some hesitation when I consider exactly where the MMFC's tongue/s have been, but still.

Recently the MMFC made several posts wherein they commented disparagingly on Demon of Mockery's appearance. The Grand Wizard must admit that DoM is not really my type, seeing as how I favor the sweaty well-hung wrestler look. But let us take a gander at Roger Wiseman, head and possibly sole member of the MMFC:

http://img696.imageshack.us/img696/7691/ab8mq0803.jpg

Mr. Wiseman, the Grand Wizard owes you an apology. While reading your posts, I thought you might be a closet homosexual. But no gay man would let himself be photographed with hair that looked like that. (It's called conditioner, my friend. You put it on after you shampoo. But perhaps I am putting the cart before the horse's behind here). I might suggest getting a turban... but you can't handle the turban.

The Grand Wizard of AUK has spoken. Thank you all for listening.

The Grand Wizard wishes to make sure he understands this correctly. A man who has named himself after the purported poop stains on the pants of my client, Emmett "The Pissbum Powerhouse" Gulley wants me to offer "something different in content."

Very well, then, Mr. Pantsload. The Grand Wizard has heard your request and is happy to honor it. I will be certain to advise Mr. Gulley to eat an extra helping of creamed corn at Our Daily Bread on Monday. Then on Tuesday you will have something more interesting to talk about. Perhaps you can even rename yourself "lumpypoop" or "kernelfailure." That will certainly add something to the discussion in this newsgroup. After that perhaps Roger Wiseman will be kind enough to exchange phone numbers with you. It seems the two of you share at least one common interest - and it isn't hair care.

The Grand Wizard of AUK has spoken. Thank you all for listening.

Don't worry, this "shit stain" fiasco is about to be blown wide open.
and it will be blown wide open back on the 2, yes TWO people who took
that picture.

Well, it could be Lloyd Davies, too. Either way, I have a severe
failure of interest...

I hate bayer

and speaking of hating every drug made by every pharmaceutical in the
history of mankind...

Nov 2003:
Merck stock = $60

Merck stock later 2000s= $26

Looks like losing all those Merck options when I opted was not
such a financial loser move as everyone told me it was back in 2000

Sure it's up to mid 30s now

I SPIT on all the people who invested their entire
portfolio in Merck when Vioxx hit the market, and they were at
$80/share.

I'm gonna throw a HUGE party >

Apparently, it was Toad, N9OGL, at least according to KKKarol.

http://www.youtube.com/user/N1FM#p/a/u/2/BGwwIJ6sQao

At 3:40, KKKarol says Toad started all the shit.

Or maybe a "Christopher Seawright" started the shit, hard to tell with
Karol's ranting.

986. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2012-02-07 07:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1328598300@panix.com>
Source record: 250084
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Sure.. that's all Kook-Suckers ever do.

> mhm x v i x i i i

Sorry, I don't speak Gibber..

Either your keyboard is having a seizure,
or you should remove Rusty's cock from your mouth
before speaking, Kook sucker.

--

Ex- Atheist, now Prophet, Richard Dawkins claims that some atheist
"Gods have come into being.." somewhere in the Universe "by an
explicable scientific progression of incremental evolution",
(which no atheist can explain). B^D

"After two hours of conversation, Professor Dawkins walks far afield.
He talks of the possibility that we might co-evolve with computers, a
silicon destiny. And heï¿½s intrigued by the playful, even soul-stirring
writings of Freeman Dyson, the theoretical physicist.
#
'In one essay, Professor Dyson casts millions of speculative years
into the future. Our galaxy is dying and humans have evolved into
something like bolts of superpowerful intelligent and moral energy.
#
Doesnï¿½t that description sound an awful lot like God?
#
"Certainly," Professor Dawkins replies. "Itï¿½s highly plausible that
in the universe there are God-like creatures."
#
He raises his hand,

http://www.vectorsite.net/taevo_07_01.jpg

http://4.bp.blogspot.com/_5BV_YADVD7o/R3KMsQ0usrI/AAAAAAAABHU/qup-8dKPbEs/s400/pope+b16.jpg

just in case a reader thinks heï¿½s gone around a
religious bend. "Itï¿½s very important to understand that these Gods
came into being

When did that happen? where? How many 'came into being'?
Do they have names?

WHERE IS THE EVIDENCE?!??

by an explicable scientific progression of incremental evolution."'

Explain how IMMATERIAL and SUPERNATURAL entities, "superpowerful
intelligent and moral energy" can be affected by Natural Selection,
which occurs in BIOLOGICAL species subject to physical mutations!?

Could they be immortal? The professor shrugs.
#
ï¿½Probably not.ï¿½ He smiles and adds, ï¿½But I
wouldnï¿½t want to be too dogmatic about that.ï¿½"

http://www.nytimes.com/2011/09/20/science/20dawkins.html?pagewanted=all

So, which atheist is going to explain the inexplicable,
unscientific, BELIEF in "these {atheist] Gods", with no proof
whatsoever, and show us the evidence of how, and where, God evolved?

#
#> come worshiping at the altar of atheism,

I told you atheists you were in decline:

It's Official, Atheists claim to be a persecuted RELIGION: B^D
#
#
"THE Atheist Foundation of Australia has lodged complaints
of religious discrimination in Melbourne and Hobart
#
"atheism counts as a religion, Dr Perkins said."
The Age 29/1/2009

"At the dawn of the 20th Century approximately one half of the world's
population identified itself as either Muslim, Catholic, Protestant,
Hindu or Buddhist, and 100 years of secularism, and technological
advancement, and scientific progress later and that number is now
two thirds.

So, for those of you who enjoy beginning coffee shop
conversations with "The Death of God" .. it's time to change
the subject! It's time to talk about something else , because
it's not happening at all.

People are becoming more religious, not less religious,
and religion itself is also evolving"

- Dr Reza Aslan

http://www.abc.net.au/rn/bigideas/stories/2010/2929354.htm

--

226 lines of screed in response to a post that didn't even concern him.
The Grand Wizard submits this as evidence that Fasgnadh, Indecisive
Soldier of God, is well and truly deserving of the Golden Killfile and
Global Village Pump Awards. Hopefully the fine (and not so fine)
readers of AUK will agree with me.

The Grand Wizard of AUK has spoken. Thank you all for listening.

No wonder goofy mcgill slurps kb9rqz, they're both gaybois that claim to
be bisexual. Fairies of a feather.

Sheesh. This has got to be Woger Wiseman. It's truly a shame that as your
brain was forming in-utero, your mother decided to start eating nothing
but lead, uranium and sand, washing it all down with copious amounts of
DDT and alcohol, and leaving you the gaping numbwit we see polluting
Usenet to this day.

==> + FCC NEWS: NEW RULES FOR 5 MHZ (60 METERS) TO GO INTO EFFECT MARCH
5

On November 18, the FCC released a Report and Order, defining new
rules for the 60 meter (5 MHz) band. These rules are in response to a
Petition for Rulemaking filed by the ARRL more than five years ago and
a June 2010 Notice of Proposed Rulemaking. In the February 3 edition of
the Federal Register, the FCC announced that these new rules will go
into effect on March 5, 2012. Read more here
<http://www.arrl.org/news/new-rules-for-5-mhz-60-meters-to-go-into-effect-mar

ch-5>.

==> + WRC-12: AGENDA ITEM 1.23 PASSES COMMITTEE, MOVES TO PLENARY

On the afternoon of February 7, Committee 4 of the 2012 World Radiocommunication Conference (WRC-12) approved Option 1 to satisfy Agenda Item 1.23, with minor editorial amendments to the text received from Working Group 4C. Option 1 calls for a worldwide secondary allocation to the Amateur Service at 472-479 kHz, with a power limit of 1 W EIRP, with a provision for administrations to permit up to 5 W EIRP for stations located more than 800 km from certain countries that wish to protect their aeronautical radionavigation service (non-directional beacons) from any possible interference. Option 2 was NOC (no change to the current rules).

In keeping with the rules of the Conference, Committee decisions must be read twice in Plenary Session; the decision of the Conference is not final until after second reading in Plenary. According to ARRL Chief Executive Officer David Sumner, K1ZZ, quite a few additional administrations -- mainly in the former Soviet Union and Arab states -- will be adding their country names to the Footnotes prior to consideration in Plenary. Sumner said that Agenda Item 1.23 should have its first reading in the Plenary on Friday, February 10, with its second reading sometime next week. Read more here <http://www.arrl.org/news/agenda-item-1-23-passes-committee-moves-to-plenary> .

==> + WRC-12: HOW ARE AGENDA ITEMS PROCESSED AT A WRC?

By IARU Secretary Rod Stafford, W6ROD

The procedures used by the International Telecommunication Union before and during a World Radiocommunication Conference seem complicated. They are somewhat complicated, but they are understandable with a bit of background. Each Agenda Item that will be decided at a WRC has been studied for at least three or four years leading up to a WRC. ITU Study Groups and Working Parties discuss the issues involved in the Agenda Item. Compatibility studies, sharing studies and experiments take place whenever needed, so that discussions and decisions can be made based upon facts, rather than opinions. Read more here <http://www.arrl.org/news/wrc-update-how-are-agenda-items-processed-at-a-wrc> .

==> + WRC-12: PROPOSED MARITIME MOBILE ALLOCATION GETS FIRST READING AT WRC-12 PLENARY SESSION

At the February 3 Plenary Session of the 2012 World Radiocommunication Conference (WRC-12), delegates heard the first reading and approved a worldwide exclusive allocation to Maritime Mobile of 495-505 kHz. There will need to be a second reading to finalize the allocation. According to ARRL Chief Executive Officer David Sumner, K1ZZ, discussion of this allocation to Maritime Mobile

"has been in the works throughout the conference preparation (i.e. since 2008) and was the reason why the MF amateur allocation could not be made in this band as some amateurs had hoped. That's why we [the Amateur Radio Service] had to look elsewhere and is what put us in conflict with aeronautical radionavigation."

==> + WRC-12: NOBEL LAUREATE JOE TAYLOR, K1JT, ADDRESSES PLENARY SESSION AT WRC-12, RECEIVES ITU GOLD MEDAL

On February 3, delegates and attendees at the 2012 World Radiocommunication Conference had the pleasure of listening Joe Taylor, K1JT, share his vision of the future of radiocommunication. Taylor -- an ARRL Member -- won the Nobel Prize in physics in 1993 <http://www.nobelprize.org/nobel_prizes/physics/laureates/1993/> for the discovery of a binary pulsar, a discovery which has opened up new possibilities for the study of gravitation. After the speech, International Telecommunication Union Secretary General Dr Hamadoun Tour&#65533;, HB9EHT, presented Taylor with the ITU Gold Medal in recognition of Taylor's outstanding contribution to the research in the field of radiocommunication.

Dr Tour&#65533; introduced Taylor to the Plenary. In his introduction, he told the audience that Amateur Radio led to Taylor's career as a radio astronomer, and ultimately to his winning the Nobel Prize: "I'm told that an early interest in Amateur Radio led Joe Taylor to an exciting career in radio astronomy, which then earned him the 1993 Nobel Prize in physics. I share his interest in Amateur Radio with passion, but will that lead me to a Nobel Prize? I'm working on it!"

Taylor began his speech by thanking the WRC-12 delegates for the job they were doing at the Conference. "I understand that you have come to Geneva from more than 150 of the ITU's Member States," he said. "You are here to do an important job, an essential one, for nearly all of humanity in today's world. You are charged to do your upmost to accommodate the wide variety of competing interests of all users of the radio frequency spectrum and its available orbits for Earth satellites. This is surely not an easy task. Most people give very little thought to the complicated issues that you face. Why should they, since for most of us, most of the time, the technologies that depend on these limited resources just seem to work. But I know, and each one of you knows, that much background work and many long negotiations are often necessary in order to make everything fit together and work in harmony."

Taylor noted new discoveries "that have fundamentally changed or expanded our understanding of nature's laws, or might do so in the near future." But, he said, these discoveries will not affect the ITU or future WRCs for "at least not for many decades to come. This is because our fundamental understanding of electromagnetism is already in a mature state. Maxwell's equations <http://en.wikipedia.org/wiki/Maxwell%27s_equations>, after all, have

been thoroughly tested now for 150 years. And in principle, they tell us everything we need to know in order to exploit the wonders of telecommunications at the speed of light. Our understanding of these laws of nature, including what they tell us is possible and not possible, is not likely to change, even in the more distant future. But of course we can still develop new and improved ways of generating, controlling and detecting electromagnetic radiation, as well as clever new ways of effectively sharing the spectral resources that we have. Such advances as these will surely continue, and perhaps they will even increase. The fundamental science may be mature, but technology's ability to exploit and build upon electromagnetic phenomena is still rapidly developing.

"It's interesting to comment in passing on the fundamental differences between the bounded radio frequency spectrum and the balance, for example, on accessible fossil fuels. Limitations of the radio spectrum are a result of fundamental laws of nature. Every nation on Earth, and indeed every person on Earth, has access, in principle, to the same spectrum as everyone else. The amount of accessible oil, on the other hand, depends on the much more complicated way on how the Earth formed and evolved over time, and fossil fuels are not evenly distributed over the Earth and they are expendable. When it's gone, there's none left. The electromagnetic spectrum, on the other hand, will always be there, whether or not we humans are around here to enjoy using it. Moreover, the spectrum can be shared by many users simultaneously, and shared use can be especially effective if adequate planning is done in advance. That planning, of course, is an essential part of your assignments here.

"Future technologies will surely make even better uses of wireless communication than we do today. I foresee plenty of scope for contributions for new technologies. Information and communication technologies have much to offer for the betterment of the human condition everywhere, and perhaps especially so in the developing world. It is extremely important to continue seeking the best efficiencies in the use of the spectrum. I wish you every success in your task of creating wise and fair guidelines for regulators and policy makers who must allocate the limited resources in the very best interest of all mankind."

You can view Taylor's speech on YouTube <http://www.youtube.com/watch?v=F028RKkLefI>, courtesy of Andy Clegg, W4JE.

==> ON THE AIR: THE 2012 ARRL INTERNATIONAL DX CW CONTEST TAKES TO THE AIR NEXT WEEKEND

CW DXing and contesting take center stage the weekend of February 18-19, as the 2012 ARRL International DX CW Contest takes to the airwaves. "After years of lackluster conditions on 15 and 10 meters, 2011 finally saw the propagation gods giving us a break," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "Since September 2011, the

high bands have been in excellent shape, with worldwide openings on 15 and 10 meters becoming an almost-daily occurrence. As a result, activity has spiked in almost every major contest, with hundreds more logs being submitted. If conditions hold -- and I don't see why they wouldn't -- we're in for another high-band treat in another week or so." Read more here <http://www.arrl.org/news/the-2012-arrl-international-dx-cw-contest-takes-to-the-air-next-weekend>.

==> ARRL HQ: SAVE THE DATE! TAKE A VIRTUAL TOUR OF W1AW ON FEBRUARY 12

Join W1AW Station Manager Joe Carcia, NJ1Q, on a virtual tour of W1AW, the Hiram Percy Maxim Memorial Station <http://www.arrl.org/w1aw-antenna-farm>, the Amateur Radio station at ARRL Headquarters in Newington, Connecticut. Carcia will lead this tour via a live webcast on Sunday, February 12 at 5 PM EST (2200 UTC). Anyone with an Internet connection will be able to watch the tour here <http://www.awecast.tv/channels/arrl/>.

"We want viewers of this live Internet tour to feel as if they are actually at W1AW," Carcia explained. "If you came to W1AW in person, you would see the same things that we are going to show on the virtual tour: The three operating stations, the W1AW workshop, the transmitter racks that we use to send out our bulletins and use for the code practice transmission, the control console and Old Betsy <http://www.arrl.org/images/view/web_008.jpg>, Hiram Percy Maxim's personal spark gap transmitter."

Al Petrunti, KA1TCH, of the New Day Group <http://www.newdayhd.com/>, will follow Carcia as he leads viewers through the station. ARRL Staff members, including Media and Public Relations Manager Allen Pitts, W1AGP, and Chief Operating Officer Harold Kramer, WJ1B, as well as local television weatherman Geoff Fox, K1GF <http://www.geofffox.com/>, will also be on hand at W1AW during the tour.

"Hams around the world know of W1AW, and thousands have made contacts with this impressive station -- but most hams never get to see it," Pitts said. "Thanks to Al Petrunti's group, we hope that folks enjoy seeing what's at the other end of the signals. As in all live broadcasts, you never know just what might happen. We invite you to join us." Pitts is producing the live web tour.

This is the second video that the New Day Group has made for the ARRL. In 2011, they created the HR 607 video <http://www.arrl.org/hr-607> that educated radio amateurs of a bill in Congress that addressed certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network using current Amateur Radio spectrum.

==> + ARRL FIELD DAY: 2012 FIELD DAY PACKET NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 23-24, 2012! ARRL's flagship operating event -- always

held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/fieldday> and include the complete rules, as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. A brief one-page flyer with basic "What is Field Day" information has also been included in this year's Field Day packet. Amateur Radio clubs and individuals are encouraged to reproduce this flyer as a handout for information tables.

==> SOLAR UPDATE

Tad "The Sun rolling high through the sapphire sky <http://www.youtube.com/watch?v=hSFKnYD5rp4>" Cook, K7RA, reports: Solar activity was down again this week -- this is the third week in a row with sunspot numbers lower than the week prior. On January 20, we reported an average daily sunspot number of 116.9 for January 12-18, 98.7 the next week, followed by 62 the week of January 26-February 1, and now 40.4 during the latest period. The solar flux forecast -- which roughly tracks sunspot numbers; we don't have access to any short term sunspot number forecast -- is also lower. The latest forecast from NOAA/USAF has solar flux at 100 on February 9-11, 105 on February 12, and 110 on February 13-24. The predicted planetary A index is 8 on February 9-10, 5 on February 11, 8 on February 12-13, 5 on February 14-22, 8 on February 23, and 5 from February 24 through the end of the month. Look for more information on the ARRL website on Friday, February 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Circle of Life <http://en.wikipedia.org/wiki/Circle_of_life> from The Lion King <http://en.wikipedia.org/wiki/The_Lion_King>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 10 -- NCCC Sprint Ladder
- February 11 -- FISTS Winter Sprint
- February 11-12 -- Louisiana QSO Party; New Hampshire QSO Party; CQ WW RTTY WPX Contest
- February 12 -- North American Sprint (SSB); SKCC Weekend Sprint
- February 12-13 -- Classic Exchange (Phone)
- February 13-17 -- ARRL School Club Roundup <http://www.arrl.org/school-club-roundup>
- February 14-15 -- PODXS 070 Club Valentine Sprint (local time)
- February 15 -- NAQCC Straight Key/Bug Sprint; AGCW Semi-Automatic Key Evening

Next week:

- February 17 -- NCCC Sprint Ladder
- February 17-18 -- Russian PSK WW Contest
- February 18 -- Feld Hell Sprint
- February 18-19 -- ARRL International DX Contest (CW)
<http://www.arrl.org/arrl-dx>; AWA Amplitude Modulation QSO Party
- February 20 -- Run for the Bacon QRP Contest
- February 22 -- SKCC Sprint
- February 22-23 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> BE A STAR! DEADLINE FOR SECOND ANNUAL ARRL VIDEO CONTEST IS FEBRUARY 29

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Second Annual Video Contest! Here's a chance to put that video camera to use: Shoot a ham radio-related video and send it our way. All videos must be postmarked by February 29, 2012. Burn your video to a CD or DVD using the appropriate software and mail it to ARRL Video Contest, 225 Main St, Newington, CT 06111. Do not attempt to send it via e-mail, as our e-mail system cannot accommodate large files. Read more here <http://www.arrl.org/news/be-a-star-deadline-for-second-annual-arrl-video-contest-is-february-29>.

==> + SILENT KEY: FORMER ITU-R DIRECTOR DICK KIRBY, W0LCT/HB9BOA (SK)

Richard "Dick" Kirby, W0LCT/HB9BOA, passed away on January 26. He was 89. In 1974, Kirby -- an ARRL Life Member -- was elected Director of the International Telecommunication Union's International Radio Consultative Committee; he served as Director until his retirement in 1995. In 1992, under Kirby's tenure as Director, the Committee became the ITU Radiocommunication Sector (ITU-R). One of three sectors at the ITU, ITU-R is responsible for matters concerning radio communication. Its role is to manage the international radio-frequency spectrum and satellite orbit resources, and to develop standards for radiocommunication systems with the objective of ensuring the effective use of the spectrum. While at the ITU, Kirby also served as President of the International Amateur Radio Club, 4U1ITU, the Amateur Radio station at ITU Headquarters in Geneva, Switzerland. Read more here <http://www.arrl.org/news/former-itu-r-director-dick-kirby-w0lct-hb9boa-sk>.

==> + SILENT KEY: ASTRONAUT JANICE VOSS, KC5BTK (SK)

NASA astronaut Janice Voss, KC5BTK, of Houston, Texas, passed away on February 7 from cancer. She was 55. One of only six women who have flown in space five times, Voss' career was highlighted by her work and

dedication to scientific payloads and exploration. Voss participated in making ham radio contacts from space via the Space Shuttle Amateur Radio Experiment (SAREX), the precursor to the Amateur Radio on the International Space Station (ARISS) program. Read more here <http://www.arrl.org/news/astronaut-janice-voss-kc5btk-sk>.

==> SILENT KEY: WORLDRADIO FOUNDER ARMOND NOBLE, N6WR (SK)

Armond Noble, N6WR -- the founder of WorldRadio magazine and its publisher for 37 years -- passed away February 1 in Sacramento, California after a short illness. He was 77. WorldRadio was published monthly in printed form from July 1971 until the end of 2008, when Noble sold the magazine to Hicksville, New York-based CQ Communications Inc. With its February 2009 edition, the publication was renamed WorldRadio Online and became the first online-only major Amateur Radio publication . Read more here <http://www.arrl.org/news/em-worldradio-em-founder-armond-noble-n6wr-sk>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 10-12 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>,
Orlando, Florida
- February 17-18 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>,
Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>,

Oh, completely. I suspect Mr. Kimball, of adotf, is quite correct, and
I might go so far as to say that, if someone is x-poasting a frog/
forgery (or an unrecognised sock) from RRAP, if it isn't (f)laming
Woger (in which case it's Lloyd, who may optionally be laming Mark),
it _is_ Woger (since he's totally obsessed with Mark).

Snarky

Amateur Radio Newsline(tm) Report 1800 - February 10 2012

Amateur Radio Newsline report number 1800 with a release date of February 10th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio activates after a killer earthquake hits the Philippines; some good news out of WRC 12; new rules about United States ham radio operation on 60 meters take effect on March 5th and CQ Magazine's Editor says that ham radio use of the Morse Code is still alive and well in an era of no-code licensing. Find out the details are on Amateur Radio Newsline(tm) anniversary report number 1800 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO RESPONDS TO PHILIPPINE QUAKE

Rescuers assisted by armed forces are hard at work searching for survivors in the quake hit central Philippines. The 6.8 temblor shook the country on Monday, February 6th. At least 56 are confirmed dead and thousands are homeless. And soon after the shaking ended ham radio operators were asked to provide what appears to be a first response effort. We have more in this report:

--

Most of the information to date comes from Jim Linton, VK3PC, who is the Chairman of the IARU Region 3 Disaster Communication Committee. Jim reports that the after effects continue across the central Philippines after the magnitude 6.8 earthquake struck triggering numerous landslides and other devastation.

Linton notes that Eddie Valdez, DU1EV, is the Chief Operating Officer for IARU society PARA. Valdez says that ham radio operators are now active in communications assistance, especially those near the quakes epicenter in the DU7 and DU6 call areas. They have chosen to mainly use the VHF and UHF bands for in-country communications. With phone communications cut, the services they are providing include message handling, reporting on widespread power outages as well as other infrastructure damage.

Meantime Radio Amateurs of Canada reports getting a message from a shortwave listener in Taiwan. He notes that 7 point 095 MHz on 40 meter Lower Sideband is also in use for emergency communications into

and out of the Philippines.

This latest disaster come on the heels of a series of typhoons that swept the Southern Philippines last December. Those storms brought with them a heavy loss of lives and severe property damage. In that scenario, radio amateurs were called on to become that nations communications front line.

For the Amateur radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles. Jim.

--

As we go to air aftershocks are continuing and the Philippine ham radio community remains on the job as an important first line of search, rescue and quake relief communications. (VK3PC, DU1EV, RAC)

**

RADIO LAW: A HAM RADIO ALLOCATION AT 500 KHZ COMES A STEP CLOSER

A ham radio allocation neat 500 KHz has taken another step closer to becoming a reality. According to several reports out of WRC 12 being held in Geneva, Switzerland, Working Group 4 has approved an agenda item that calls for a worldwide secondary allocation to the Amateur Service from 472 to 479 kHz and has sent it on to the full assembly called the Plenary for its consideration.

There are some restrictions which come with this action. Power output is limited to an effective one watt but would permit nations that are more than 800 Kilometers from an Aeronautical Service non-directional beacon to permit hams up to five watts effective radiated. Either way, ham radio operators must not interfere with any other spectrum user holding a primary status in that band.

Hat said, this is far from a done deal. Next up is two separate presentations or readings of this proposal before the Plenary session of all nations taking part in the world wide communications law making process. There, footnotes to the proposal can be added by any administration that has a representative at the conference.

While there is still a lot of work to take place before WRC 12 ends, at least near 500 KHz, there appears to be some light at the end of the proverbial tunnel in the matter of a new super low frequency ham radio band. We should know for certain by this time next week. (Various WRC 2012 Reports)

**

RADIO LAW: NEW 5 MHZ RULES GO INTO EFFECT ON MARCH 5

In the United States, word that the new rules governing ham radio operations in the 5 MHz or 60 meter spectrum take effect on March 5th. This after a notice to that affect appeared in the February 3rd edition

of the United States Federal Register.

As previously reported, last November the FCC released a Report and Order detailing new rules for the 5 MHz Amateur Radio band.

The announcement brought with it a number of changes for 60 meter operators. This included substituting a channel at 5 point 358 point 5 MHz for 5 point 368 MHz previously authorized. The effective radiated limit in the 60 meter band will be raised by 3 dB to 100 Watts Peak Envelope Power relative to a half-wave dipole. Also, three additional emission types are authorized. These are Data, RTTY and CW.

Currently, amateur radio in the United States holds a secondary allocation for 5 MHz and ham radio operations must not cause any interference to the primary users of that band. These include fixed service, as well as mobile stations authorized by the telecommunications regulators of other sovereign nations. Access in the United States to the channelized 60 meter spectrum is limited to holders of General class or high FCC license grants. You can read the entire Federal Register item explaining the 5 MHz changes at tinyurl.com/6wzsfjm (FCC)

**

HAM RADIO IN SPACE: SUMBANDILASAT MAY LIVE AGAIN

>From South Africa comes word that the SumbandilaSat amateur radio payload may resume operation in the near future. This according to the South African Radio League which says that a combination of ingenuity and innovation by the satellite payloads ground control team has resulted in bringing the ham radio functions back to life. Amateur Radio Newsline's Norm Seeley, KI7UP, has the latest:

--

A statement issued by South Africa AMSAT and released by the South African Radio League says that there is a real possibility that communication through SumbandilaSat may resume next month while the satellite is in sunlight. Here's the back story:

According to Johann Lochner, ZR1CBC, last June the primary controller on the power distribution unit for the On-Board Computer stopped responding to commands from the ground. While the exact cause has never been determined it appears likely that this failure was related to a major solar radiation event on June 7th.

It later appeared that the battery had also failed and nothing was heard from the satellite for some time. In the meantime the ground station operation to monitor for SumbandilaSat on passes over South Africa and to begin any recovery procedure was automated.

After a month of trying contact was made with SumbandilaSat. That was last November and the control team set in place a planned recovery procedure. It took about 4 days to discover that the main battery had

indeed failed with SumbandilaSat responding only when it's solar panels were in full sunlight.

The ground stations at the South Africa National Space Agency's operations center at and the Electronic Systems Laboratory at Stellenbosch University are now receiving telemetry when the satellite's solar panels are illuminated by the sun. As a result, Lochner is confident that some operations will be restored even to the point where it may be possible to have the amateur radio transponder back in operation within a reasonable time frame.

The bottom line is that while the overall space-frame has been written off by South Africa's SunSpace, the SumbandilaSat ham radio payload may be usable whenever the bird is illuminated by the Sun. In the world of ham radio space operations having that kind of service is far better than having nothing at all.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdle, Arizona.

--

More on SumbandilaSat recovery efforts are on line at www.amsatsa.org.za. (SARL)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including radio station CHNW on 88.7 FM serving the city of Westminister, near Vancouver, British Columbia, Canada.

(5 sec pause here)

**

RADIO LAW: PROPOSED MOBILE CELLPHONE LAW COULD END HAM RADIO MOBILE OPERATIONS IN ILLINOIS

Proposed laws introduced into both houses of the Illinois legislature could severely impact on mobile operation by hams, C-B operators and even long-haul truckers passing through that state. Matthew Chambers, NR0QQ, has the details:

--

New legislation has been introduced into the Illinois House that will have a significant impact on the mobile use of amateur radio transceivers within the state.

House Bill 3970 introduced by Democrat Representative Karen May would ban use of all electronic communication devices with the limited exceptions of those in a hands-free or voice-activated mode and for

law-enforcement and operators of emergency vehicles or parked vehicles.

Not included in that bill is any exceptions for two way radios or amateur radios. That would in effect ban all amateur and CB / GMRS / FRS activity in vehicles in Illinois.

Also introduced into the Illinois House is House Bill 3972 by Democrat Representative John D'Amico that is identical to HB 3970.

As the legislative sessions are getting into full swing across the nation, here at the Amateur Radio Newsline we will be watching closely as more cell phone bills are being introduced that may effect the mobile use of amateur transceivers.

For the Amateur Radio Newsline, I'm Matthew Chambers NR0Q.

--

As we go to air, efforts are being made from within the amateur radio community to obtain exclusion for mobile ham radio operations, but the wording of the two measures may make that very hard to accomplish. (NR0Q)

**

ENFORCEMENT: COLLEGE STATION GIVES UP LICENSE FOR NET ONLY OPERATION

Yet another college radio station has gone QRT. Amateur Radio Newsline's Stephen Kinford, N8WB, reports:

--

Paul Smiths College in Adirondack Park, New York, has relinquished its Class D FM broadcast license for its campus radio station WPSA FM. The school had been facing problems keeping it on the air that came from a series of FCC Monetary Forfeiture Orders over the late renewal of the station license in 2006 as well as lack of interest from the student body in the stations operation.

WPSA reportedly operated at around 10 watts with a service radius of two miles that covered little more than the campus. Its problems began when its license was cancelled by the FCC and the call sign deleted. Two years later, the college filed a Petition for Reconsideration and had it reinstated. Following the late renewal in 2006, the FCC issued a Notice of Apparent Liability for Forfeiture in the amount of $7,000 fine for unauthorized operation of a radio station after the license had expired.

Adding to the situation was a seeming loss of interest by its potential audience. According to the schools coordinator for student activities, students were part of the decision to give up the broadcast license. She said that no one wanted to participate in it and that it had very few listeners.

The spokesperson added that it appears the trend these days is that the students are on-line rather than listening on the airways.

For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB, reporting.

--

WPSA will live on but without a transmitter or antenna. Current plans are to bring it back to life, but as a strictly online entity. (RW)

**

COMMUNICATIONS LAW: FCC CHAIRMAN EMBRACES DIGITAL TEXTBOOKS

FCC Chairman Julius Genachowski has joined Secretary of Education Arne Duncan to discuss the state of digital learning in American schools.

At the first-ever Digital Learning Day Town Hall held recently in Washington, D.C., the Digital Textbook Collaborative presented them with the "Digital Textbook Playbook." This is a plan to help Kindergarten through 12th grade schools transition to digital textbooks. The Collaborative also helped the FCC and the Department of Education update the School 2.0 bandwidth planner to help schools plan for their connectivity needs.

At the meeting, Chairman Genachowski challenged state leaders and the digital textbook industry ecosystem to make national adoption of digital textbook a reality. He also announced a meeting for March with CEOs of companies in the digital learning space to drive national adoption of digital textbooks in the next five years.

The complete FCC press release that details the agency's plans to help facilitate the conversion to digital textbooks is available on-line at tinyurl.com/fcc-digital-textbooks. (FCC)

**

LIGHT SQUARED VS GPS: GOVERNMENT REPORT SAYS THERES NO WAY FOR THE TWO TO CO-EXIST

More problems for LightSquared in its bid to construct a 4 G network in spectrum adjacent to that used by the GPS navigation system. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

A joint panel of representatives from nine federal agencies says that it has determined that there are no practical solutions that would allow LightSquared's proposed broadband service to operate without significantly interfering with the Global Positioning System or GPS that operates in adjacent spectrum.

The report was made in a January 13th letter from the National Executive Committee for Space-Based Positioning, Navigation, and Timing to the National Telecommunications and Information Administration. It said that over the past year it has closely worked with LightSquared to

evaluate its original deployment plan, and subsequent modifications, to address interference concerns. It said that substantial federal resources were expended and diverted from other programs in testing and analyzing LightSquared's proposals. The report added that no further tests are warranted, as LightSquared has not demonstrated any means that would prevent such interference from occurring.

As previously reported, numerous tests over the past year have shown that signals from LightSquared's proposed 4G network held the potential to interfere with the weaker signals from space used by global positioning system receivers. As a result, In December 2011, the company offered to limit its signal to lower frequency spectrum farthest away from the bandwidth used by GPS in exchange for immediate access to that spectrum. Then as reported last week LightSquared lashed out at the GPS industry in a Federal Communications Commission filing, claiming poor design of GPS units is solely to blame for the problem.

Not surprisingly, LightSquared immediately issued its own press release calling for the FCC and NTIA to retake the lead on conducting tests of its network, claiming the committee report demonstrated bias and inappropriate collusion with the private sector. LightSquared noted a director for Trimble GPS, whom is called an outspoken LightSquared opponent, served as Director of the Advisory Board. It also claims that government testing has become unfair and shrouded from the public eye.

With the latest on this seemingly never ending story, Im Bruce Tennant, K6PZW, in Los Angeles.

--

With the committee decision now on the books, a final ruling from the FCC on whether LightSquared will be allowed to go ahead with its plans to turn on its 4 G could come at any time. (Various News Reports)

**

NAMES IN THE NEWS: W9GKA WANTS JANUARY VHF CONTEST E-SKIP INFO

Some names in the news. First up is Kevin Kaufhold, W9GKA, of Belleville, Illinois. He says over the VHF Reflector that he is looking for log data on the E-skip conditions in this year's January VHF Sweepstakes. W9GKA says that he is writing an article on the e-skip QSO's in the contest, and would like to include as much information as possible. If you can assist, please send the log information on your e-skip contacts to him at kaufhold (at) yahoo (dot) com. (W9GKA)

**

NAMES IN THE NEWS: G0SFJ RELEASES NEW NOVEL INVOLVING MORSE CODE

A new novel featuring Morse code and radio is now available for purchase on the internet. Of Martian Lines was written by Andy Thomas, G0SFJ. It's plot is set on the Mars and in modern Russia and the Ukraine of two generations in the future. The book is described as a blend of cosmology, radio, space technology and Russian literature.

This is the second novel in the "Dmitri" series that explores the first Russian colony on Mars, and the lies and tensions the first Cosmonaut colonists from Earth bring with them. Of Martian Lines is available for sale on-line at www.createspace.com/3739192 (Southgate)

**

HAM HAPPENINGS: SARL NATIONAL CONVENTION

The 2012 South Africa Radio League's National Convention will be held in Pinetown from April 20th to the 22 at the Premier Hotel in Pinetown. The event kicks off with a buffet type supper at the Highway Clubhouse on Friday evening featuring a presentation highlighting how South Africa's electronic industry found it's origin in Pinetown and the local development off SSB.

The South Africa Radio League's Annual General Meeting will be held on Saturday morning at the hotel venue followed by two presentations covering VHF antennas and Logbook of the World. An awards banquet will also be held at the Premier Hotel. The full program and booking details are available on-line at www.sarl.org.za. (SARL)

**

HAM HAPPENINGS: HAMVENTION 2012 QCWA DINNER MAY 18

The 2012 QCWA Banquet will take place on Friday May 18th at the Dayton Ohio Airport Holiday Inn simultaneously with the Dayton Hamvention. The gathering will begin at 7:30 p.m. Eastern time with nature photography expert John Lemker as the featured after dinner speaker. For more information or to make reservations please contact Jerry Ragland, WA8BOB, at his Callbook or QRZ.com address.

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: WORLDRADIO FOUNDER ARMOND NOBLE, N6WR - SK

The changing of the guard in amateur radio continues with the sad news that Armond Noble, N6WR, founder and publisher of WorldRadio Magazine

for 37 years has become a silent key. According to Les Cobb, W6TEE, Noble died February 1st in Sacramento, California after a short illness.

The print version of WorldRadio was published monthly from July 1971 until the end of 2008, when N6WR sold the magazine to Hicksville, New York-based CQ Communications, Inc.

Armond Noble had a long and distinguished career in communications and the media. From 1953 to 1955 he served in the U.S. Army with a VHF radio relay unit. He went on to positions at commercial radio and TV stations around the United States. These included KTWO-TV and KATI in Casper, Wyoming; KOOK-TV, Billings, Montana; KTVB, Boise, Idaho; KERO-TV, Bakersfield, California, WOOD-TV, Grand Rapids, Michigan, and KCRA Radio in Sacramento.

During the Vietnam War, Noble was a reporter and photographer for TIME magazine and the Milwaukee Journal. He also served in the TIME-LIFE bureau in Sacramento, California.

Armond Noble, N6WR, was reportedly hospitalized about two months ago. As we go to air memorial services have not been announced. (W6TEE, W6FJ, CQ Publishing)

**

WORLDBEAT: RSGB WANS HAMS ABOUT UNAUTHORIZED USE OF OLYMPIC LOGOS

The Radio Society of Great Britain is warning that although telecommunications regulator Ofcom has granted permission for that nations radio amateurs to use special prefixes over this summer, this permission does not extend to use of the various logos associated with the London Olympic games on QSL cards or elsewhere.

The RSGB notes that these logos, or Games Marks as they are called in the UK, are strictly controlled by the London Organizing Committee of the Olympic and Paralympic Games. As such they are not free for individuals and organizations to use without express permission..

There is so far only one exception. Project ECHO which is concerned with the two main special event stations has been granted permission to use the games Inspire logo, but only in a limited way.

More information about the use of the Olympic logos and their use can be found in the at the Frequently Asked Questions on the www.london2012.com website. (RSGB)

**

DX

In DX, HA0NAR and HA0SR will be active as FW0NAR from Uvea Island through February 20th. The plans were to have two stations active on 160 through 6 meters using CW, SSB and RTTY, with a focus on the lower

bands. However, this may change since they lost the third operator who was to make the trip. QSL FW0NAR via HA0NAR.

SP5APW is expected to visit Phu Quoc Island between March 7th and the 12th. He has applied for the callsign 3W4JK. Operations will likely be holiday style on 40 through 10 meters using SSB, PSK31 and RTTY, with possible operations on 6 meters. QSL as directred on the air.

Lastly, well placed reports indicate that an international group of 10 operators will activate St. Paul Island during the middle part of 2012. More details should be forthcoming in future Amateur Radio Newsline reports.

(Abve from various DX News Sources)

**

THAT FINAL ITEM: CQ SAYS MORSE IS ALIVE AND WELL

Finally this we we take a trip back to February of 2007. Thsats when the Federal Communications Commission took action to eliminate Morse Code testing as a requisite requirement to obtain any class of Amateur Service license in the United States. Now, five years later, CQ Magazine Editor Rich Moseson, W2VU, has published a very pointed editorial where-in he notes that both ham radio and use of the Morse code are alive, well and growing. This despite the ney-sayers who predicted the abandoning of Morse testing would bring a sudden end to the hobby.

In his editorial titled "No-Code Plus Five Years: An Assessment", W2VU, states that ham radio is still here. CW is still here and despite the fears of many CW supporters the universe did not implode on February 23, 2007.

Rather his article was prepared based on research that checked on signs of the state use of Morse by today's ham radio community. It did this by asking manufacturer of keys and paddles about sales, talking to the FISTS Morse preservation group, looking at CW contest results and overall United States licensing statistics. And says W2VU, the article has already brought some interesting response:

--

W2VU: "We've gotten a lot of good feedback from readers on this already and any ofb them are agreeing with the comment that we had at the end that the only real hiccup that we see and that was pointed out by Nancy Kott, WZ8C, is a difference in the conversion of CW learners to comfortable CW operators. That a lot of the newer hams that are learning the code do not yet feel comfortable on the air with it."

--

Moseson adds that ham radio has a long tradition of lending a helping hand to newcomers in need of assistance:

--

W2VU: "The best way to deal with this of coarse is the way that hams have dealt with learning experiences for decades which is to hook up experienced people with newcomers and helping them one-on-one, either on the air or off to be more comfortable as code operators and they will find a lot more enjoyment in it."

--

Without giving away all the findings in the article, W2VU does note that Morse has a bright future in amateur radio, despite or perhaps because of the elimination of the code test requirement. You can judge for yourself by reading Rich Moserson's complete article. You will find it on-line in Adobe PDF format at tinyurl.com/6rreyxy (ARNewsline(tm), VK3PC)

**

A VER SPECIAL NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, I just want to say a word of thank you to all of you who listen in each week to these Amateur Radio Newsline bulletins. As we end this 1800th consecutive week of bringing these newscasts to you, we want to pause for a moment and look back to 1977 when Jim Hendershot, WA6VQP, and Bill Pasternak, WA6ITF, produced and issued the first Westlink Radio Network bulletin. It was devoted entirely to repeater deregulation and only heard by those in the Los Angeles area with a transceiver set to 223.5 MHz simplex. Likely no more than two dozen people or so. Now just a few months shy of 35 years later, Amateur Radio Newsline, which is the successor name to Westlink Radio, is heard on thousands of repeaters world wide and by tens of thousands over the Internet. And as it was back in 1977, so it remains a free listener supported service to the ham radio by your fellow radio amateurs.

Yes, there are many people to thank, but we will limit it to three who were part of the original 1970's core group and who sadly have become Silent Keys. So as we end Newscast 1800 we lift up our imaginary glass to toast the lasting memory of our original Production Coordinator Bill Orenstein KH6QX. We also salute the master wordsmith and anchor Alan Kaul, W6RCL. Last but by no means lest, we remember our guiding light of many years and the man who made it possible for Astronauts to take ham radio into space. Of coarse we are referring to one of the world's greatest news reporters, producers and anchors, the late Roy Neal, K6DUE, of NBC Network News. All three may no longer be with us in the

flesh, but they will never be forgotten here in the Amateur Radio Newsline studios. What they helped to pioneer in the 1970's 1980's and 1990's is the reason you are hearing this 1800th newscast right now.

For now, with Bill Pasternak, WA6ITF, at the editors desk, and for all of the Amateur Radio Newsline volunteers the world over, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening all of these years. You are an important part of the Amateur Radio Newsline family and we would not be here if not for you.

what do teh hetro guys like to look at? teh womens ass! why? 'cuz deep
down inside they know that teh ass is where teh shit cums from! indeed
teh same with dudes asses! noting like a nice hot ass biscuit from a
nice fat ass.

BTW,
i never suck a uncut cock.
with teh punce gotcha he wonders why i simpel.
